Entrepreneurship + Innovation in Egypt Nagla Rizk, Hassan M. E. Azzazy, 2016. Entrepreneurship and innovation have emerged globally as significant drivers for inclusive economic growth, contributing to both job and wealth creation. Especially since Egypt's 2011 revolution, the need has become pressing for novel models that capitalize on the country's human resources. Half of the Egyptian population is less than 25 years old, and almost one quarter is between 18 and 29 years old. More than any other time, an entrepreneurial spirit and innovative mindset need to be fostered and encouraged to best rebuild the country's economy on solid and sustainable foundations. This important book sheds new light on the promise of entrepreneurship and innovation in restructuring Egypt and their potential for promoting economic development. It probes the relationship between innovation and economic growth, providing linkages between academic research and applied industry needs. It also looks at how creativity and innovation can be embedded in the educational system, the challenges facing the entrepreneurial ecosystem, and considers ways to enhance social entrepreneurship. Covering a lot of ground, the authors propose answers and solutions, as well as laying the groundwork for further research and deliberations in this field in general and in Egypt at this juncture of the country's development in particular.

Creativity in Theatre Suzanne Burgoyne, 2018-09-14. People who don't know theatre may think the only creative artist in the field is the playwright, with actors, directors, and designers mere interpreters of the dramatist's vision. Historically, however, creative mastery and power have passed through different hands. Sometimes the playwright did the staging. In other periods, leading actors demanded plays be changed to fatten their roles. The late 19th and 20th centuries saw the rise of the director, in which director and playwright struggled for creative dominance. But no matter where the balance of power rested, good theatre artists of all kinds have created powerful experiences for their audience. The purpose of this volume is to bridge the interdisciplinary abyss between the study of creativity in theatre, drama, and in other fields. Sharing theories, research findings, and pedagogical practices, the authors, and I hope, to stimulate discussion among creativity and theatre scholars, teachers, as well as multidisciplinary research. Theatre educators know from experience that performance classes enhance student creativity. This volume is the first to bring together perspectives from multiple disciplines on how drama pedagogy
