Court Reporting in Australia first published in 2005 uses the experience of reporters and subeditors to present a practical

view of reporting on the legal system Peter Gregory avoids the rigid fashion in which media law matters are usually described and while he covers such vital areas as defamation and contempt he focuses on the experiences and lessons to be learned from court reporters on the job He highlights the problems and common mistakes likely to land journalists and media organisations in trouble It features information and realistic advice from court reporters working for metropolitan media outlets as well as revealing how they perform their daily tasks for example preparing television news reports when no pictures and no story are available Practical and useful as well as theoretical no one who reports on legal matters can afford to be without this book The Discourse of News Values Monika Bednarek, Helen Caple, 2017 The Discourse of News Values breaks new ground in multimodal news discourse offering the first book length treatment of the discursive analysis of news values and the construction of newsworthiness The book explores how the news is sold made newsworthy to audiences through the semiotic resources of language and image providing a new analytical framework which can be used by other researchers in their own subsequent studies **SMART JOURNALISM** Bissera Zankova, Andrej Šolkay, Iliana Franklin, 2015-05-14 This publication is dedicated to disseminate the findings from our research project focused on the new media literacy for media professionals Reporting on migrants and refugees UNESCO, 2021-06-19 **Quagmires and Quandaries** Ian Richards, 2005 Despite best intentions various codes of ethics and extensive public attention journalists are repeatedly seen to behave in ways that are less than edifying With refreshing candor and scholarly rigor Ian Richards journalist and academic examines the reasons why this particular profession is apparently so ethically challenged *Media and Politics* Bettina Mottura, Letizia Osti, Giorgia Riboni, 2018-04-18 Media and politics have always been mutually influential The media plays an important political role of its own in promoting and discussing policies as well as conveying representations of power and ideology On the other hand media outlets are themselves subject to political forces that have an impact on their editorial line This mutual influence comes to light not only in journalistic practices but also in how news is constructed and conveyed This volume explores the relations between politics and various types of media as expressed in different areas of the world namely Europe Asia the Americas and the Middle East Such a complex landscape calls for a multiplicity of analytical tools and cannot ignore specific socio political geographic linguistic and cultural contexts which may be overlooked when approached from a global perspective In this volume a combination of senior scholars and young experts from a wide range of disciplines such as discourse analysis international relations and cultural studies come together in a conversation which recognizes the media as a global phenomenon without neglecting its local specificities *A Democratic Approach to Religion News* Ahmed Topkev, 2024-03-26 This book introduces the first systematic and unified four dimension democratic approach to newspaper religion reporting It explores the coverage of faith with a particular focus on Christianity and Islam in the British and Turkish national press The results of framing analysis conducted through content analysis of 1 022 news articles reveal that in both countries alongside the contrasting portrayals of the minority religions even the

dominant religions had a disproportioned employment of the four dimensions spiritual world life political and conflict It contributes to scholarship not only empirically but also theoretically and methodologically with its theoretical and methodological contribution surpassing its empirical findings As such it will transcend geographical and temporal boundaries making it appealing and relevant to an international audience of academics professionals and students in the fields of journalism religion democracy media communication society and culture as well as individuals from various backgrounds

News Values from an Audience Perspective Martina Temmerman,Jelle Mast,2020-12-11 This book focuses on journalistic news values from an audience perspective The audience influences what is deemed newsworthy by journalists not only because journalists tell their stories with a specific audience in mind but increasingly because the interaction of the audience with the news can be measured extensively in digital journalism and because members of the audience have a say in which stories will be told The first section considers how thinking about news values has evolved over the last fifty years and puts news values in a broader perspective by looking at news consumers preferences in different countries worldwide The second section analyses audience response explaining how audience appreciation and clicking behaviour informs headline choices and is measured by algorithms Section three explores how audiences contribute to the creation of news content and discusses mainstream media s practice of recycling audience contributions on their own social media channels

Introduction to Journalism Gwen Ansell,2005 A guide to assist learners working towards the South African NQF NSB04 national certificate in journalism level five as well as for degree and diploma journalism courses this text is equally useful for media trainers and as a self study manual

International News in the Digital Age Judith Clarke,Michael Bromley,2012-01-25 The new research presented in this volume suggests that general perceptions cultural psychological geographical allied to the customs and values of journalism and underpinned by the uses of technology significantly shape international news This gives rise to a blend of the

old and the new traditions of cultural centredness and innovative practices anchorages of place and the rootlessness of globalization Technology per se has not swept all before it On the other hand its uses have altered the means and methods of international news sourcing construction and dissemination Consequently the uptake of technology has contributed to fundamental changes in style and form and has greatly facilitated cross cultural exchanges The category international news is now more of a hybrid as recognized by the BBC and others The chapters in this book demonstrate that this hybridity is unevenly distributed across geo political domains and often across time Nevertheless as the contributors to this volume show the concept of international news relies on tightly interwoven elements of orthodox journalism social media civic expression and public assembly
