Moore,2021-10-25 This is a very personal account of the author s experiences in the field of conservation The book is divided into two distinct but related parts In the first he describes how some 40 years ago he acquired a bare field adjacent to his home in Cambridgeshire and transformed part of it into a private nature reserve with a wood a large pond and rough grassland He details his successes in trying to attract the wildlife which has subsequently colonized it as well as his failures In his words many people wish to encourage wildlife on their land but do not know exactly what to do or what they can expect to achieve In the second part he relates his own local experiences to the wider conservation scene Most people are still unaware of the fundamental importance of wildlife or its connection with our own survival and they are also unaware of the urgency of the measures our generation can and must take He considers how the failures of democratic governments to carry out crucial long term measures might be overcome The author s aims are to encourage farmers and owners of large gardens to create nature reserves by describing the pleasures which flow from such a project as well as to stimulate debate on conservation policy and on the role of governments nationally and internationally in furthering the conservation of our own species as well as that of wildlife currently a red hot topic      **A History of Nature Conservation in Britain** David Evans,2002-11 This 2nd and fully revised edition offers insights into the campaign for countryside access and protection and considers topical concerns afresh It examines unwelcome choices for the future and Britain s role in the global conservation debate      *The Marine World* Frances Dipper,2021-06-08 The Marine World is a book for everyone with an interest in the ocean from the marine biologist or student wanting expert knowledge of a particular group to the naturalist or diver exploring the seashore and beyond With colour illustrations line drawings more than 1 500 colour photographs and with clear accessible text this book encompasses all those organisms that live in on and around the ocean bringing together in a single text everything from the minuscule to the immense It includes sections on all but the most obscure marine groups covering invertebrate phyla from sponges to sea squirts as well as plants fungi bacteria fish reptiles mammals and birds It incorporates information on identification distribution structure biology ecology classification and conservation of each group addressing the questions of what where and how Today global warming overfishing ocean acidification and pollution are just a few of the ever increasing number of threats and challenges faced by ocean life Without knowledge of the animals plants and other organisms that live in the marine world we cannot hope to support or implement successful conservation and management measures nor truly appreciate the incredible wealth and variety of marine life The Marine World is the product of a lifetime spent by Frances Dipper happily observing and studying marine organisms the world over It has been brought to colourful life by a myriad of
