Conserving Paintings Basic Technical Information For Contemporary Artists:

Conserving Paintings Allan Byrne, 1995 *Conserving Paintings* is not a book on how to paint Nor is it a book that chastises contemporary artists for using non traditional materials and techniques Instead *Conserving Paintings* presents artists with basic technical and conservation information in order that they can prepare their works of art with a high chance of surviving unchanged for future audiences All too often it is the lack of basic structural information at the construction phase that results in artists producing works of art which incorporate features destined to cause early deterioration *Conserving Paintings* also addresses the need for post production care of works of art The general acceptance of unnecessary damage to recently completed works of art is unfortunately widespread with many artists accepting damage to their works as standard procedure This should not be the case a damaged work of art should be an exception rather than the norm Though *Conserving Paintings* is intended primarily for artists the information presented in this book is also valuable for those responsible for the care of paintings in public collections for corporate or private collectors and for individuals who own works of art PROCEEDINGS 4th International Congress on “Science and Technology for the Safeguard of Cultural Heritage in the Mediterranean Basin” VOL. II , Conservation of Easel Paintings Joyce Hill Stoner, Rebecca Rushfield, 2013-02-15 *Conservation of Easel Paintings* is the first comprehensive text on the history philosophy and methods of treatment of easel paintings that combines both theory with practice With contributions from an international group of experts and interviews with important artists this volume provides an all encompassing guide to necessary background knowledge in technical art history artists materials scientific methods of examination and documentation with sections that present varying approaches and methods for treatment including consolidation lining cleaning retouching and varnishing The book concludes with a section featuring issues of preventive conservation storage shipping exhibition lighting safety issues and public outreach *Conservation of Easel Paintings* is a crucial resource in the training of conservation students and will provide generations of practicing paintings conservators and interested art historians curators directors collectors dealers artists and students of art and art history with invaluable information and guidance **Conservation of Contemporary Art** Renée van de Vall, Vivian van Saaze, 2023-12-30 This open access book investigates whether and how theoretical findings and insights in contemporary art conservation can be translated into the daily work practices of conservators or vice versa whether and how the problems and dilemmas encountered in conservation practice can inform broader research questions and projects For several decades now the conservation of contemporary art has been a dynamic field of research and reflection Because of contemporary art's variable constitution its care and management calls for a fundamental rethinking of the overall research landscape of museums heritage institutions private sector organizations and universities At first this research was primarily pursued by conservation professionals working in or with museums and other heritage organizations but increasingly academic researchers and universities became involved for instance through collaborative projects This

book is the result of such collaboration It sets out to bridge the gap between theory and practice by investigating conservation practices as a form of reflection and reflection as a form of practice *Conserving Canvas* Cynthia Schwarz,Ian McClure ,Jim Coddington,2023-10-24 The most authoritative publication in nearly fifty years on the subject of conserving paintings on canvas In 2019 Yale University with the support of the Getty Foundation held an international conference where nearly four hundred attendees from more than twenty countries gathered to discuss a vital topic how best to conserve paintings on canvas It was the first major symposium on the subject since 1974 when wax resin and glue paste lining reigned as the predominant conservation techniques Over the past fifty years such methods which were often destructive to artworks have become less widely used in favor of more minimalist approaches to intervention More recent decades have witnessed the reevaluation of traditional practices as well as focused research supporting significant new methodologies procedures and synthetic materials for the care and conservation of paintings on fabric supports *Conserving Canvas* compiles the proceedings of the conference presenting a wide array of papers and posters that provide important global perspectives on the history current state and future needs of the field Featuring an expansive glossary of terms that will be an invaluable resource for conservators this publication promises to become a standard reference for the international conservation community The free online edition of this open access publication is available at getty.edu/publications/conserving_canvas Also available are free PDF and EPUB downloads of the book *Conservation of Time-Based Media Art* Deena Engel,Joanna Phillips,2022-11-02 *Conservation of Time based Media Art* is the first book to take stock of the current practices and conceptual frameworks that define the emerging field of time based media conservation which focuses on contemporary artworks that contain video audio film slides or software components Written and compiled by a diverse group of time based media practitioners around the world including conservators curators registrars and technicians among others this volume offers a comprehensive survey of specialized practices that have developed around the collection preservation and display of time based media art Divided into 23 chapters with contributions from 36 authors and 85 additional voices the narrative of this book provides both an overview and detailed guidance on critical topics including the acquisition examination documentation and installation of time based media art cross medium and medium specific treatment approaches and methods the registration storage and management of digital and physical artwork components collection surveys and project advocacy lab infrastructures staffing and the institutional implementation of time based media conservation *Conservation of Time based Media Art* serves as a critical resource for conservation students and for a diverse professional audience who engage with time based media art including conservation practitioners and other collection caretakers curators art historians collectors gallerists artists scholars and academics **Living Matter: The Preservation of Biological Materials in Contemporary Art** Rachel Rivenc,Kendra Roth,2022-05-24 This innovative volume is the first to address the conservation of contemporary art incorporating biological materials such as plants foods bodily fluids or

