ZUM '98: The Z Formal Specification Notation Jonathan P. Bowen, Andreas Fett, Michael G. Hinchey, 1998-09-16 1 In a number of recent presentations most notably at FME 96 one of the foremost scientists in the field of formal methods C A R Hoare has highlighted the fact that formal methods are not the only technique for producing reliable software This seems to have caused some controversy not least amongst formal methods practitioners How can one of the founding fathers of formal methods seemingly denounce the field of research after over a quarter of a century of support This is a question that has been posed recently by some formal methods skeptics However Prof Hoare has not abandoned formal methods He is reiterating 2 albeit more radically his 1987 view that more than one tool and notation will be required in the practical industrial development of large scale complex computer systems and not all of these tools and notations will be or even need be formal in nature Formal methods are not a solution but rather one of a selection of techniques that have proven to be useful in the development of reliable complex systems and to result in hardware and software systems that can be produced on time and within a budget while satisfying the stated requirements After almost three decades the time has come to view formal methods in the context of overall industrial scale system development and their relationship to other techniques and methods We should no longer consider the issue of whether we are pro formal or anti formal but rather the degree of formality if any that we need to support in system development This is a goal of ZUM 98 the 11th International Conference of Z Users held for the first time within continental Europe in the city of Berlin Germany *Australian Software Engineering Conference (ASWEC '97)*, 1997 **1998 Asia Pacific Software Engineering Conference**, 1998 Partial Contents Architecture Framework Formal Methods Metrics Software Design Methodology Validation UML Software Development Environment Object Oriented Techniques Distributed User Interface **Index to IEEE Publications** Institute of Electrical and Electronics Engineers, 1997 **Designing Software-Intensive Systems: Methods and Principles** Tiako, Pierre F., 2008-07-31 This book addresses the complex issues associated with software engineering environment capabilities for designing real time embedded software systems Provided by publisher **Proceedings**, 2003 **Index of Conference Proceedings** British Library. Document Supply Centre, 1997 Software Configuration Management Reidar Conradi, 1997-05-05 This book constitutes the refereed proceedings of the Seventh International Workshop on Software Configuration Management SCM 7 held in conjunction with the 1997 IEEE CS International Conference on Software Engineering ICSE 97 in Boston MA USA in May 1997 The book presents 16 revised full papers selected from a total of 49 submissions The papers are organized in sections on versioning models reuse and system models process aspects distributed SCM SCM on the Web and industrial experience This book competently reports the state of the art in software configuration management **On the Move to Meaningful Internet Systems 2004: CoopIS, DOA, and ODBASE** Zahir Tari, 2004-10-11 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and

formula to bring PhD students together and allow them to submit their research proposals for selection. A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience. These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself. In fact, their attendance was largely sponsored by the other participants. If evaluated as successful, it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum. All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications pulled created by the Internet and the so called Semantic Web. For DOA 2004, the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004; it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004, the main topic was the interaction of such technologies and methods with management issues such as occurs in networked organizations. These subject areas naturally overlap and many submissions in fact also treat envisaged mutual impacts among them.

Journal on Data Semantics V Stefano Spaccapietra, Paolo Atzeni, Wesley W. Chu, Tiziana Catarci, Katia P. Sycara, 2006-01-25 The LNCS Journal on Data Semantics is devoted to the presentation of notable work that addresses research and development on issues related to data semantics. Based on the highly visible publication platform Lecture Notes in Computer Science, this new journal is widely disseminated and available worldwide. The scope of the journal ranges from theories supporting the formal definition of semantic content to innovative domain specific applications of semantic knowledge.

Software Process Improvement T. Dingsøyr, 2005-01-11 This was the first year that the European Software Process Improvement Conference EuroSPI had a separate research track with its own proceedings. The EuroSPI conference is in its eleventh year and has become the main meeting place in Europe for the software industry and academia to discuss software process improvement. The conference deals with software process improvement in a broad sense, investigating organizational issues as well as methods and tools for software process improvement. Euro SPI is an initiative financed by a consortium of Nordic research centers and user networks SINTEF DELTA and STTF ASQF, a German quality assurance association and ISCN in Ireland, the coordinating network partner. The research papers describe innovative and significant work in software process improvement which is relevant to the software

industry The papers are readable for a scientific and industrial audience and support claims with appropriately described evidence or references to relevant literature Thirty one papers were submitted in this year's research track and each paper was sent to three or four members of the program committee or additional reviewers Papers were evaluated according to originality significance of the contribution quality of the written and graphical presentation research method applied and appropriateness of comparison to relevant research and literature Almost 100 reviews were received and 18 papers were selected for presentation in the research track giving a rejection rate of 42% Many high quality submissions had to be rejected because of limited space in the conference program The selected papers cover a wide area in software process improvement from proving agile development methods techniques for software process improvement and knowledge management in software companies to effort estimation and global software development

Integrated Formal Methods Eerke Boiten, John Derrick, Graeme Smith, 2004-03-05 The fourth conference in the series of international meetings on Integrated Formal Methods IFM was held in Canterbury UK 4-7 April 2004 The conference was organized by the Computing Laboratory at the University of Kent whose main campus is just outside the ancient town of Canterbury part of the county of Kent Kent is situated in the southeast of England and the university sits on a hill overlooking the city of Canterbury and its world renowned cathedral The University of Kent was granted its Royal Charter in 1965 Today there are almost 10 000 full time and part time students with over 110 nationalities represented The IFM meetings have proven to be particularly successful The first meeting was held in York in 1999 and subsequently we held events in Germany in 2000 and then Finland in 2002 The conferences are held every 18 months or so and attract a wide range of participants from Europe the Americas Asia and Australia The conference is now firmly part of the formal methods conference calendar The conference has also evolved in terms of themes and subjects presented and this year in line with the subject as a whole we saw more work on verification as some of the challenges in this subject are being met The work reported at IFM conferences can be seen as part of the attempt to manage complexity by combining paradigms of specification and design so that the most appropriate design tools are used at different points in the life cycle
