Animals And Women Feminist Theoretical Explorations:

Animals and Women Carol J. Adams, Josephine Donovan, 1995-11-14 *Animals and Women* is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense. Offering a feminist perspective on the status of animals, this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species. Furthermore, it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it. This wide-ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf. Exploring the leading edge of the species/gender boundary, it addresses such issues as the relationship between abortion rights and animal rights, the connection between woman battering and animal abuse, and the speciesist basis for much sexist language. Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement. A striking meditation on women and wolves is presented, as is an examination of sexual harassment and the taxonomy of hunters and hunting. Finally, this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women.

Marriage and Sexuality in Medieval and Early Modern Iberia Eukene Lacarra Lanz, 2002 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender authority, female autonomy and unruliness, courtship and marriage, language and speech, and performance and theatricality.

Feminist Animal Studies Erika Cudworth, Ruth E. McKie, Di Turgoose, 2022-12-30 This book explores human/animal relations and species-based domination at the intersection of feminism with critique of our domination and exploitation of nonhuman animals in conversation with power dynamics around coloniality and race, class, sexuality, and embodiment. The collection demonstrates the continued vital importance of feminism conceptually and theoretically, methodologically and politically to the development of animal studies. Feminism has made an incisive critique of the ways in which gender and other intersecting differences and inequalities are constitutive of our destructive, exploitative, and often violent relationships with nonhuman worlds. An international group of scholars and activists showcase new work revisiting and extending established debates while negotiating new paths. Amongst the issues addressed in this collection will be questions of animal being and animal rights, caring relations, the relationships between activism and theory, interspecies sexual violence, tension in the animal defence movement around body politics, gender politics, and professionalisation, different spaces of gender and animal relations from social media to sexology, safe spaces and sanctuaries, spaces of home both in times of business as usual and in times of lockdown. This multidisciplinary volume will be essential reading to students and academics working in the

fields of cultural studies criminology geography history law philosophy politics and sociology with interest in gender environmentalism and animal studies The editors work in the School of Applied Social Sciences at De Montfort University Leicester UK and share interests in gender and species violence environmental harms social justice matters and intersected inequalities

Women and the Animal Rights Movement Emily Gaarder, 2011-02-19 Animal rights is one of the fastest growing social movements today Women greatly outnumber men as activists yet surprisingly little has been written about the importance and impact of gender on the movement Women and the Animal Rights Movement combats stereotypes of women activists as mere sentimentalists by exploring the political and moral character of their advocacy on behalf of animals Emily Gaarder analyzes the politics of gender in the movement incorporating in depth interviews with women and participant observation of animal rights organizations conferences and protests to describe struggles over divisions of labor and leadership Controversies over PETA advertising campaigns that rely on women's sexuality to sell animal rights illustrate how female crusaders are asked to prioritize the cause of animals above all else Gaarder underscores the importance of a paradigm shift in the animal liberation movement one that seeks a more integrated vision of animal rights that connects universally to other issues gender race economics and the environment highlighting that many women activists recognize and are motivated by the connection between the oppression of animals and other social injustices

The Oxford Handbook of Animal Studies Linda Kalof, 2017 The Oxford Handbook of Animal Studies tackles the infamous animal question how can humans rethink and reconfigure their relationships with other animals Over the course of five sections and thirty chapters the contributors investigate issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings

Contemporary Perspectives on Ecofeminism Mary Phillips, Nick

Rumens,2015-11-19 Why is ecofeminism still needed to address the environmental emergencies and challenges of our times Ecofeminism has a chequered history in terms of its popularity and its perceived value in conceptualizing the relationship between gender and nature as well as feeding forms of activism that aim to confront the environmental challenges of the moment This book provides a much needed comprehensive overview of the relevance and value of using eco feminist theories It gives a broad coverage of traditional and emerging eco feminist theories and explores across a range of chapters their various contributions and uniquely spans various strands of ecofeminist thinking The origins of influential eco feminist theories are discussed including key themes and some of its leading figures contributors include Erika Cudworth Greta Gaard Trish Glazebrook and Niamh Moore and outlines its influence on how scholars might come to a more generative understanding of the natural environment The book examines eco feminism s potential contribution for advancing current discussions and research on the relationships between the humans and more than humans that share our world This timely volume makes a distinctive scholarly contribution and is a valuable resources for students and academics in the fields of environmentalism political ecology sustainability and nature resource management

Animals in the Sociologies of Westermarck and Durkheim Salla Tuomivaara,2019-09-04 This book explores why animals at some point disappeared from the realm and scope of sociology The role of sociology in the construction of a science of the human has been substantial building representations of the human sphere of life as unique Within the sociological tradition however animals have often been invisible even non existent Through in depth comparisons of the texts of prominent early sociologists Emile Durkheim and Edward Westermarck Tuomivaara shows that despite this exclusion representations of animals and human animal relations were far more varied in early works than in the later sociological cannon Addressing a significant gap in the interdisciplinary field of animal studies Tuomivaara presents a close reading of the historical treatment of animals in the works of Durkheim and Westermarck to determine how the human animal boundary was established in sociological theory The diverse forms in which animals and the animal appear in the works of early classical sociology are charted and explored alongside the sociological themes that bring animals into these texts Situated in contemporary theory from critical animal studies to posthumanism this important book lays the groundwork for a disciplinary shift away from this sharp human animal dualism

