Continuing Bonds Dennis Klass,Phyllis R. Silverman,Steven Nickman,2014-05-12 First published in 1996 This new book gives voice to an emerging consensus among bereavement scholars that our understanding of the grief process needs to be expanded The dominant 20th century model holds that the function of grief and mourning is to cut bonds with the deceased thereby freeing the survivor to reinvest in new relationships in the present Pathological grief has been defined in terms of holding on to the deceased Close examination reveals that this model is based more on the cultural values of modernity than on any substantial data of what people actually do Presenting data from several populations 22 authors among the most respected in their fields demonstrate that the health resolution of grief enables one to maintain a continuing bond with the deceased Despite cultural disapproval and lack of validation by professionals survivors find places for the dead in their on going lives and even in their communities Such bonds are not denial the deceased can provide resources for enriched functioning in the present Chapters examine widows and widowers bereaved children parents and siblings and a population previously excluded from bereavement research adoptees and their birth parents Bereavement in Japanese culture is also discussed as are meanings and implications of this new model of grief Opening new areas of research and scholarly dialogue this work provides the basis for significant developments in clinical practice in the field

Handbook of Adolescent Death and Bereavement David E. Balk, PhD,2004-01-01 In this comprehensive handbook Charles Corr and David Balk improve our understanding of the challenges faced by adolescents when coping with death dying and bereavement The volume is organized into three parts Part I addresses specific issues involved in confrontations with death Part II focuses on the role of bereavement Part III explains specific therapeutic interventions for caregivers The authors introduce us to adolescence as a special time in the human life cycle a period quite separate from childhood and adulthood They establish normative adolescents and explain developmental tasks that are typical of early middle and late adolescence

A New Lens on Emerging Adulthood Shmuel Shulman,2023-11-03 In recent years fewer young people make a smooth and linear transition to adulthood The age of marriage has increased and the lives

of many young people are characterized by instabilities in both their careers and their romantic lives. These changes have been conceptualized as an extension of adolescence with some arguing that this reflects the increased narcissism and self-absorption of Generation me. However, when approaching the age of 30, the vast majority of young people are likely to have settled down. More than eighty percent have started a career or have a steady job (OECD 2022) and more than two thirds are married or involved in a stable and intimate romantic relationship (U.S. Census Bureau 2021).

Adolescents, Families, and Social Development Judith G. Smetana, 2010-11-04. This book provides an in depth examination of adolescents' social development in the context of the family. Grounded in social domain theory, the book draws on the author's research over the past 25 years. Draws from the results of in depth interviews with more than 700 families. Explores adolescent parent relationships among ethnic majority and minority youth in the United States as well as research with adolescents in Hong Kong and China. Discusses extensive research on disclosure and secrecy during adolescence, parenting autonomy and moral development. Considers both popular sources such as movies and public surveys as well as scholarly sources drawn from anthropology, history, sociology, social psychology and developmental psychology. Explores how different strands of development including autonomy, rights and justice and society and social convention become integrated and coordinated in adolescence.
