Research Handbook on Intellectual Property Exhaustion and Parallel Imports Irene Calboli,Edward

Lee,2016-06-24 From the Americas to the European Union Asia Pacific and Africa countries around the world are facing increased pressure to clarify the application of intellectual property exhaustion This wide ranging Research Handbook explores the questions that pose themselves as a result Should exhaustion apply at the national regional or international level Should parallel imports be considered lawful imports Should copyright patent and trademark laws follow the same regime

Should countries attempt to harmonize their approaches To what extent should living matters and self replicating technologies be subject to the principle of exhaustion To what extent have the rise of digital goods and the Internet of things redefined the concept of exhaustion in cyberspace The Handbook offers insights to the challenges surrounding these questions and highlights how one answer does not fit all The Oxford Handbook of International Trade Law Daniel L. Bethlehem, 2009 Over the past 10 years the content and application of international trade law has grown dramatically The WTO created a binding dispute settlement process and in resolving disputes the judicial organs of the WTO have built up a substantial amount of new international trade law Emerging from this new WTO process is an international trade law system that is in some respects self contained and in other respects overlapping and linked to other international legal economic and political regimes The boundaries of trade law are now generating enormous interest and controversy which at a broader level is subsumed within the debate over globalization The detailed development of the rules of international trade is being examined with increasing frequency by scholars government officials and trade law practitioners But how does it fit with existing systems How it is modified by them How does the international trade law system affect and modify other regimes This Handbook places international trade law within its broader context providing comment and critique on contemporary thinking on a range of questions both related specifically to the discipline of international trade law itself and to the outside face of international trade law and its intersection with States and other aspects of the international system It examines the economic and institutional context of the world trading system its substantive law including regional trade regimes and the settlement of disputes The final part of the book explores the wider framework of the world trading system considering issues including the relationship of the WTO to civil society the use of economic sanctions state responsibility and the regulation of multinational corporations **Research Handbook in International Economic Law** Andrew T.
