*Foreign Investment, International Law and Common Concerns* Tullio Treves, Francesco Seatzu, Seline Trevisanut, 2013-10-23. Increasingly transnational corporations developed countries and private actors are broadening the boundaries of their investments into new territories in search of a higher return on capital. This growth in direct foreign investment involves serious concerns for both the investor and host state. Various exponents of international civil society and non-governmental organisations persuasively claim that such growth in foreign investments constitutes potential and serious hazards both to the environment and the fundamental rights and freedoms of local populations. This book explores from an international law perspective the complex relationship between foreign investments and common concerns, i.e. values that do not coincide or do not necessarily coincide with the interests of the investor and of the host state. It pays particular attention to the role of the main international development banks in reconciling the needs of foreign investors with the protection of common concerns such as the environment, human rights and labour rights. Among its collection of essays, the volume asks how much regulatory space investment law leaves, whether international investment law is an effective means of balancing contrasting interests and whether investment arbitration currently constitutes a mechanism of global governance. In collecting the outlooks of various experts in human rights, environmental and international economic law, this book breaks new ground in exploring how attention to its legal aspects may help in navigating the relationship between foreign investment and common concerns. In doing so, the book provides valuable insights into the substantive issues and institutional aspects of international investment law.

Interactions between Regional and Universal Organizations Laurence Boisson de Chazournes, 2016-11-01. Cooperation through international organizations is fundamental to the international legal order. International organizations are nowadays ubiquitous and come in many different manifestations, each allowing for different levels of international cooperation. The profile of regional and universal organizations may vary greatly from one organization to another. At the same time, they do not live apart and this has led to the creation of a complex network of relationships. These relationships have seldom been the object of scholarship.

and this book seeks to address that gap In general the relationships between international organizations can give rise to such issues as the conditions placed upon one organization by another demarcations of competence membership of other organizations and various forms of collaboration involving the conclusion of agreements between organizations Optimal coexistence cooperation and coherence all play a role in optimizing the relations between international organizations The volume concludes by analysing current challenges including those of legal identity responsibility and accountability as well as making proposals for reform such as through the development of a common law between organizations

*Joint Development of Hydrocarbon Deposits in the Law of the Sea* Vasco Becker-Weinberg, 2014-08-05. This book examines the concept and purpose of joint development agreements of offshore hydrocarbon deposits from the perspective of public international law and the law of the sea, taking into consideration and extensively reviewing State practice concerning seabed activities in disputed maritime areas and when hydrocarbon deposits extend across maritime boundaries. It distinguishes between agreements signed before and after the delimitation of maritime boundaries and analyzes the relevance of natural resources or unitization clauses included in maritime delimitation agreements. It also takes into consideration the relation between these resources and maritime delimitation and analyzes all the relevant international jurisprudence. Another innovative aspect of this book is that it examines the possibility of joint development of resources that lay between the continental shelf and the Area, considering both theoretical and practical problems. As such, the book is a useful tool for scholars and experts on public international law and the law of the sea but also for national authorities and practitioners of international disputes resolution as well as public and private entities working in the oil and gas industry.

**Medicine and Ethics in Times of Corona** Martin Woesler, Hans-Martin Sass, 2021-11-18. The Corona pandemic kills, people endanger families, friends, communities, companies, institutions, societies, economies and global networks. It brings about triage, unemployment, social distancing and home schooling. Countries respond differently, often set aside civil and basic human rights. Families and friends cannot get together, visiting the sick nor attending funerals. This pestilence is clearly a cultural, economic and political disease. 40 leaders in medical and sociological research in politics, religion and consulting from 24 countries offer diverse, sometimes controversial answers collected by Martin Woesler and Hans Martin Sass. Les formes contemporaines de l'esclavage Emmanuel Decaux, 2009-07-15. Depuis près de deux siècles, la question de l'esclavage et de la traite négrière est au cœur des relations internationales. Du Congrès de Vienne de 1815 qui dénonce un commerce répugnant aux principes d'humanité et de morale universelle jusqu'à la Cour internationale de Justice qui voque en 1970 les principes et les règles concernant les droits fondamentaux de la personne humaine y compris la protection contre la pratique de l'esclavage comme source d'obligations erga omnes, le droit international contemporain est caractérisé par la construction progressive d'un régime international relevant de la notion de jus cogens. Alors que de nombreux travaux récents voquent l'esclavage sous l'angle historique ou dans une perspective contemporaine, cet ouvrage présente l'originalité de s'inscrire dans une perspective juridique de longue durée au carrefour des sources formelles et matérielles du droit international public tout en éclairant des débats les plus actuels sur les responsabilités historiques en la matière. **The French Presidential and**

analysis of the present trends and prospects for US Russia nuclear arms control The impact of missile defenses and the US India civilian nuclear energy co operation pact will be examined so as to ascertain whether they have weakened or strengthened the global non proliferation regime The chapters in this volume aim to document the increasing complexity of the global nuclear proliferation dynamic and the inability of the international community to come to terms with a rapidly changing strategic milieu The future in all likelihood will be very different from the past and the chapters in this volume will try to develop a framework that may help gain a better understanding of the forces that will shape the nuclear proliferation debate in the years to come
