risking their lives in freedom's cause in the dark skies above Hitler's Reich. From their earliest beginnings in places as far apart as a Cotswold village and the suburbs of Sydney through the adventure of training in North America and the dread and danger of the forty-five bombing raids they flew with 97 Squadron, David Price describes the crew's wartime experiences with human sympathy allied to a secure technical understanding of one of the RAF's most iconic aircraft. The drama and anxiety of individual missions to Kassel, Munich, and Augsburg, as well as Berlin, is evoked with thrilling immediacy while the military events and strategic decisions that drove the RAF's area bombing campaign against Nazi Germany are interwoven deftly with the narrative of the crew's operational careers. Reviews: A sensitive account of the bomber's life. Price has given the bomber offensive a human face. This book has a heart and soul. The Times. A fascinating and fast-paced account of the exploits of an Avro Lancaster bomber crew from 97 Squadron, RAF The Herald. A remarkable insight into the bravery, determination, and skill of British Bomber Command crews during WWII. Waterstones.

Imperial Japan's Allied Prisoners of War in the South Pacific C. Kenneth Quinones, 2021-09-30. Three weeks after Imperial Japan's surrender, five men dressed in baggy khaki uniforms stared at the camera. They and two colleagues were the only survivors out of the 210 Allied airmen which Imperial Japan had imprisoned in paradise. Joining them were 18 British soldiers, the only survivors of 600 of their countrymen similarly but separately imprisoned. Another 10,000 Allied soldiers and civilians were also imprisoned on the South Pacific island of New Britain. More than half died before liberation. What motivated such inhumane treatment? This book's quest for an answer traces the genesis of Bushido, Imperial Japan's martial code, and surveys the prisoners' recollections of their ordeal as the Battle for Rabaul raged around them from 1942 to March 1944.

Under a Bomber's Moon Stephen Harris, 2011-01-11. They were the best of enemies: dedicated, skilled, and deadly. In the night skies above wartime Germany, an RAF navigator, air bomber from New Zealand, and a Luftwaffe pilot seek out their targets, testing the gap between success and their own destruction as they cross each other's paths. The odds are heavily against either of them making it through the war, but as this sobering realisation displaces their initial exuberant sense of adventure, both come to see in their youthful sacrifice the survival of all they hold dear. UNDER A BOMBER'S MOON reaches across the divide of years, of geography, of nationality, to tell their story largely in their own words, describing both the breathtaking clashes in the air and the camaraderie, humour, patriotism, and personal tragedies that became their war. Stephen Harris began his journey of discovery because he wanted to know the truth of his great uncle Colwyn Jones's fate. With Colwyn's vividly written letters and diary as a starting point, he set out to discover what really happened on the night Colwyn's extraordinary luck ran out. Little did he know that his quest would lead him to a meeting with a former Luftwaffe pilot who was pitted against his great uncle in the skies over Germany. Otto Heinrich Fries proved to be both engaging and articulate, eventually allowing Harris to tell his story in this book. The result is a unique and personal account of two highly successful airmen from opposing sides.

Physiological Problems Of Bomber Crews In The Eighth Air Force During WWII Major James J. Carroll,2014-08-15

Aviation physiology is a highly relevant field to flyers of unpressurized aircraft that flew at altitudes in excess of 25 000 feet Crew members had to contend with severe environmental factors while flying long bombing missions during WWII The limits of human physiology must be the main concern of any battle plan involving flyers and fatality mortality rates should be the primary focus in evaluating the success or failure of such a plan The purpose of this research project is to determine if human factors were overlooked intentionally or by accident If they were overlooked unintentionally then what was done to resolve the physiological problems of the aircrews The project will also underscore the continued need to address the human machine during any plan in today s demanding aviation environment Chapter one explores whether or not the limits of the human being was taken into account when the WWII bombing planners developed AWPD 1 It provides an insight into why AWPD 1 was created without regard to the aircrew members and how this neglect could have possibly been remedied Chapter two examines the machines of the day in particular the B 17 to see if it was ready to carry out the assigned missions envisioned by the war planners The early wartime experience of the B 17 by the Royal Air Force was disappointing but nevertheless it was looked upon by the U S Army Air Force USAAF as the ultimate bomber that could complete any assignment This chapter also provides some insight into a typical mission the B 17 aircrew had to endure and the aircraft s ability to carry out the assigned bombing missions Chapter three deals with the physiological problems experienced by the aircrews and what was done to alleviate them Chapter four focuses on the non combat accident rates of the Eighth Air Force what they meant and how the leadership reacted to them
