Animals Dont Have Rights:

Animals Don't Have Rights Jack Boulogne, Animal Ethics Bob Fischer, 2021-05-05 There are many introductions to the animal ethics literature There aren't many introductions to the practice of doing animal ethics Bob Fischer's Animal Ethics A Contemporary Introduction fills that gap offering an accessible model of how animal ethics can be done today The book takes up classic issues such as the ethics of eating meat and experimenting on animals but tackles them in an empirically informed and nuanced way It also covers a range of relatively neglected issues in animal ethics such as the possibility of insect sentience and the ethics of dealing with pests Finally the book doesn't assess every current practice using standard ethical theories but tries to evaluate some of them using the moral frameworks endorsed by those involved So for instance there is a chapter on the way that animal care and use committees try to justify some of the educational uses of animals and the chapter on zoos considers the way that international zoological societies justify compromising animal welfare The book wraps up with a discussion of the future of animal ethics Each chapter opens with a helpful initial overview of the chapter and ends with a list of suggested readings to help students go further on their own Key Features Covers animal ethics from an empirically informed perspective bringing philosophy into conversation with key issues in animal science conservation biology economics ethology and legal studies among other fields Provides ample coverage of the most salient current topics including for example Debates about which animals are sentient The suffering of wild animals Research ethics The boundaries of activism Avoids suggesting that animal ethics is simply the practice of applying the right general theory to a problem instead allowing readers to first work out the specific costs and benefits of making ethical decisions Impresses upon the reader the need for her to work out for herself the best way forward with difficult ethical issues suggesting that progress can indeed be made Includes summaries and recommended readings at the end of each chapter **Animal Rights** Patience Coster, 2012-12-15 Millions of species of animals inhabit the planet humans affect all Humans use animals for food entertainment companionship and more Readers explore some of the difficult questions surrounding animal rights History of how the human animal relationship has evolved and what the future might bring is also provided **Animal Rights: A Question of Ethics** David J. Burkart, **Philosophy for A2: Unit 3** Michael Lacewing, 2013-01-11 Philosophy for A2 Unit 3 is the definitive textbook for students of the current AQA Advanced Level syllabus Structured very closely around the AQA specifications for Unit 3 Key Themes in Philosophy it introduces the student to each of the core themes philosophy of mind political philosophy epistemology and metaphysics moral philosophy philosophy of religion All chapters are helpfully subdivided into short digestible passages and include quiz questions to test core knowledge discussion questions to deepen understanding going further sections for advanced study text boxes highlighting key definitions and arguments cross references to help students make connections lively illustrations diagrams and a glossary In addition a chapter on exam preparation contains a wealth of helpful hints and tips on revision and exam techniques Written by an experienced

Contemporary Yugoslav Philosophy: The Analytic Approach A. Pavkovic, 2012-12-06 The aim of this collection is to present the work of Yugoslav philosophers who approach philosophy in an analytic manner I have sought contributions from all philosophers of whom I knew to be working in this tradition Not all sent their contributions but I should say that the majority did As a consequence of so wide an appeal the

papers published here exhibit not only a variety of topics but also differences in quality This I think is to be expected given that the aim is to present the work of a group of philosophers who share only a poorly defined and general approach to philosophy Of many people who have helped me bring out this collection I can mention only a few Jovan Babic gave me as usual sound advice and helped me to establish and maintain contact with the contributors in Yugoslavia Milos Arsenijevic rounded up the recalcitrant contributors and constantly recruited new ones And Svetlana Knjazev encouraged me perhaps unwittingly to persevere by her yarns of the old times in which there was no analytic philosophy in Yugoslavia And Down Under Steve Glaister checked the English Nancy Simmons patiently typed the manuscripts into a rather temperamental word processor Mitjana Djukic proof read them and Dean Davidson of the Macquarie University Computing Centre helped us to get them printed To all of them many thanks