Animals, Empathy, and Anthropomorphism Carlo Salzani,2025-05-05 This open access book explores the role of imagination in animal ethics and its constitutive links to empathy sympathy and anthropomorphism The book argues for the constitutive role of imagination in ethical deliberation but acknowledges that there exist important limits to its use However limit is here understood not merely negatively as restriction and insufficiency but rather positively as condition of possibility so what the book explores and analyses are the conditions for a positive and fruitful use of the imagination in ethics The book uses as a frame the questions and issues raised in J M Coetzee s The Lives of Animals to explore some central and salient themes

Following the Animal Ann-Sofie Lönngren,2015-09-10 Literary transformations from human

to animal have occurred in myths folklore fairy tales and narratives from all over the world since ancient times and have always provided a narrative space for depictions of power agency and the radical nature of change In *Following the Animal* these transformations are analysed with regards to their use in modern literature from northern most Europe with specific attention being paid to the insights they provide regarding the human animal relationship both generally in the industrialized West and against the background of more specific circumstances in the Nordic area In three analytic chapters focusing respectively on Swedish author August Strindberg's novel *Tschandala* 1887 Finnish author Aino Kallas's novel *The Wolf's Bride* 1928 and Danish author Karen Blixen Isak Dinesen's short story *The Monkey* 1934 along with discussions of a range of other authors and texts the reader is introduced to several traditions of literary production that both connect to and differ from Anglophone and other literature in fascinating ways In addition to the insights it provides concerning the uses of human animal transformations in modern Nordic literature and their significance in relation to the question of the animal *Following the Animal* also offers literary scholars and students alike a series of useable and transferable strategies for approaching texts from a more than anthropocentric human animal studies perspective In phrasing and employing the interpretational method of following the animal over the text's surface up metaphorical elevations down material wormholes and in constant dialogue with previous research this book contributes greatly to both human animal literary studies specifically and to the field of literary scholarship generally in both an international and northern European context

European Local-Color Literature Josephine Donovan, 2010-09-30 Supernatural, Humanity, and the Soul Susan A. George, 2014-09-03 Through nine seasons the TV show *Supernatural* has delved into social philosophical literary and theological themes that not only add depth to the show but reflect our era's intellectual concerns This book contextualizes *Supernatural* within the renaissance of the fantastic in pop culture and traces its roots in folklore and Biblical narrative

Towards Critical Environmental Education Aristotelis S. Gkiolmas, Constantine D. Skordoulis, 2020-11-03 This volume discusses theory philosophy praxis and methods in Environmental and Ecological education and considers the junction with the main visions and issues of Critical Pedagogy The volume and its separate chapters address four axes which can also be seen as the guidelines of the content as well as the central objectives of the book The first axis concerns the missing theoretical and practical pieces at this point in time The volume considers the issues that are not included in contemporary Environmental Education and thus deprive it from critical orientations This implies that in Environmental Education very little discussion exists about the political economic racial gender and class issues that in most cases govern the actions of leaders and stake holders The second axis concerns what has been done so far and in what directions This involves descriptions of theoretical approaches or actual applied methodologies in the classroom such as curricula or syllabus used or the kind of actions certain educators have taken to infuse the issues of justice and critical reflection within the Environmental Education teaching agenda The third axis examines proposals It looks at ways to enrich domains of Environmental Education with the argumentations of Critical

