Psychonephrology 1 Norman B. Levy, 2013-06-29 Major nephrological and psychological organizations have at best set aside only small portions of their programs for papers or panels devoted to the psychological aspect of patients with end stage renal disease Thus the increased need for information concerning the psychological aspects of end stage renal disease has been met by occasional journal articles professional peer discussions small portions of national conferences and informal conversations and consultations with people with clinical and research experience in these areas The First International Conference on Psychological Factors in Hemodialysis and Transplantation arose out of a need to have a forum in which the major people involved in treatment and research in this area could share their latest work among themselves and with the registrants The initial encouragement for organizing such a conference came from the rank and file of nephrology social workers nephrology nurses and liaison psychiatrists and psychologists In early 1977 I had decided that I would make an effort to organize such a meeting and asked the two other individuals most closely identified with major research in this area Atara Kaplan De Nour and Harry S Abram to join me in planning this conference With their support and suggestions concerning the program I embarked upon an attempt to raise financial backing for it I was somewhat surprised to find that the many equipment and drug companies supporting nephrological conferences were not greatly interested in this one

Why Read Ogden? The Importance of Thomas Ogden's Work for Contemporary Psychoanalysis Marina F R Ribeiro, 2024-11-29 Why Read Ogden explores the importance of Thomas Ogden's work to contemporary psychoanalysis both as an interpreter of classic psychoanalytic thinkers and as a new and original theorist and clinician in his own right Ogden writes about the literary genre of psychoanalytic writing emphasising the amalgamation of theoretical and clinical writing with the author's personality Ogden also considers psychoanalytic writing a form of thinking We do not write what we think but we are thinking something unprecedented in writing Inspired by Ogden's proposal of a transitive and creative reading which the authors show him to demonstrate in his own writing about Freud Klein Bion and Winnicott this book takes as its organising principle the question of how Ogden's texts resonate with them personally Ogden is regarded as one of the most important and influential living psychoanalysts and this book addresses the lack of attention given to summarising and examining his key contributions This book will be essential reading for psychoanalysts and psychotherapists in practice and in training who wish to gain a comprehensive understanding of Ogden's work

Medical Books and Serials in Print, 1984 **Heinz Kohut and the Psychology of the Self** Allen M.
