*Advances in Modeling and Simulation* Zdravko Botev, Alexander Keller, Christiane Lemieux, Bruno Tuffin, 2022-11-30 This book celebrates the career of Pierre L. Ecuyer on the occasion of his 70th birthday. Pierre has made significant contributions to the fields of simulation modeling and operations research over the last 40 years. This book contains 20 chapters written by collaborators and experts in the field who, by sharing their latest results, want to recognize the lasting impact of Pierre's work in their research area. The breadth of the topics covered reflects the remarkable versatility of Pierre's contributions, from deep theoretical results to practical and industry-ready applications. The Festschrift features articles from the domains of Monte Carlo and quasi Monte Carlo methods, Markov chains, sampling, and low discrepancy sequences, simulation, rare events, graphics, finance, machine learning, stochastic processes, and tractability. **Group CBT for Psychosis** Tania

Lecomte, Claude Leclerc, Til Wykes, 2016 Group CBT for Psychosis offers the first published group therapy module of its kind and is suitable for a broad range of mental health professionals. Theory and Applications of Models of Computation Rahul

Jain, Sanjay Jain, Frank Stephan, 2015-04-15 This book constitutes the refereed proceedings of the 12th Annual Conference on Theory and Applications of Models of Computation TAMC 2014 held in Singapore in May 2015. The 35 revised full papers presented were carefully reviewed and selected from 78 submissions. The papers treat all topics relating to the theory and applications of models of computation, for example, recursion theory and mathematical logic, computational complexity and Boolean functions, graph theory, quantum computing, parallelism, and statistics, learning automata, and probabilistic models, parameterised complexity. **Mathematical Foundations of Computer Science 2014** Ersébet Csuhaj-Varjú, Martin

Dietzfelbinger, Zoltán Ésik, 2014-08-12 This two-volume set LNCS 8634 and LNCS 8635 constitutes the refereed conference proceedings of the 39th International Symposium on Mathematical Foundations of Computer Science MFCS 2014 held in Budapest, Hungary, in August 2014. The 95 revised full papers presented together with 6 invited talks were carefully selected from 270 submissions. The focus of the conference was on the following topics: Logic, Semantics, Automata Theory, of Programming, Algorithms, Complexity, Parallel and Distributed Computing, Quantum Computing, Automata, Grammars, and Formal Languages, Combinatorics on Words, Trees, and Games. *Complexity in Information Theory* Yaser S. Abu-Mostafa, 2012-12-06 The

means and ends of information theory and computational complexity have grown significantly closer over the past decade. Common analytic tools such as combinatorial mathematics and information flow arguments have been the cornerstone of VLSI complexity and cooperative computation. The basic assumption of limited computing resources is the premise for cryptography, where the distinction is made between available information and accessible information. Numerous other examples of common goals and tools between the two disciplines have shaped a new research category of information and complexity theory. This volume is intended to expose to the research community some of the recent significant topics along this theme. The contributions selected here are all very basic, presently active, fairly well established, and stimulating for

substantial follow ups This is not an encyclopedia on the subject it is concerned only with timely contributions of sufficient coherence and promise The styles of the six chapters cover a wide spectrum from specific mathematical results to surveys of large areas It is hoped that the technical content and theme of this volume will help establish this general research area I would like to thank the authors of the chapters for contributing to this volume I also would like to thank Ed Posner for his initiative to address this subject systematically and Andy Fyfe and Ruth Erlanson for proofreading some of the chapters

**Quasi-Monte Carlo Methods** Aicke Hinrichs,Peter Kritzer,Friedrich Pillichshammer,2024-07-12 This book presents the refereed proceedings of the 15th International Conference on Monte Carlo and Quasi Monte Carlo Methods in Scientific Computing that was held in Linz Austria and organized by the Johannes Kepler University Linz and the Austrian Academy of Sciences in July 2022 These biennial conferences are major events for Monte Carlo and quasi Monte Carlo researchers The proceedings include articles based on invited lectures as well as carefully selected contributed papers on all theoretical aspects and applications of Monte Carlo and quasi Monte Carlo methods Offering information on the latest developments in these highly active areas this book is an excellent reference resource for theoreticians and practitioners interested in solving high dimensional computational problems in particular arising in finance statistics and computer graphics **Using**

**Additional Information in Streaming Algorithms** Raffael Buff,2016-12-08 Streaming problems are algorithmic problems that are mainly characterized by their massive input streams Because of these data streams the algorithms for these problems are forced to be space efficient as the input stream length generally exceeds the available storage The goal of this study is to analyze the impact of additional information more specifically a hypothesis of the solution on the algorithmic space complexities of several streaming problems To this end different streaming problems are analyzed and compared The two problems most frequent item and number of distinct items with many configurations of different result accuracies and probabilities are deeply studied Both lower and upper bounds for the space and time complexity for deterministic and probabilistic environments are analyzed with respect to possible improvements due to additional information The general solution search problem is compared to the decision problem where a solution hypothesis has to be satisfied **Algorithms and Computation** Hon Wai Leong,Hiroshi Imai,Sanjay Jain,1997-11-21 This book constitutes the refereed proceedings of the 8th International Symposium on Algorithms and Computation ISAAC 97 held in Singapore in December 1997 The 42 revised full papers presented were selected from a total of 98 submissions The scope of the volume spans the whole area of
