Annihilation Of A Planet:

Annihilation of a Planet Antonion Borges, 2002-12-19 Humans have already built cities under the sea in the year 2222 and the bulging Earth's population has nowhere to go but up. To that end 900 robots are engineered for the sole purpose of going to Mars and building the first city meant for human habitation in space. At the last moment the father of the project reconfigures a robot once created for elder care. Using his own DNA the scientist designs robot Lawrence in his own image. Regardless of the advances man has made technologically he has not advanced socially or morally. Thugs still roam city streets, people still fight over religion and power, the haves still have little compassion for the have-nots. Lawrence's creator hopes the special robot's presence on Mars will insure a different social climate on the new frontier. But it is not to be. The scientist's nemesis has reconfigured some of the original robots to strike out on their own, their greatest impulse to destroy humankind. When the rebellious choose Lawrence to destroy humans by delivering a Mega bomb to earth, Lawrence digresses, seeking first to continue the quest he set for himself when he was an elder care specialist, finding the meaning of love. Can love be found on a quarreling, hate-filled, war-torn, over-crowded planet? Is it possible for love to be defined in the computer brain of a robot, tempting him to reconsider his mission? One planet will be annihilated in his science fiction saga. Which one? The answer has everything to do with the power of love. **Annihilation of a Planet II** Antonion Borges, 2017-10

Sometimes to save the world we have to start with ourselves. Having protected the world from sure destruction thirty years before Lawrence, a B12 Android is now languishing on a death pole on Mars. His creator's son, Prof Paul Linsdale, makes an impassioned plea to return this extraordinary humanoid to earth. But a successful yet turbulent rescue attempt on the red planet leaves an android and an ancient NASA space rover Spirit stranded. The great Lawrence is hailed as a hero, but the humanoid has other plans for his life, other than the one marked for his return. Handing over vital, as yet indecipherable alien data to Linsdale, Lawrence disappears. Prof Linsdale, now under financial pressure to produce, Lawrence resorts to subterfuge and creates a replica, but little does the scientist know that the replica's programming has been compromised by a cup of spilled coffee. As the real Lawrence starts appearing in war-torn, environmentally distressed regions and economically depressed parts of South America, the questions and tension start to build for the well-meaning professor. And that's all before the replica Lawrence starts to unveil his plans. The second book in the *Annihilation of a Planet* series explores the sensitive relationships man holds with his physical environment, technology, and individual faith. Like Aesop, author Antonion Borges uses fable-like elements to produce a persuasive argument for changes to our governments, our charities, and most importantly ourselves. **Annihilation : Almost** Raj, 2013-12-18 We the mankind had pushed the self-destruct button a long time back and are currently in the final stages of the countdown, the end of which would mean the end of mankind, the end of this world, and perhaps the end of the planet. This book is an attempt to show how mankind's blind lust for power and supremacy can lead to its end. It is also an interesting insight into the complications that can rise out of our overdependence.

on technology and can accelerate our drive on the path to self destruction The books plot revolves around the use of an ancient language in mankind's battle against its nemesis Alexander and also showcases how our science is regressive not progressive The protagonists manage to defeat Alexander but fail to stop him from launching nuclear missiles And that is where the plot turns a new corner
