**Neutrosophic Sets and Systems, vol. 69/2024 {Special Issue on Neutrosophy and Plithogeny: Fundamentals and Applications}** Florentin Smarandache,Mohamed Abdel-Basset,Maikel Leyva-Vázquez,Said Broumi,2024-07-01 A special issue of the International Journal in Information Science and Engineering Neutrosophic Sets and Systems vol 69 2024 is dedicated to the Neutrosophic approaches in research on the occasion of the international and multidisciplinary conference held at the Universidad C sar Vallejo in Lima Peru on July 8 and 9 This event marks a significant milestone as it is the first time that the Andean region and Latin America host scholars and researchers dedicated to studying various theoretical and applicative issues in the expansive and diverse field of Neutrosophic approaches Since its conception Neutrosophic theory has proven to be an interdisciplinary

and innovative field notably growing with the introduction of several generalizations of Neutrosophic Sets such as Plithogenic Sets Hypersoft Sets Indeterministic Sets SuperHyperSoft Sets and Multivaluedness. These advanced conceptualizations have further expanded the versatility and application range of Neutrosophic theory allowing its adoption in an ever increasing spectrum of disciplines. The conference with its international and multidisciplinary character has brought together experts and scholars from various fields providing a unique platform for the discussion and exchange of ideas on the multiple applications of Neutrosophic approaches. This special issue also addresses how scientific production in Neutrosophy focuses on social issues specific to Latin American philosophy. In the regional context of Latin America it is possible to state that Neutrosophic tools and knowledge are used for the identification, analysis and resolution of social problems offering unique approaches or distinctive contributions to the field of Neutrosophy influenced by its cultural and philosophical context. Neutrosophic science in Latin America shows a clear pattern of how scientific production addresses social problems standing out for its innovative approaches that reflect the cultural and philosophical particularities of the region. This approach has allowed Neutrosophy not only to advance in theoretical terms but also to provide practical and contextually relevant solutions to social challenges. This special issue compiles works presented at the conference reflecting the richness and diversity of current research in this field. We hope that these articles not only contribute to the advancement of knowledge in Neutrosophic theory but also inspire new research and applications in multiple disciplines.
