Almost Everyone's Guide To Science:

Almost Everyone's Guide to Science John Gribbin, Mary Gribbin, 2000-01-01 Discusses the major issues in science including the structure of particles within the atom origins of species and the birth of the universe **Almost Everyone's Guide to Science** John Gribbin, 2015-09-24 John Gribbin is one of the few science writers who is equally comfortable writing about biology as he is about physics and this beginner's guide will take the reader through the basics and the fundamental issues of the crucial areas of modern science from the birth of the universe through to the evolution of our own species the nature of human behaviour and the workings of our minds Crucially the book will not only provide an overview of the central areas in a single volume but will also explain how the areas link up what evolutionary theory has to say about how we think how sub atomic particles came into being in the Big Bang and atoms in stars **Almost Everyone's Guide to Science** John R. Gribbin, 1999 **Almost Everyone's Guide to Science** John Gribbin, 2000-08-01 Gribbin speaks to those who are interested in science but are scared off by the technical detail in a broad picture of scientific achievement at the end of the 20th century **Life, Death, and Subjectivity** Stan van Hooft, 2004 This book presents an exploration of concepts central to health care practice In exploring such concepts as Subjectivity Life Personhood and Death in deep philosophical terms the book aims to draw out the ethical demands that arise when we encounter these phenomena and also the moral resources of health care workers for meeting those demands The series Values in Bioethics makes available original philosophical books in all areas of bioethics including medical and nursing ethics health care ethics research ethics environmental ethics and global bioethics **Deconstructing Health Inequity** Timothy A. Carey, Sara J. Tai, Robert Griffiths, 2021-04-04 This book offers a radically different perspective on the topic of health inequity Carey Tai and Griffiths use Perceptual Control Theory PCT to deconstruct current approaches to understanding investigating and addressing problems of health inequity In the book the authors propose that health inequity is not a problem per se Disrupted control they argue is the problem that needs to be addressed From this perspective research policy and health practices directed at addressing health inequity in isolation will offer only partial solutions to the problems created by disrupted control Addressing problems of disrupted control directly however has the potential to entirely resolve issues that are created by health inequity The authors have extensive clinical and research experience in a wide range of contexts including cross cultural settings rural remote and underserved communities community mental health settings prisons schools and psychiatric wards Drawing on these diverse experiences the authors describe how adopting a Perceptual Control Theory perspective might offer promising new directions for researchers and practitioners who have an interest in addressing issues of inequity and social justice With a Foreword written by Professor Neil Gilbert this book will provide fresh insights for academics practitioners and policymakers in the fields of public health psychology social policy and healthcare **Gaither's Dictionary of Scientific Quotations** Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-05 This unprecedented collection of 27 000 quotations is the most comprehensive

and carefully researched of its kind covering all fields of science and mathematics With this vast compendium you can readily conceptualize and embrace the written images of scientists laymen politicians novelists playwrights and poets about humankind s scientific achievements Approximately 9000 high quality entries have been added to this new edition to provide a rich selection of quotations for the student the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject Gaither s Dictionary of Scientific Quotations Second Edition provides the finest reference source of science quotations for all audiences The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories

The Science of Religion in the Science of Life Dr David Murphy,2023-08-18 This is a work that challenges the modern scientific world view that nothing of any order producing significance created the ordered sum of everything Some however seem to think that when they discover the means by which something came into existence this is one less thing we need God to explain until we get to that point when we can conclude that nothing produced the ordered sum of everything The fact is that for things to be investigated intelligently they first have to be ordered intelligently Moreover a living being needs to be explained in terms of a living life producing cause a cause that can explain all that we predicate of the life defining nature of their existence We can see the origin meaning and purpose of something in that which it has been ordered to be Therefore it must be dangerously naive for scientists to suppose that living beings were ordered intelligently to reason intelligently by means that has nothing to do with intelligence and that there is no fool so foolish as he who thinks they can be wiser than their creator And as we have been created to be moral beings our creator must of logical necessity be a moral being who has the ability create this ineffable life generating effect in us and this in turn reveals something of His purpose in creating us To claim that all that exists has nothing to do with an intelligent and sufficient cause breaks all the laws of logic and takes us into the domain of farce and us as fools and all to avoid that we are answerable our maker who created us moral beings

Science Giants Alan Ticotsky,2006-10 Twenty five activities focus on topics such as classification natural selection cells and DNA plants and the human body 140 pages **The Mother of All Genes** D. Balasubramanian,2001 *The Method of Levels* Timothy A. Carey,2006 Based on Perceptual Control Theory this therapeutic method leaves the patient in control with no interference from the therapist Carey shows how to ask very simple questions about background thoughts to assist a friend in distress **The Beginner's Guide for the Recently Deceased** David Staume,2004 Who isn t curious to know what life is like after we die In this humorous yet thought provoking glimpse into other realms David Staume asks you to open your mind and leave your body behind as he takes you on a tour of the afterlife Find out everything you need to know about the astral realm how to get around what s going on and who and what you might bump into on your travels Explore the big questions regarding the whys and wherefores of existence Is there a hell What about reincarnation Who am I Who is God The Beginners Guide for the Recently Deceased also offers practical tips on how to use your new understanding to make life

