Constable In Control:

Controlling the Constable Tony Jefferson, Roger Grimshaw, 2023-03-31 In the early 1980s the question of how far the police should be accountable for their actions had become extremely vexed The impending new Police Bill the Scarman report and the pressure from many sides for an independent complaints machinery hinged on this issue and a careful review of the problem was badly needed The Cobden Trust commissioned Tony Jefferson and Roger Grimshaw to research into the matter and Controlling the Constable originally published in 1984 is the result of their findings The authors examine closely the concept of constabulary independence at the time They look at the relevant legal history and at how this independence was used by chief constables from day to day On this basis they then re assess two of the most controversial policing operations of modern times Brixton prior to the 1981 Riots and Southall on 23 April 1979 a day which resulted in hundreds of arrests and the death of Blair Peach They conclude that the concept embodies a fundamental incoherence the reliance on the law to guide the chief constable and the failure of the law to do so They show that all the current proposals for reform which entailed greater emphasis on the democratic system as a guide could result in similar incoherence A new approach to the conflict between legal authority and democratic authority was urgently needed Controlling the Constable points the way to the only satisfactory resolution and this included a concept of justice which was coherent and which could serve as a real guide for the chief constable in using his discretion The book was controversial but quite clear on one point however independent any new complaints procedure may become and however much committees were consulted by chief constables via Scarman type liaison committees until the problem was tackled on this fundamental level there could be no significant change in police behaviour

Shadows of Time Jason Powell, 2025-04-28 Shadows of Time Unveiling the Intersection of Crime Victims and Aging is a comprehensive exploration of the complex relationship between crime victims and the aging population Whilst older people are visible as an aging population they are invisible as a victim population or even more controversially as an offending population This book delves into the challenges vulnerabilities and unique obstacles faced by older adults who become victims of crime and offenders of crime across cultures It is one of a tiny handful of books that explores the relationship of aging victimization and criminality

To make sense of such issues there will be a critical exploration of the links between theory policy and practice The primary purpose of this book is to shed light on the often overlooked issue of elderly victimization and offending and to raise awareness about its impact

Animal Cities Peter Atkins,2016-04-15 *Animal Cities* builds upon a recent surge of interest about animals in the urban context Considering animals in urban settings is now a firmly established area of study and this book presents a number of valuable case studies that illustrate some of the perspectives that may be adopted Having an urban history flavour the book follows a fourfold agenda First the opening chapters look at working and productive animals that lived and died in nineteenth century cities such as London Edinburgh and Paris The argument here is that their presence yields insights into evolving understandings of the category urban and what made a good city Second there is a consideration of nineteenth century animal spectacles which influenced contemporary interpretations of the urban experience Third the theme of contested animal spaces in the city is explored further with regard to backyard chickens in suburban Australia Finally there is discussion of the problem of the public companion animal and its role in changing attitudes to public space illustrated with a chapter on dog walking in Victorian and Edwardian London *Animal Cities* makes a significant contribution to animal studies and is of interest to historical geographers urban cultural social and economic historians and historians of policy and planning

The Ordeal of Peace Adam R. Seipp,2016-03-03 Historians know a great deal about how wars begin but far less about how they end Whilst much has been written about the forces passions and institutions that mobilized societies for war and worked to sustain that mobilization through years of struggle much less is known about the equally complex processes that demobilized societies in the wake of armed conflict As such this new book will be welcomed by scholars wishing to understand the effects of the Great War in its fullest context including the reactions behaviors and attitudes of ordinary Europeans during the tumultuous events of the years of demobilization Taking a transnational perspective on demobilization this study demonstrates that the experience of mass industrial war generated remarkably similar pressures within both the defeated and victorious countries Using as examples the important provincial centres of Munich and Manchester this book examines the experiences of European urban dwellers from the last year of the war until the early 1920s Utilizing a wide variety of sources from more than twenty archives in Germany Britain and the United States this book recovers voices from the period that are often lost in conventional narratives capturing the richness and diversity of the ideas visions and conflicts engendered by those difficult and tumultuous years The result is a book that paints a vivid picture of the difficulties that peace could bring to economies and societies that had rapidly and fully adapted to the demands of industrial world war

