19th International Conference On Software Maintenance:

   Proceedings of the 19th International Conference on Computing and Information Technology (IC2IT 2023) Phayung Meesad,Sunantha Sodsee,Watchareewan Jitsakul,Sakchai Tangwannawit,2023-05-23 This book gathers the high quality papers presented at the 19th International Conference on Computing and Information Technology IC2IT2023 held on May 18 19 2023 in Bangkok Thailand The book presents an original research work for both academic and industry domains which is aiming to show valuable knowledge skills and experiences in the field of computing and information technology The topics covered in the book include natural language processing image processing intelligent systems and algorithms as well as machine learning These lead to the major research directions for innovating computational methods and applications of information technology   *IEEE International Conference on Software Maintenance--1999* ,1999 Annotation Proceedings of the August 1999 conference on software maintenance Sixty one contributions discuss reverse engineering tools migration visualization and understanding architectures and frameworks management testing object oriented technology reuse and validation models and processes processes and technology measurement and improvement architecture software change and impact analysis software maintenance the future and on the threshold of Y2K Lacks a subject index Annotation copyrighted by Book News Inc Portland OR   *Advances in Software Maintenance Management: Technologies and Solutions* Piattini, Mario,Polo, Macario,Ruiz, Francisco,2002-07-01 Advances in Software Maintenance Management Technologies and Solutions is a compilation of chapters from some of the best researchers and practitioners in the area of software maintenance The chapters in this book are intended to be useful to a wide audience where software maintenance is a mandatory matter for study   **Generative and Transformational Techniques in Software Engineering IV** Ralf Lämmel,João Saraiva,Joost Visser,2013-01-03 This tutorial volume includes revised and extended lecture notes of six long tutorials five short tutorials and one peer reviewed participant contribution held at the 4th International Summer School on Generative and Transformational Techniques in Software Engineering GTTSE 2011 The school presents the state of the art in software language engineering and generative and transformational techniques in software engineering with coverage of foundations methods tools and case studies   **The Past and Future of Information Systems: 1976 -2006 and Beyond** David Avison,Steve Elliot,John Krogstie,Jan Pries-Heje,2006-11-30 The International Federation for Information Processing IFIP is a non profit umbrella organization for national societies working in the field of information processing It was founded in 1960 under the auspices of UNESCO It is organized into several technical committees This book represents the proceedings of the 2006 conference of technical committee 8 TC8 which covers the field of information systems This conference formed part of IFIP s World Computer Congress in Chile The occasion celebrated the 30th anniversary of IFIP TC8 by looking at the past present and future of information systems The proceedings reflect not only the breadth and depth of the work of TC8 but also the international nature of the group with authors from 18 countries being represented in the 21 papers including two invited

papers and 2 panels All submissions were rigorously refereed by at least two reviewers and an associate editor and following the review and resubmission process nearly 50% of submissions were accepted This paper introduces the papers and panels presented at the conference and published in this volume It is never straightforward to classify a set of papers but we have made an attempt and this classification is also reflected in the sessions of the conference itself The classification for the papers is as follows the world of information systems early pioneers developing improved information systems information systems in their domains of application the discipline of information systems issues of production IT impacts on the organization tools and modeling and new directions **ICIME 2013 Proceedings of the 4th International Conference on IS Management and Evaluation** Dr Nelson Leung,Dr Mathews Nkhoma,Dr Blooma John,2013-05-13 **Advances in Software Engineering** Hakan Erdogmus,Oryal Tanir,2013-03-20 Software engineering is a rapidly growing and changing field Over the last dec ade it has gained significant popularity and it is now heralded as a discipline of its own This edited collection presents recent advances in software engineering in the areas of evolution comprehension and evaluation The theme of the book addresses the increasing need to understand and assess software systems in order to measure their quality maintain them adapt them to changing requirements and technology and migrate them to new platforms This need can be satisfied by studying how software systems are built and maintained by finding new paradigms and by building new tools to support the activities involved in devel oping contemporary software systems The contributions to the book are from major results and findings of leading researchers under the mandate of the Consortium for Software Engineering Re search CSER CSER has been in existence since 1996 The five founding in dustrial and academic partners wanted to create a research environment that would appeal to the applied nature of the industrial partners as well as to ad vance the state of the art and develop fresh expertise The research projects of the Consortium are partially funded by the industrial partners and partially by the Natural Sciences and Engineering Research Council of Canada Technical and administrative management of the Consortium is provided by the National Research Council of Canada specifically by members of the Software Engi neering Group ofthe Institute for Information Technology *Computer Performance Engineering* András Horváth,Katinka Wolter,2014-09-01 This book constitutes the proceedings of the 11th European Workshop on Performance Engineering EPEW 2014 held in Florence Italy in September 2014 The 18 full papers presented in this volume were carefully reviewed and selected from 30 submissions The papers are organized in topical sections named cloud performance modelling queueing and fluid models performance of computation and programming fitting urban traffic modelling decision making and Markovian models above and beyond *ICT Analysis and Applications* Simon Fong,Nilanjan Dey,Amit Joshi,2025-03-26 This book proposes new technologies and discusses future solutions for ICT design infrastructures as reflected in high quality papers presented at the 8th International Conference on ICT for Sustainable Development ICT4SD 2024 held in Goa India on 8 9 August 2024 The book covers the topics such as big data and data mining data fusion IoT programming toolkits and

