Webb, 2009-08-11 Nuclear magnetic resonance NMR is an analytical tool used by chemists and physicists to study the structure and dynamics of molecules In recent years no other technique has gained such significance as NMR spectroscopy It is used in all branches of science in which precise structural determination is required and in which the nature of interactions and reactions in solution is being studied Annual Reports on NMR Spectroscopy has established itself as a premier means for the specialist and non specialist alike to become familiar with new techniques and applications of NMR spectroscopy Provides updates on the latest developments in NMR spectroscopy Includes comprehensive review articles Highlights the increasing importance of NMR spectroscopy as a technique for structural determination **Nuclear Magnetic Resonance** G A Webb, 2007-10-31 As a spectroscopic method Nuclear Magnetic Resonance NMR has seen spectacular growth over the past two decades both as a technique and in its applications Today the applications of NMR span a wide range of scientific disciplines from physics to biology to medicine Each volume of Nuclear Magnetic Resonance comprises a combination of annual and biennial reports which together provide comprehensive of the literature on this topic This Specialist Periodical Report reflects the growing volume of published work involving NMR techniques and applications in particular NMR of natural macromolecules which is covered in two reports NMR of Proteins and Acids and NMR of Carbohydrates Lipids and Membranes For those wanting to become rapidly acquainted with specific areas of NMR this title provides unrivalled scope of coverage Seasoned practitioners of NMR will find this an invaluable source of current methods and applications Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis **Encyclopedia of Spectroscopy and Spectrometry**, 2010-02-24 The Second Edition of the Encyclopedia of Spectroscopy and Spectrometry pulls key information into a single source for quick access to answers and or in depth examination of topics SPEC 2 covers theory methods and applications for researchers students and professionals combining proven techniques and new insights for comprehensive coverage of the field The content is available in print and online via ScienceDirect the latter of which offers optimal flexibility accessibility and usability through anytime anywhere access for multiple users and superior search functionality No other work gives analytical and physical bio chemists such unprecedented access to the literature With 30% new content SPEC 2 maintains the authoritative balanced coverage of the original work while also breaking new ground in spectroscopic research Incorporates more than 150 color figures 5 000 references and 300 articles 30% of which are new for

a thorough examination of the field Highlights new research and promotes innovation in applied areas ranging from food science and forensics to biomedicine and health Features a new co editor David Koppenaal of Pacific Northwest National Laboratory Washington USA whose work in atomic mass spectrometry has been recognized internationally **Energy Research Abstracts** ,1993 **Advances in Biophysical Chemistry Volume 5** BUSH,1996-01-08 *Advances in Biophysical Chemistry Volume 5* provides reviews of important topics in physical and structural biochemistry The volume begins with a review of the chemical reactivity of DNA and its relationship to the dynamic nature of DNA conformation and its dependence on base sequence The underlying chemistry has become extremely important to many researchers who use a host of chemical footprinting techniques to study biologically relevant complexes of DNA This is followed by separate chapters that cover an innovative application of fluorescence energy transfer to investigate the dynamics of complex glycopeptides the NMR of cations which bind to DNA providing a picture of DNA conformation and dynamics which is complementary to that provided by ¹H NMR spectroscopy the use of NMR to study electron transfer reactions between cytochrome c peroxidase and cytochrome c methods for analysis of data on O₂ binding by hemoglobin and experimental methods for obtaining data on protein association **Journal of Analytical Chemistry of the USSR** ,1985 The Alkaloids: Chemistry and Pharmacology ,1986-10-14 *The Alkaloids Chemistry and Pharmacology* *Water Activity in Foods* Gustavo V. Barbosa-Cánovas,Anthony J. Fontana, Jr.,Shelly J. Schmidt,Theodore P. Labuza,2008-04-15 *Water Activity in Foods Fundamentals and Applications* is a one of a kind reference text that brings together an international group of food scientists chemists and engineers to present a broad but thorough coverage of an important factor known to influence the attributes of foods water activity A team of experienced editors designed this book for lasting value as a sound introduction to the concept of water activity for neophytes and seasoned professionals in both academe and industry Topics have been carefully selected to provide a comprehensive understanding of the mechanisms by which water activity influences the quality shelf life and safety of food products *Water Activity in Foods* belongs on the shelves of all food science professionals for use in product development quality control and food safety Students and newcomers to these areas will appreciate the instructional approach adopted by the experienced teachers and industry specialists who have contributed chapters to this comprehensive overview *Comprehensive Coordination Chemistry II* J. A. McCleverty,T.J. Meyer,2003-12-03 *Comprehensive Coordination Chemistry II* CCC II is the sequel to what has become a classic in the field *Comprehensive Coordination Chemistry* published in 1987 CCC II builds on the first and surveys new developments authoritatively in over 200 newly commissioned chapters with an emphasis on current trends in biology materials science and other areas of contemporary scientific interest Organometallic Chemistry E W Abel,F G A Stone,2007-10-31 Organometallic chemistry is an interdisciplinary science which continues to grow at a rapid pace Although there is continued interest in synthetic and structural studies the last decade has seen a growing interest in the potential of organometallic chemistry to provide answers to problems in catalysis

synthetic organic chemistry and also in the development of new materials This Specialist Periodical Report aims to reflect these current interests reviewing progress in theoretical organometallic chemistry main group chemistry the lanthanides and all aspects of transition metal chemistry Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume

Nuclear Magnetic Resonance Paul Hodgkinson, Josep Sauri, 2022-11-14 With applications across chemistry physics and medicine nuclear magnetic resonance is a proven uniquely versatile and powerful spectroscopic technique The success of NMR and its constant redevelopment means that the literature is vast and wide ranging Each chapter in this volume is a distillation of the key recent literature in different areas covering the spectrum of NMR theory and practice and including solid state NMR solution NMR of small molecules and NMR of living systems These reports are invaluable both for new researchers wishing to engage with literature for the first time and for seasoned practitioners particularly service managers needing to keep in touch with the ever expanding ways in which NMR is used