better on the physical plane *What Happens When We Die?* Sam Parnia, M.D.,2007-01-01 A critical care doctor interviews hundreds of patients about their near death experiences taking readers on a fascinating tour through human consciousness and demystifying what may await us after death Dr Sam Parnia faces death every day Through his work as a critical care doctor in a hospital emergency room he became very interested in some of his patients accounts of the experiences that they had while clinically dead He started to collect these stories and read all the latest research on the subject and then he conducted his own experiments That work has culminated in this extraordinary book which picks up where Raymond Moody's *Life After Life* left off Written in a scientific balanced and engaging style this is powerful and compelling reading This fascinating and controversial book will change the way you look at death and dying **The Christians' God Does Not Exist! Yes, He/She Does!** Proncell F. Johnson Jr.,2018-02-22 The Christians God Does Not Exist Yes He She Does By Proncell F Johnson Jr Carl Sagan popular astronomer cosmologist astrophysicist and astrobiologist wrote *We are Star Stuff* which has taken its destiny into its own hands The scientific community basically agrees that everything is made of atoms Proncell F Johnson Jr says that they are all wrong Johnson shows that the material universe along with us mortals is one big illusion for all things are actually incorporeal spiritual the manifestation of the spiritual being we Christians have come to call God He says that the realization of and utilization of this fact will enable one to duplicate for himself the so called miracles of Christ Jesus in degrees thus proving the existence of this God and the non existence of matter Johnson's proof is based upon a law of physics that make it all but impossible to refute as the below reviews confirm *Scanning and Sizing the Universe and Everything in It* Harold Toliver,2023-02-03 One of the faults in philosophy generally even the philosophy of science is ignoring the extended scale of the natural continuum and putting in its place something Anthropomorphic This book suggests a means of keeping score that puts common situations places topography and even home ground in the context of that continuum the whole of atomic matter and its history As shown here the discrepancy between normal measurements and what actually exists is similar to that between yardsticks and light years **EBOOK: TEACHING THE PRIMARY CURRICULUM** Jane Johnston,Mark Charter,Derek Bell,2002-01-16 What is good teaching and learning in the primary school How can teachers manage the whole curriculum and still educate the whole child and raise standards How can teachers be in critical dialogue with each other and with the curriculum in their search for improvement What is the role of the teacher in the new primary curriculum This wide ranging book seeks to address these questions and to provide a comprehensive overview of the whole primary curriculum It aims to develop teaching throughout primary education and to support teachers in the effective delivery of the curriculum There is a particular focus on recent changes in primary education The contributors consider how teaching methodologies need to adapt to these changes to meet the needs of children and raise standards in school Throughout the book emphasis is placed on effective teaching and learning methodologies the importance of quality interaction in the classroom the role of the teacher in teaching and learning and the experience of the

child Exemplars of good teaching are provided in each chapter as well as thought provoking ideas for good practice The National Research Council in the Innovation Policy Era G. Bruce Doern, Richard Levesque, Institute of Public Administration of Canada, 2002-01-01 The authors show how the NRC's history is interwoven with the evolution of Canada's economic and industrial development and with the fostering of science at Canada's universities in industry and within the federal government

Nietzsche Was Probably Right: A Postcritical Assessment of the Christian Paradigm and Its Deity Steven Malinak, 2014-07-13 For a variety of reasons recent literature that focuses on the rationality of belief in God and the viability of the Christian worldview fails to stimulate critical thinking in the general population of believers Nietzsche Was Probably Right succeeds where many of these other works miss the mark It educates rather than coerces it focuses on issues critically relevant to the vast majority of Christians most importantly it does not preach to the choir but instead offers a balanced objective comprehensive overview of the issues Its tone and inclusive unbiased approach welcomes nonbelievers and believers into this important conversation offering a perspective that will satisfy anyone seeking a critical understanding of the Christian faith and its deity

The Causal Power of Social Structures Dave Elder-Vass, 2010-06-17 The problem of structure and agency has been the subject of intense debate in the social sciences for over 100 years This book offers a solution Using a critical realist version of the theory of emergence Dave Elder Vass argues that instead of ascribing causal significance to an abstract notion of social structure or a monolithic concept of society we must recognise that it is specific groups of people that have social structural power Some of these groups are entities with emergent causal powers distinct from those of human individuals Yet these powers also depend on the contributions of human individuals and this book examines the mechanisms through which interactions between human individuals generate the causal powers of some types of social structures The Causal Power of Social Structures makes particularly important contributions to the theory of human agency and to our understanding of normative institutions

Energy and the Unexpected Keith James Laidler, 2002 From the steam engine to $E=mc^2$ and beyond the concept of energy offers an essential key to our understanding of the Universe In this entertaining and highly readable book Professor Laidler explains the concept of energy and its characteristics as they have been discovered over the past two centuries Having looked at energy on a small scale and then on the scale of the Universe itself he shows the link with chaos theory according to which the unexpected is inevitable
