Software Quality - ECSQ 2002 Jyrki Kontio, Reidar Conradi, 2003-08-01 Software professionals and companies live in a new world today Increasingly complex systems need to be built faster and cheaper While many of the established approaches in software quality are still valid the software quality community is going through a paradigm shift that requires a reassessment of our current method and tool portfolio as well as creating new and more effective solutions We have selected two themes for this conference to highlight this paradigm shift Our first theme production of attractive and reliable software at Internet speed sums up the dilemma many software organisations face In order to be competitive software should contain advanced features and run reliably yet it should be developed quickly and cost effectively for the right market window Finding the right balance between these objectives is a critical question that will determine business success in the years to come Our second theme production of software with a dynamic partnership in work highlights the current trend of using partnerships and subcontractors as integral players in the

software development process Partnerships sometimes need to be created quickly to respond to a market opportunity yet the costs and speed of cooperation must be competitive Different companies have different processes quality tools and cultures yet they should cooperate seamlessly for the best result Ensuring Quality in Work-Based Learning ,2022-09-05 The handbook is published by the WBL Q project which is co funded by the Erasmus Programme of the European Commission It offers practical strategies to implement quality assurance measures in work based learning processes on company and business level *Higher Education Ensuring Quality Digital Higher Education in Hungary* OECD,2023-03-29 The emergence of fully online hybrid and blended forms of higher education has led governments quality assurance agencies and higher education institutions HEIs across the OECD to reflect on how to ensure that digital education provides learners with opportunities to reach learning and employment outcomes similar to those achieved through traditional in person instruction Building on stakeholder engagement and comparative analysis this report offers an assessment of Hungary s quality assurance system for higher education and more specifically its strengths and weaknesses for assuring the quality of digital higher education

Building Cross-Cultural Competence Charles M. Hampden-Turner,Fons Trompenaars,2008-10-01 Cross cultural competence is a skill that has become increasingly essential for the managers in multinational companies For other business people this kind of competence may spell the difference between surviving and perishing in the new global economy This book focuses on the dilemmas of these managers and offers constructive advice on dealing with culture shock and turning it to business advantage Opposing values can be understood as complementary and reconcilable say Charles Hampden Turner and Fons Trompenaars A manager who concentrates on integrating rather than polarizing values will make much better business decisions Furthermore the authors show wealth is actually created by reconciling values in conflict Based on fourteen years of research involving nearly 50 000 managerial respondents and on the authors extensive experience in international business the book compares American cultural values to those of more than forty other nations It explores six culture defining dimensions and their reverse images universalism particularism individualism communitarianism specificity diffusion achieved status ascribed status inner direction outer direction and sequential time synchronous time and discusses them as alternative ways of coping with life s and business s exigencies With humor cartoons and an array of business examples the authors demonstrate how the reconciliation of cultural differences can cause whole organizations to grow healthier wealthier and wiser

Quality Assurance in Higher Education Stamelos Georgios,K.M. Joshi,Saeed Paivandi,2017-01-30 The significant growth of number of students enrolled in tertiary education institutions in the recent past decades has caused an unprecedented expansion of higher education systems The rapid and constant social economic and technological mutations and international competition make the importance of qualitatively well educated citizenry and labor forces very decisive Globalization has developed a powerful impact on the development of higher education and imposes new challenges for the organization standards financing regulations Systems of higher education tend to detach

from the national models and adopt a more global orientation The implementation of quality assurance is one of the recent and most decisive transformations of higher education Different higher education systems are trying to develop assessment tools internal and external to improve the quality of teaching research and extension activities and these are either based on experiences of selected countries or are extensively country specific The quality assurance procedures that were often dependent on national directorial traditions have gradually tended to converge and led to a setup of common tools and standards Countries under a centralized system tend to impose a uniform and general model while decentralized systems give greater freedom to universities to set up their own quality International rankings of universities also contribute to impose a set of transnational standards and values which is also being considered as indicative by the stakeholders The present book tries to look at the quality assurance mechanism international rankings and its impact in both absolute and comparative fashion in context of 11 countries from different parts of the world
