View-Dependent Character Animation Parag Chaudhuri,Prem Kalra,Subhashis Banerjee,2007-09-24 Computer generated 3D animation has matured over the years into a complex art form Coordinating and presenting the character s movement in three dimensions to convey a specific idea to the audience requires artistic and technical skills and often a labourious iterative trial and error process to get it right Creating moving camera character animations in 3D is a multi faceted computer graphics and computer vision problem Warranting a formal representation of the moving camera and efficient algorithms to help author the multitude of character poses required for the animation It is also necessary to deal with issues pertaining to camera and character pose interpolation and visualization of the association between the two The

solution to this problem has to be efficient and elegant from the perspective of a computer scientist and make sense and be intuitive to use This well researched book contains a large number of example animations to explain and illustrate this versatile technique