Pedagogy The fourth axis concerns the way in which proposals can be effectuated This part contains specific methodologies and teaching sequences depicting ways of including major aspects of Critical Pedagogy and Critical Education in Environmental Education Examples are Non anthropocentric ecological approaches in the classroom political activism in the Curricula mixture of field activities and political activities Making Sense of 'Food' Animals Paula Arcari,2019-09-04 This book addresses the persistence of meat consumption and the use of animals as food in spite of significant challenges to their environmental and ethical legitimacy Drawing on Foucault s regime of power knowledge pleasure and theorizations of the gaze it identifies what contributes to the persistent edibility of food animals even and particularly as this edibility is increasingly critiqued Beginning with the question of how animals and their bodies are variously mapped by humans according to their use value it gradually unpacks the roots of our domination of food animals a domination distinguished by the literal embodiment of the other The logics of this embodied domination are approached in three inter related parts that explore respectively how knowledge sensory and emotional associations and visibility work together to render animal s bodies as edible flesh The book concludes by exploring how to more effectively challenge the entitled gaze that maintains food animals as persistently edible Killing Tradition Simon Bronner,2008-11-21 Across the country and around the world people avidly engage in the cultural practice of hunting Children are taken on rite of passage hunting trips where relationships are cemented and legacies are passed on from one generation to another Meals are prepared from hunted game often consisting of regionally specific dishes that reflect a community s heritage and character Deer antlers and bear skins are hung on living room walls decorations and relics of a hunter s most impressive kills Only 5 percent of Americans are hunters but that group has a substantial presence in the cultural consciousness Hunting has spurred controversy in recent years inciting protest from animal rights activists and lobbying from anti cruelty demonstrators who denounce the custom But hunters have responded to such criticisms and the resulting legislative censures with a significant argument in their defense the claim that their practices are inextricably connected to a cultural tradition Further they counter that they as representatives of the rural lifestyle pioneer heritage and traditional American values are the ones being victimized Simon J Bronner investigates this debate in Killing Tradition Inside Hunting and Animal Rights Controversies Through extensive research and fieldwork Bronner takes on the many questions raised by this problematic subject Does hunting promote violence toward humans as well as animals Is it an outdated activity unnecessary in modern times Is the heritage of hunting worth preserving Killing Tradition looks at three case studies that are at the heart of today s hunting debate Bronner first examines the allegedly barbaric rituals that take place at deer camps every late November in rural America He then analyzes the annual Labor Day pigeon shoot of Hegins Pennsylvania which brings animal rights protests to a fever pitch Noting that these aren t simply American concerns and that the animal rights movement in America is linked to British animal welfare protests Bronner examines the rancor surrounding the passage of Great Britain s Hunting Act of 2004 the most

comprehensive and divisive anti hunting legislation ever enacted The practice of hunting is sure to remain controversial as it continues to be touted and defended by its supporters and condemned and opposed by its detractors With Killing Tradition Bronner reflects on the social psychological and anthropological issues of the debate reevaluating notions of violence cruelty abuse and tradition as they have been constructed and contested in the twenty first century Greening the Academy Samuel Fassbinder,Anthony Nocella,Richard Kahn,2012-12-30 This is the academic Age of the Neoliberal Arts Campuses as places characterized by democratic debate and controversy wide ranges of opinion typical of vibrant public spheres and service to the larger society are everywhere being creatively destroyed in order to accord with market and military models befitting the academic industrial complex While it has become increasingly clear that facilitating the sustainability movement is the great 21st century educational challenge at hand this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex friendly green campus initiatives of science technology engineering and management programs By contrast Greening the Academy Ecopedagogy Through the Liberal Arts takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability Greening the Academy thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well being of our emerging planetary community and its numerous common locales

Animals as Legal Beings Maneesha Deckha,2020 In Animals as Legal Beings Maneesha Deckha critically examines how Canadian law and by extension other legal orders around the world participate in the social construction of the human animal divide and the abject rendering of animals as property Through a rigorous but cogent analysis Deckha calls for replacing the exploitative property classification for animals with a new transformative legal status or subjectivity called beingness In developing a new legal subjectivity for animals one oriented toward respecting animals for who they are rather than their proximity to idealized versions of humanness Animals as Legal Beings seeks to bring critical animal theorizations and animal law closer together Throughout Deckha draws upon the feminist animal care tradition as well as feminist theories of embodiment and relationality postcolonial theory and critical animal studies Her argument is critical of the liberal legal view of animals and directed at a legal subjectivity for animals attentive to their embodied vulnerability and desirous of an animal friendly cultural shift in the core foundations of anthropocentric legal systems Theoretically informed yet accessibly presented Animals as Legal Beings makes a significant contribution to an array of interdisciplinary debates and is an innovative and astute argument for a meaningful more than human turn in law and policy **Animals and the Environment** Lisa Kemmerer,2015-05-01 Contemporary Earth and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have

much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals

Animal Rights Cass R. Sunstein, Martha C. Nussbaum, 2004-04-01 Cass Sunstein and Martha Nussbaum bring together an all star cast of contributors to explore the legal and political issues that underlie the campaign for animal rights and the opposition to it Addressing ethical questions about ownership protection against unjustified suffering and the ability of animals to make their own choices free from human control the authors offer numerous different perspectives on animal rights and animal welfare They show that whatever one's ultimate conclusions the relationship between human beings and nonhuman animals is being fundamentally rethought This book offers a state of the art treatment of that rethinking

The Routledge Companion to Gender and Animals Chloë Taylor, 2024-05-31 The Routledge Companion to Gender and Animals is a diverse and intersectional collection which examines human and more than human animal relations as well as the interconnectedness of human and animal oppressions through various lenses Comprising fifty chapters the book explores a range of debates and scholarship within important contemporary topics such as companion animals hunting agriculture and animal activist strategies It also offers timely analyses of zoonotic disease pandemics mass extinction and the climate catastrophe using perspectives including feminist critical race anti colonial critical disability and masculinities studies The Routledge Companion to Gender and Animals is an essential reference for students in gender studies sexuality studies human animal studies cultural studies sociology and environmental studies
