Annual Review Of Genetics Vol 12 1978:

Annual Review of Genetics Herschel L. Roman, 1981 Publishes original critical reviews of the significant literature and current development in genetics **Principles of Genetic Toxicology** David Brusick, 2012-12-06 The field of genetic toxicology is a relatively new one which grew out of the studies of chemical mutagenesis and modern toxicology Considering that systematic practices to detect chemical mutagenesis are only a little over thirty years old this field has evolved very rapidly with an abundance of methods for identifying chemical mutagens To evaluate the usefulness of the methods and to select the assay which will yield the most important information under practical conditions requires the broad experience such as that which Dr Brusick has acquired over the last decade Since this field is expanding very rapidly and new testing methods are being recognized it should be kept in mind that revisions may have to be made during the next five to ten years The need for such a book has been obvious to us particularly since training courses and workshops on genetic toxicology are being organized which find it beneficial to utilize established guidelines and since the reports in the literature do not always describe in detail how the work was carried out during laboratory testing In addition to his broad background in genetics Dr Brusick has had much practical experience having organized and directed the most extensive laboratory for mutagen testing I am most pleased to see this volume for which there is an ever increasing need Alexander Hollaender Associated Universities Inc 1717 Massachusetts Avenue N W Associations' Publications in Print , 1981 1981 in 2 v v 1 Subject index v 2 Title index Publisher title index Association name index Acronym index Key to publishers and distributors abbreviations