Biomedical Ethics Reviews • 1987 James M. Humber, Robert F. Almeder, 1988-03-31 Biomedical Ethics Reviews 1987 is the fifth volume in a series of texts designed to review and update the literature on issues of central importance in bioethics today Three topics are discussed in the present volume 1 Prescribing Drugs for the Aged and Dying 2 Animals as a Source of Human Transplant Organs and 3 The Nurse's Role Rights and Responsibilities Each topic constitutes a separate section in our text introductory essays briefly summarize the contents of each section Bioethics is by its nature interdisciplinary in character Recognizing this fact the authors represented in the present volume have made every effort to minimize the use of technical jargon At the same time we believe the purpose of providing a review of the recent literature as well as of advancing bioethical discussion is admirably served by the pieces collected herein We look forward to the next volume in our series and very much hope the reader will also

The Moral Rights of Animals Mylan Engel Jr., Gary Lynn Comstock, 2016-03-16 Edited by Mylan Engel Jr and Gary Lynn Comstock this book employs different ethical lenses including classical deontology libertarianism commonsense morality virtue ethics utilitarianism and the capabilities approach to explore the philosophical basis for the strong animal rights view which holds that animals have moral rights equal in strength to the rights of humans while also addressing what are undoubtedly the most serious challenges to the strong animal rights stance including the challenges posed by rights nihilism the kind argument against animal rights the problem of predation and the comparative value of lives In addition contributors explore the practical import of animal rights both from a social policy standpoint and from the standpoint of personal ethical decisions concerning what to eat and whether to hunt animals Unlike other volumes on animal rights which focus primarily on the legal rights of animals and unlike other anthologies on

animal ethics which tend to cover a wide variety of topics but only devote a few articles to each topic this volume focuses exclusively on the question of whether animals have moral rights and the practical import of such rights The Moral Rights of Animals will be an indispensable resource for scholars teachers and students in the fields of animal ethics applied ethics ethical theory and human animal studies as well as animal rights advocates and policy makers interested in improving the treatment of animals

Animal Rights Kevin Hile,2009 From questions over whether it is appropriate to eat meat or to wear fur or leather this title examines all sides of this very controversial issue

The ^AMonkey Wars Deborah Blum,1995-12-14 The controversy over the use of primates in research admits of no easy answers We have all benefited from the medical discoveries of primate research vaccines for polio rubella and hepatitis B are just a few But we have also learned more in recent years about how intelligent apes and monkeys really are they can speak to us with sign language they can even play video games and are as obsessed with the games as any human teenager And activists have also uncovered widespread and unnecessarily callous treatment of animals by researchers in 1982 a Silver Spring lab was charged with 17 counts of animal cruelty It is a complex issue made more difficult by the combative stance of both researchers and animal activists In The Monkey Wars Deborah Blum gives a human face to this often caustic debate and an all but human face to the subjects of the struggle the chimpanzees and monkeys themselves Blum criss crosses America to show us first hand the issues and personalities involved She offers a wide ranging informative look at animal rights activists now numbering some twelve million from the moderate Animal Welfare

Institute to the highly radical Animal Liberation Front a group destructive enough to be placed on the FBI's terrorist list And she interviews a wide variety of researchers many forced to conduct their work protected by barbed wire and alarm systems men and women for whom death threats and hate mail are common She takes us to Roger Fouts's research center in Ellensburg Washington where we meet five chimpanzees trained in human sign language and we visit LEMSIP a research facility in New York State that has no barbed wire no alarms and no protesters chanting outside because its director Jan Moor Jankowski listens to activists with respect and treats his animals humanely And along the way Blum offers us insights into the many side issues involved the intense battle to win over school kids fought by both sides and the danger of transplanting animal organs into humans As it stands now Blum concludes the research community and its activist critics are like two different nations nations locked in a long bitter seemingly intractable political standoff But if you listen hard there really are people on both sides willing to accept and work within the complex middle When they can be freely heard then we will have progressed to another place beyond this time of hostilities In *The Monkey Wars* Deborah Blum gives these people their voice