Constable in control Nicholas Rhea,1994 *Police Powers and Accountability* John L. Lambert,2023-03-31 The traditional view of the role of the police had come under increasing attacks in the early 1980s The riots of 1981 and the Scarman Inquiry stimulated a widespread public debate about policing police powers and accountability It had become clear that the police did not simply enforce the law They also made policy about what law to enforce when to

enforce it and against whom to enforce it It was the control of this discretionary power which was at the heart of the debate at the time Originally published in 1986 this book considers these critical issues in contemporary policing It concentrates on those aspects of policing that were usually covered in law and law related courses It deals with the constitutional framework within which the police operates It examines the police complaints procedure and the full range of police powers against the background of the political debate at the time Throughout the book the 1984 Police and Criminal Evidence Act is discussed in detail and its impact upon police and public alike is analysed **Kenmu** Andrew Edmund Goble,2020-03-23 The short lived Kenmu regime 1333 1336 of Japanese Emperor Go Daigo is often seen as an inevitably doomed revanchist attempt to shore up the old aristocratic order But far from resisting change Andrew Edmund Goble here forcefully argues the flamboyant Go Daigo and his iconoclastic associates were among the competitors seeking to overcome the old order and renegotiate its structure and ethos Their ultimate defeat did not automatically spell failure rather the revolutionary nature of their enterprise decisively moved Japan into its medieval age By birth education and circumstances Go Daigo should have been a weak fatalistic bit player Instead this student of Chinese political theory was a bold actor with an unprecedented knowledge of the various regions of Japan who forced situations to his own benefit and led a rebellion that overthrew the Kamakura bakufu Kenmu Go Daigo s Revolution tells his extraordinary personal story vividly reexamines original sources to discover the real nature of the Kenmu polity and sets both within the broader backdrop of social economic and intellectual change at a dynamic moment in Japanese history **Votes & Proceedings** New South Wales. Shelden, Pavel V. Vasiliev, 2017-12-19 Throughout history the powerful have created laws developed agencies to enforce those laws and established institutions to punish lawbreakers Maintaining the social order to their advantage resulted in the systematic repression of disadvantaged groups the dangerous classes The third edition retains a historical approach to exploring patterns of social control and through current examples demonstrates how those strategies continue today The authors trace the roots of race class and gender bias in how laws are written interpreted and applied The management of dangerous classes is not a recent phenomenon there is a long history of keeping those who derive the least advantage from the status quo and therefore pose the greatest threat under control There was and is one system of justice for the privileged and a very different system for the less privileged The criminal justice system from the law to daily

operations of the police courts and corrections generally comes down hardest on those with the least amount of power and influence and is the most lenient with those with the most power and influence The book raises critical questions What is a crime What is law Whose interests are served by the law and the criminal justice system What patterns are repeated generation after generation How does the criminal justice system relate to larger issues such as social inequality social class race and gender Contemplation of these topics contributes to informed public dialogue and careful deliberation about the present state and the future of criminal justice *Counter-Terrorism Act 2008* Great Britain, Stationery Office, The, 2008-12-11 The Counter Terrorism Act 2008 ISBN 9780105428084 amends the law in relation to terrorism in a number of distinct ways It includes provisions relating to the gathering and sharing of information for counter terrorism and other purposes including the disclosure of information to and by the intelligence services post charge questioning of terrorism suspects the prosecution of terrorism offences and punishment of convicted terrorists notification requirements for persons convicted of terrorism related offences powers to act against terrorist financing money laundering and certain other activities reviews of certain Treasury decisions inquiries dealing with sensitive information and various other miscellaneous measures New powers and offences will be created by the provisions of the Act and existing terrorism legislation will be amended and reformed
