Century Gary Westfahl, 2013-07-30 This book gathers together many of the illuminating essays on science fiction and fantasy film penned by a major critic in the SF field The pieces are roughly organized in the chronological order of when the movies and television programs being discussed first appeared with essays providing more general overviews clustered near the beginning and end of the volume to provide the overall aura of a historical survey Although this book does not pretend to provide a comprehensive history of science fiction and fantasy films it does intermingle analyses of films and TV programs with some discussions of related plays novels stories and comic books particularly in the essays on This Island Earth and 2001 A Space Odyssey and its sequels Inciteful entertaining and full of intelligent and witty observations about science fiction and its sometimes curious relationship with the visual media these essays will both delight and entertain critics fans and viewers alike

Understanding Contemporary American Science Fiction Darren Harris-Fain, 2005 Understanding Contemporary American Science Fiction The Age of Maturity 1970 2000 explores the major trends and developments during three decades that witnessed science fiction s most dramatic progression from subliterate escapist entertainment to a more sophisticated literature of ideas Darren Harris Fain suggests that to understand American science fiction fully it is essential to realize that the current field with all its variety results from the proceeding decades of writings In addition he contends that although much science fiction of merit was written in America prior to 1970 the latter decades of the twentieth century

witnessed a dramatic improvement in quality even as the field fragmented into a variety of subgenres and as writers sought to transcend earlier critical dismissals Harris Fain discusses significant and representative works most of which mainstream literary scholars and critics ignore as he charts the historical and literary development of contemporary American science fiction the internal divisions along both literary and political lines experienced during the Vietnam era the influence of the feminist movement and other contemporary concerns the increasing contributions of female African American and gay and lesbian writers and the emergence of such significant trends as hard science fiction cyberpunk alternate history and shared world stories Harris Fain also considers literary science fiction's relationship to the mass media the effects the popularity of fantasy has on the field and academia's continued mispricing of the genre [The Emergent Self](#) William Hasker, 2015-12-18

In *The Emergent Self* William Hasker joins one of the most heated debates in analytic philosophy that over the nature of mind His provocative and clearly written book challenges physicalist views of human mental functioning and advances the concept of mind as an emergent individual Hasker begins by mounting a compelling critique of the dominant paradigm in philosophy of mind showing that contemporary forms of materialism are seriously deficient in confronting crucial aspects of experience He further holds that popular attempts to explain the workings of mind in terms of mechanistic physics cannot succeed He then criticizes the two versions of substance dualism most widely accepted today Cartesian and Thomistic and presents his own theory of emergent dualism Unlike traditional substance dualisms Hasker's theory recognizes the critical role of the brain and nervous system for mental processes It also avoids the mechanistic reductionism characteristic of recent materialism Hasker concludes by addressing the topic of survival following bodily death After demonstrating the failure of materialist views to offer a plausible and coherent account of that possibility he considers the implications of emergentism for notions of resurrection and the afterlife

Science Fiction and the Prediction of the Future Gary Westfahl, Wong Kin Yuen, 2014-01-10 Science fiction has always challenged readers with depictions of the future Can the genre actually provide glimpses of the world of tomorrow This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature Among the texts and topics examined are classic stories by Murray Leinster C L Moore and Cordwainer Smith 2001 *A Space Odyssey* and its sequels Japanese anime and Hong Kong cinema and electronic fiction **Frederik Pohl** Michael R Page, 2015-09-30 One of science fiction's undisputed grandmasters Frederik Pohl built an astonishing career that spanned more than seven decades Along the way he won millions of readers and seemingly as many awards while producing novels short stories and essays that left a profound mark on the genre In this first of its kind study Michael R Page traces Pohl's journey as an author but also uncovers his role as a transformative figure who shaped the genre as a literary agent book editor and in Gardner Dozois words quite probably the best SF magazine editor who ever lived [How to Live Forever](#) Stephen R L Clark, 2008-01-28 Immortality is a subject which has long been explored and imagined by science fiction writers

In his intriguing new study Stephen R L Clark argues that the genre of science fiction writing allows investigation of philosophical questions about immortality without the constraints of academic philosophy He reveals how fantasy accounts of issues such as resurrection disembodied survival reincarnation and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth How to Live Forever is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work It includes extensive suggestions for further reading both fictional and philosophical and examines the work of such major science fiction authors as Arthur C Clarke Frank Herbert Larry Niven William Gibson and Colin Wilson
