strategic thinker Karl von Clausewitz to provide the first three principles 1 concentrate on the most important goal 2 commit sufficient resources up front to ENSURE success and 3 continue to focus on the goal until success is achieved To these three the author Peter von Braun adds the fourth imperative bring your key people together in the process of creating a business plan that will be understood committed to and most importantly acted upon That's not to say the strategy should be a big group think exercise The key is to follow a disciplined and scientific process that can cut through the unimportant information and focus on the meat of the opportunity The author guides the reader through the step by step process of identifying the core issues and developing THE winning strategy using the first round strategic framework created during a real world case study Creating a strategic plan is hard work but by following the principles put forth in this book effectively and thoroughly success is far more likely This is a terrific book for business owners and executives division managers strategic planners young executives interested in finding tools to further their careers students and those interested in strategy
