Conference, 2007 The chapters in this book

were first presented at the Women in French Biennial Conference held in Leeds in May 2004 The twelve essays explore the multifaceted commodification of the female body and provide insights into the mutations of French society and culture British and French scholars examine the paradoxes and contradictions embodied in various images and discourses related to health and illness from different perspectives ranging from sociological studies to analyses of working diaries children's medical encyclopaedias and literary texts The resilient female body as epitomised by the First World War nurse tends by the end of the twentieth century to be construed as the sanitised female body subjected to mind body dualities largely controlled by the medical professions. Thus maternity and related issues such as birth and contraceptive technologies figure as major themes with contributors revealing unresolved ambivalences Other chapters focus on how women s economic activity can affect their individual health and potentially that of others A further prominent theme shows how for contemporary women writers serious illnesses such as cancer and madness in women can be seen as rich metaphors for the ills of a male dominated society Duras s alcoholism and Aragon s portrayals of prostitution are also discussed Hervé Guibert Jean Pierre Boulé, 1999-03-01 This is the first full length study to cover the complete texts of Herv Guibert 1955 1991 offering a thorough documentation of his literary output The book is guided by Guibert's relation to the novel a major line of enquiry throughout as well as his experimentation with voices in particular One of Boul s main contentions is that Guibert arrives at the creation of a new literary genre the roman faux with the publication of his best known work To the Friend who did not save my life The book ends by considering the works Guibert produced after he was diagnosed as HIV positive within the parameter of **Angelic Echoes** Ralph William Sarkonak, 2000-01-01 In this study Ralph Sarkonak examines many the voices of the self aspects of Guibert's life and production the connection between his books and his photography his complex relationship with Roland Barthes and with his friend and mentor Michel Foucault **Encyclopedia of Modern French Thought** Christopher John Murray, 2013-01-11 In this wide ranging guide to twentieth century French thought leading scholars offer an authoritative multi disciplinary analysis of one of the most distinctive and influential traditions in modern thought Unlike any other existing work this important work covers not only philosophy but also all the other major disciplines including literary theory sociology linguistics political thought theology and more Literature and Medicine Anna M. Elsner, Monika Pietrzak-Franger, 2024-01-18 The experiences of health and illness death and dying the normal and the pathological have always been an integral part of literary texts This volume considers how the two dynamic fields of medicine and literature have crossed over and how they have developed alongside one another It asks how medicine as both science and practice shapes the representation of illness and transforms literary form It considers how literary texts across genres and languages of disease have put forward specific conceptions of medicine and impacted its practice Taking into account the global multilingual and multicultural contexts this volume systematically outlines and addresses this double sidedness of the literature medicine connection Literature and Medicine covers a broad spectrum of conceptual thematic theoretical and

methodological approaches that provide a solid foundation for understanding a vibrant interdisciplinary field
