Ruth Elder, Katie Evans, Debra Nizette

Alternatives To Tranquillisers:

Treating Drug Abusers G Bennett, 2004-01-14 *Treating Drug Abusers* provides a clear practical guide to current approaches in the treatment of drug taking. Written by practitioners for practitioners it takes a psychological perspective to the problem. The authors include detailed case studies of particular treatments focusing on among other things relapse and its prevention, family therapy and the transmission of the HIV virus.

Users and Abusers of Psychiatry Lucy Johnstone, 2000 This new edition is completely revised and updated. It uses the authors' real life examples to argue that the traditional way of treating mental illness can often exacerbate people's problems.

Insanity Robert G. Priest, J. Steinert, 2014-04-23 First Published in 1978 The authors' aim has been to write about the so called major mental illnesses the conditions we know as the psychoses. Now all psychiatric disorders are potentially serious although in fact the great majority never reach a profound degree of pathology. The psychotic illnesses by definition are those which present with many of the most dramatic symptoms seen in psychiatry. Included in their manifestations may be seriously disturbed behaviour, loss of contact with reality, severe delusions and hallucinations, loss of memory and of other intellectual functions and many others. In other words they are the illnesses which to most people represent the concepts of Madness or Insanity. Despite the undoubted advances in our thinking about these disorders we still tend to cross our fingers and hope that they will not happen to us. The fear and the stigma of mental illness is not yet dead.

Escape! Joseph O'Neill, 2011-06-01 Description The book is a complete recovery plan for all those suffering from agoraphobia. It deals with every aspect of the condition and provides clear simple and effective strategies for full recovery. It adopts a holistic approach which ensures improved general health and fitness that form the springboard to recovery. Written in clear jargon free language it explains the condition in layman's terms. It contains guidance on diet, sleep, lifestyle and exercise and explains how these play a vital part in regaining good health. Most important of all are the step by step guidelines for overcoming your fears and living a full life. These enable you to progress at the speed that suits you and to tailor your progress to your needs. It is written by a former agoraphobic who understands the nature of the illness and knows how easy it is to avoid fearful situations and allow the condition to strengthen its grip. The author explains how to confront and overcome these excuses and motivate yourself to full recovery.

About the Author Joseph O'Neill is a freelance author and broadcaster. He has broadcast and published in both Ireland and Britain. He suffered from agoraphobia for almost thirty years and experienced most forms of therapy during that time. His experience of what works and what doesn't forms the basis of this book.

Gendered Moods Elizabeth Ettorre, Elianne Riska, 2012-11-12 Tranquillisers are prescribed to almost twice as many women as men yet very little gender based research has been carried out on the social context of their use Gendered Moods offers the first feminist analysis of the gendered character of psychotropic drug use based on studies of long term psychotropic drug users and the content of drug advertising The authors argue that gender differences in psychotropic drug use are manifestations of the gendered construction of society as a whole and that as a result women are particularly susceptible to being channelled into a state of dependency on prescribed drugs Exploring current social scientific debates relating to drug users and providers Gendered Moods also provides a critical review of previous research It is a much needed introduction to a neglected area of study **Advances in Biochemical Psychopharmacology** Erminio Costa, Paul

present the coordinating functions of the Association and on the other to open a broad platform for a free exchange of views Thus the VII World Congress of Psychiatry held in Vienna from July 11 to 16 1983 was composed of two types of scientific events those structured by the Association and those left to the initiative of the participants The first type comprised Plenary Sessions planned by the Scientific Program Committee and Section Symposia organized by the WPA sections the second embraced Free Symposia free papers video sessions and poster presentations prepared by the participants Altogether 10 Plenary Sessions 52 Section Symposia and 105 Free Symposia took place and 78 free papers and poster sessions and 10 video sessions were held