frameworks green communication systems and network use of ICT in smart cities sensor networks and embedded system network and information security wireless and optical networks security trust and privacy routing and control protocols cognitive radio and networks and natural language processing Bringing together experts from different countries the book explores a range of central issues from an international perspective   UML 2 Semantics and Applications Kevin Lano,2009-10-13 A coherent and integrated account of the leading UML 2 semantics work and the practical applications of UML semantics development With contributions from leading experts in the field the book begins with an introduction to UML and goes on to offer in depth and up to date coverage of The role of semantics Considerations and rationale for a UML system model Definition of the UML system model UML descriptive semantics Axiomatic semantics of UML class diagrams The object constraint language Axiomatic semantics of state machines A coalgebraic semantic framework for reasoning about interaction designs Semantics of activity diagrams Verification of UML models State invariants Model transformation specification and verification Additionally readers are provided with expert guidance on how to resolve semantic problems and a section on applications of UML semantics with model analysis UML 2 Semantics and Applications is an ideal resource for researchers and tool builders working in UML among others It is also an excellent textbook for postgraduate teaching and research   Fundamental Approaches to Software Engineering Jean-Pierre Finance,2004-01-27 ETAPS 99 is the second instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprises ve conferences FOSSACS FASE ESOP CC TACAS four satellite workshops CMCS AS WAGA CoFI seven invited lectures two invited tutorials and six contributed tutorials The events that comprise ETAPS address various aspects of the system velopment process including speci cation design implementation analysis and improvement The languages methodologies and tools which support these tivities are all well within its scope Di erent blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive   **Free/open Source Software Development** Stefan Koch,2005-01-01 Free Open Source Software Development uses a multitude of research approaches to explore free and open source software development processes attributes of their products and the workings within the development communities   Knowledge-Based Processes in Software Development Saeed, Saqib,Alsmadi, Izzat,2013-06-30 Recent growth in knowledge management concepts has played a vital role in the improvement of organizational performance These knowledge management approaches have been influential in achieving the goal of efficient production of software development processes Knowledge Based Processes in Software Development focuses on the inherent issues to help practitioners in gaining understanding of software development processes The best practices highlighted in this publication will be essential to software professionals working in the industry

as well as students and researchers in the domain of software engineering in order to successfully employ knowledge management procedures   *Designing Complex Software Architecture* Lauber, Vincent Georg,   Web Engineering Emilia Mendes,Nile Mosley,2006-03-28 Since its original inception back in 1989 the Web has changed into an environment where Web applications range from small scale information dissemination applications often developed by non IT professionals to large scale commercial enterprise planning and scheduling applications developed by multidisciplinary teams of people with diverse skills and backgrounds and using cutting edge diverse technologies As an engineering discipline Web engineering must provide principles methodologies and frameworks to help Web professionals and researchers develop applications and manage projects effectively Mendes and Mosley have selected experts from numerous areas in Web engineering who contribute chapters where important concepts are presented and then detailed using real industrial case studies After an introduction into the discipline itself and its intricacies the contributions range from Web effort estimation productivity benchmarking and conceptual and model based application development methodologies to other important principles such as usability reliability testing process improvement and quality measurement This is the first book that looks at Web engineering from a measurement perspective The result is a self containing comprehensive overview detailing the role of measurement and metrics within the context of Web engineering This book is ideal for professionals and researchers who want to know how to use sound principles for the effective management of Web projects as well as for courses at an advanced undergraduate or graduate level   *Information Systems Reengineering for Modern Business Systems: ERP, Supply Chain and E-Commerce Management Solutions* Valverde, Raul,Rao Talla, Malleswara,2012-02-29 Businesses must constantly adapt to a dynamically changing environment that requires choosing an adaptive and dynamic information architecture that has the flexibility to support both changes in the business environment and changes in technology In general information systems reengineering has the objective of extracting the contents data structures and flow of data and process contained within existing legacy systems in order to reconstitute them into a new form for subsequent implementation Information Systems Reengineering for Modern Business Systems ERP Supply Chain and E Commerce Management Solutions covers different techniques that could be used in industry in order to reengineer business processes and legacy systems into more flexible systems capable of supporting modern trends such as Enterprise Resource Planning ERP supply chain management systems and e commerce This reference book also covers other issues related to the reengineering of legacy systems which include risk management and obsolescence management of requirements