genetically engineered organisms Eggshells flowers onion peels sponge cake dried bread breast milk bacteria living organisms these are just a few of the biological materials that contemporary artists are using to make art But how can works made from such perishable ingredients be preserved And what logistical ethical and conceptual dilemmas might be posed by doing so Because they are prone to rapid decay even complete disappearance biological materials used in art pose a range of unique conservation challenges This groundbreaking book probes the issues associated with displaying collecting and preserving these unique works of art The twenty four papers from the conference present a range of case studies prominently featuring artists perspectives as well as conceptual discussions thereby affording a comprehensive and richly detailed overview of current thinking and practices on this topic Living Matter is the first publication to explore broadly the role of biological materials in the creative process and present a variety of possible approaches to their preservation The free online edition of this open access publication is available at www.getty.edu/publications/living_matter and includes videos and zoomable illustrations Also available are free PDF EPUB and Kindle MOBI downloads of the book

Theorising the Artist

Interview Lucia Farinati, Jennifer Thatcher, 2024-08-29 Reflecting on the relationship between artists and their audiences this book examines how artists have presented themselves publicly through interviews and sought to establish a critical voice for themselves Considering the interview as a form of cultural production contributors explore the criteria for determining the artist interview as a distinct field of research in relation to other cultural fields Structured in four parts History and Historiography Subverting the Biographical Model Interviews as Practice and Materiality and Technology the book takes an interdisciplinary approach that encompasses the fields of art history fine art oral history curating media studies and museum conservation By theorising the artist interview as a form of cultural production and embracing it as a co constructed critical practice this volume aims to show and encourage an approach to art history which dismantles old hierarchies in favour of valuing dialogue and collaboration The book will be of interest to scholars working in art history museum studies oral history and historiography

Issues in Contemporary Oil Paint Aviva Burnstock, Matthijs de Keijzer, Jay Krueger, Tom Learner, Alberto de Tagle, Gunnar Heydenreich, Klaas Jan van den Berg, 2014-11-10 This volume represents 27 peer reviewed papers presented at the ICOP 2013 symposium which will help conservators and curators recognise problems and interpret visual changes on paintings which in turn give a more solid basis for decisions on the treatment of these paintings The subject matter ranges from developments of paint technology working methods of individual artists through characterisation of paints and paint surfaces paint degradation vs long time stability to observations of issues in collections cleaning and other treatment issues as well as new conservation approaches

Installation Art and the Museum Vivian Saaze, 2025-10-01 Installation art has become mainstream in artistic practices However acquiring and displaying such artworks implies that curators and conservators are challenged to deal with obsolete technologies ephemeral materials and other issues concerning care and management of these artworks By analysing three in depth case studies the author sheds new light on the key concepts of traditional conservation authenticity artist s intention and the notion of ownership while exploring how these concepts apply in contemporary art conservation Based on original empirical research and cross case analysis this ground breaking study offers a re examination of traditional conservation values and ethics and argues for a reassessment of the role of the conservator of contemporary art

New media art conservation Lino García Morales, 2022-08-23 New media art produced at the intersection of science and technology makes up the majority of a Museum of Contemporary Art s holdings However technological obsolescence and the technical complexity of the works make their conservation restoration an ongoing challenge The Theory of Evolutive Conservation addresses this problem and offers alternatives and solutions from the production of new media art to recreation as a strategy of permanence through change
