Knowledge Management and Business Model Innovation Yogesh Malhotra, 2001-01-01. We are living in interesting times characterized by increasing digitalization of business enterprises in a global interconnected knowledge economy. With waning euphoria about the first wave of digital e-business enterprises and a sobering dot-com stock market, business model innovation is being recognized as the key enabler that can unleash value creation for new digital enterprises. In contrast to traditional factors of production, knowledge assets and intellectual capital are expected to play a dominant role in determining both valuation and value creation capabilities of most new age enterprises. Not surprisingly, *Knowledge Management for Business Model Innovation* is anticipated to be the mantra for survival, competence and success of Net enterprises as well as traditional brick and mortar enterprises faced with the challenge of transforming their business models into and beyond click and mortar companies.