     Computational Science and Its Applications – ICCSA 2019 Sanjay Misra,Osvaldo Gervasi,Beniamino Murgante,Elena Stankova,Vladimir Korkhov,Carmelo Torre,Ana Maria A.C. Rocha,David Taniar,Bernady O. Apduhan,Eufemia Tarantino,2019-06-28 The six volumes LNCS 11619 11624 constitute the refereed proceedings of the 19th International Conference on Computational Science and Its Applications ICCSA 2019 held in Saint Petersburg Russia in July 2019 The 64

full papers 10 short papers and 259 workshop papers presented were carefully reviewed and selected form numerous submissions The 64 full papers are organized in the following five general tracks computational methods algorithms and scientific applications high performance computing and networks geometric modeling graphics and visualization advanced and emerging applications and information systems and technologies The 259 workshop papers were presented at 33 workshops in various areas of computational sciences ranging from computational science technologies to specific areas of computational sciences such as software engineering security artificial intelligence and blockchain technologies

Evolutionary Multi-Criterion Optimization Hisao Ishibuchi,Qingfu Zhang,Ran Cheng,Ke Li,Hui Li,Handing Wang,Aimin Zhou,2021-03-24 This book constitutes the refereed proceedings of the 11th International Conference on Evolutionary Multi Criterion Optimization EMO 2021 held in Shenzhen China in March 2021 The 47 full papers and 14 short papers were carefully reviewed and selected from 120 submissions The papers are divided into the following topical sections theory algorithms dynamic multi objective optimization constrained multi objective optimization multi modal optimization many objective optimization performance evaluations and empirical studies EMO and machine learning surrogate modeling and expensive optimization MCDM and interactive EMO and applications *Collaborative Decision Making* Pascale Zaraté,2008 This publication presents the latest innovations and achievements of academic communities on Decision Support Systems DSS These advances include theory systems computer aided methods algorithms techniques and applications related to supporting decision making The aim is to develop approaches for applying information systems technology to increase the effectiveness of decision making in situations where the computer system can support and enhance human judgements in the performance of tasks that have elements which cannot be specified in advance Also it is intended to improve ways of synthesizing and applying relevant work from resource disciplines to practical implementation of systems that enhance decision support capability The resource disciplines include information technology artificial intelligence cognitive psychology decision theory organizational theory operations research and modeling Researchers come from the Operational Research area but also from Decision Theory Multicriteria Decision Making methodologies Fuzzy sets and modeling tools Based on the introduction of Information and Communication Technologies in organizations the decisional process is evolving from a mono actor to a multi actor situation in which cooperation is a way to make the decision

Handbook of Software Engineering Sungdeok Cha,Richard N. Taylor,Kyochul Kang,2019-02-11 This handbook provides a unique and in depth survey of the current state of the art in software engineering covering its major topics the conceptual genealogy of each subfield and discussing future research directions Subjects include foundational areas of software engineering e g software processes requirements engineering software architecture software testing formal methods software maintenance as well as emerging areas e g self adaptive systems software engineering in the cloud coordination technology Each chapter includes an introduction to central concepts and principles a guided tour of seminal

papers and key contributions and promising future research directions The authors of the individual chapters are all acknowledged experts in their field and include many who have pioneered the techniques and technologies discussed Readers will find an authoritative and concise review of each subject and will also learn how software engineering technologies have evolved and are likely to develop in the years to come This book will be especially useful for researchers who are new to software engineering and for practitioners seeking to enhance their skills and knowledge
