housing needs for a changing population and multi modal transportation planning Unlike competing books it addresses all of these topics in the context of the local comprehensive plan There is a broad audience for this book planning students practicing planners and individual citizens who want to better understand local planning and land use controls Boxes at the end of each chapter explain how professional planners and individual citizens respectively typically engage the issues addressed in the chapter For all readers Community Planning provides a pragmatic view of the comprehensive plan clearly explained by a respected authority *E-Governance, A Global Journey* M. Finger, F.N. Sultana, 2012-09-21 E governance affects every citizen New information and communication technologies ICTs have made public services easier to access and information easier to obtain fines and taxes can be processed more rapidly and votes can be counted faster Channeling the potential of ICTs in the public sector has affected how states and governments at all levels do business It will inevitably shape how they will continue to change in the future This book has grown out of an executive training program leading to an Executive Master s degree in e governance from Switzerland s cole Polytechnique F d rale de Lausanne EPFL Participants in this Master s program came from all over the world from government the private sector and non governmental organizations They were all interested in electronic governance and motivated by the desire to learn from the numerous and varied e governance experiences worldwide The 12 chapters have been written by 10 participants one manager and one professor involved in the program The book is divided into four sections e governance visions local e governance transversal e governance issues and the future of e governance E governance has already led to many significant changes in the way society operates and this book provides some insight into how this has been achieved as well as taking a look at the further developments which may happen in the future The Handbook of Political Behavior Samuel Long, 2013-11-11 In the writing of prefaces for works of this sort most editors report being faced with similar challenges and have much in common in relating how these challenges are met They acknowledge that their paramount ob jective is to provide more than an overview of topics but rather to offer selective critical reviews that will serve to advance theory and research in the particular area reviewed The question of the appropriate audience to be addressed is usually answered by directing material to a potential audience of social scientists graduate students and occasionally ad vanced undergraduate students Editors who are confronted with the problem of structuring their material often explore various means by which their social science discipline might be subdivided then generally conclude that no particular classification strategy is superior In elabo rating on the process by which the enterprise was initiated editors typ ically resort to a panel of luminaries who provide independent support for the idea and then offer both suggestions for topics and the authors who will write them Editors usually concede that chapter topics and content do not reflect their original conception but are a compromise between their wishes and the authors expertise and capabilities Editors report that inevitable delays occur authors drop out of projects and are replaced and new topics are introduced Finally editors frequently con fess that the final product is incomplete with gaps occurring

because of failed commitments by authors or because authors could not be secured to write certain chapters
