Constraints On Reflexivization In Mandarin Chinese:

Constraints on Reflexivization in Mandarin Chinese Haihua Pan, 2013-11-26 First Published in 1997 Mandarin ziji has challenged many syntacticians to probe for its properties and specifically its relationship to Binding Condition A BCA which dictates that an anaphor must be bound by a syntactically prominent or c commanding noun phrase in a very local domain Governing Category or GC This book argues for the separation of contrastive and non contrastive reflexives This book will also show that ben ren shen and their compound forms being inherently contrastive differ from ziji and its compound forms in the contexts accessible to them the latter can access linguistic contexts only but the former can also access utterance situations and world knowledge

The Acquisition of Anaphora in Child Mandarin Ruya Li, 2024-05-10 The Acquisition of Anaphora in Child Mandarin explores how Mandarin speaking children s interpretation of the reflexive ziji and their use of null arguments can be understood under the notions of locality and prominence This book investigates the interpretation of ziji and the use of null subjects and null objects by experimenting on Mandarin speaking children and adults using a range of experimental techniques such as the truth value judgment task the picture identification task and the story telling task The book provides evidence to show that reflexive binding and argument dropping are determined by the interplay between universal principles and language specific properties It shows that children at the age of 4 make an adult like distinction between the anaphoric and logophoric interpretations of ziji The former is subject to the locality condition manifested by the blocking effect on the long distance binding of ziji whereas the latter is free from the locality condition and closely related to the understanding of the false beliefs of others This book is an important contribution to language acquisition research and can serve as a valuable reference for graduate students and researchers in the field of language acquisition Chinese linguistics psycholinguistics and cognitive science

Reflexive Pronouns: A Theoretical and Experimental Synthesis Darcy Sperlich, 2021-01-04 This book presents a comprehensive picture of reflexive pronouns from both a theoretical and experimental perspective using the well researched languages of English German Dutch Chinese Japanese and Korean In order to understand the data from varying theoretical perspectives the book considers selected syntactic and pragmatic analyses based on their current importance in the field The volume consequently introduces the Emergentist Reflexivity Approach which is a novel theoretical synthesis incorporating a sentence and pragmatic processor that accounts for reflexive pronoun behaviour in these six languages Moreover in support of this model a vast array of experimental literature is considered including first and second language acquisition bilingual psycholinguistic neurolinguistic and clinical studies It is through both the intuitive and experimental data linguistic theorizing relies upon that brings out the strengths of the modelling adopted here paving new avenues for future research In sum this volume unites a diverse array of the literature that currently sits largely divorced between the theoretical and experimental realms and when put together a better understanding of reflexive pronouns under the auspices of the Emergentist Reflexivity Approach is forged

Locality and Logophoricity Isabelle Charnavel, 2019 Locality and Logophoricity investigates what the distribution of pronominal expressions in various languages can tell us about the structure of the human language faculty The exploration of this question in the past fifty years has led to the development of a general theory of referential dependency namely Binding Theory This book focuses on Condition A of this theory which concerns referentially dependent expressions such as English herself French elle m me or Mandarin ziji Specifically it tackles an issue of apparent ambiguity presented by many of these reflexives across languages in a large number of unrelated languages we observe that the same reflexive form must obey either syntactic constraints or discourse constraints related to perspective The specific aim of the book is to describe and explain this widespread dual behavior of reflexives A detailed empirical investigation based mainly on systematically collected French English Icelandic Mandarin and Korean data leads the author to propose a unified solution to this issue This proposal has consequences both for Binding Theory and for the theory of logophoricity which addresses the impact of perspective on linguistic systems

Empirical Approaches to Linguistic Theory Britta Stöcker, Sam Featherston, 2012-10-01 The mental representation of language cannot be directly observed but must be inferred and modelled from its effects at second hand Linguists have traditionally responded to this in two ways either going for a fairly data light approach and valuing theoretical creativity or pursuing just those goals for which data is available and trusting to data driven descriptive work More recently advances in technology and experimental techniques have made data gathering easier and more accessible so that a theoretically informed but empirically based approach is rapidly growing in popularity This synthesis permits linguists to combine the intellectual hypothesis generation of the theoreticians with the ability to deliver hard answers of the empiricist This volume is a collection of papers in this direction using mostly experiment methods to yield insights into syntactic and semantic structures

language processing and acquisition Papers report corpus data neurological investigations child language studies and fieldwork from minority languages Key Issues in Chinese as a Second Language Research Istvan Kecskes, Chaofen Sun, 2017-06-26 Key Issues in Chinese as a Second Language Research presents and discusses research projects that serve as theoretical grounding for improving the teaching and learning of Chinese as a second language CSL in order to help researchers and practitioners better understand the acquisition development and use of CSL With the exception of the first chapter which is state of the art each chapter makes an attempt to bring together theory and practice by focusing on theory building and theory application in practice The book is organized around areas where most future research is needed in CSL phonology semantics grammar and pragmatics Consisting of contributions from an international group of scholars working on cutting edge research this is the ideal text for researchers graduate students and practitioners in the area of Chinese as a second or foreign language **Between Syntax and Semantics** C.T. James Huang, 2010-04-15 This indispensable volume contains articles that represent the best of Huang's work on the syntax semantics interface over the last two decades It includes three general topics a questions indefinites and quantification b anaphora c lexical structure and the syntax of events *Long Distance Reflexives* Peter Cole, Gabriella Hermon, C.-T. James Huang, 2000-10-17 This new volume serves to focus and clarify the debate surrounding long distance reflexives by examining the role of syntax semantics and pragmatics discourse in the use of long distance reflexives in a variety of languages Graduate students upper class undergraduates theoretical linguists computational linguists psycholinguists and linguists at large will find this an important tool Syntacticians as well as specialists in language acquisition and processing will find the volume central to their work The book is also of great value to those interested in Asian languages especially Chinese It will serve as primary reading material for seminars on anaphora Among its key features it discusses a broad range of questions about syntactic categories and presents a number of theoretical frameworks *Encoding and Navigating Linguistic Representations in Memory* Claudia Felser, Colin Phillips, Matthew Wagers, 2017-03-22 Successful speaking and understanding requires mechanisms for reliably encoding structured linguistic representations in memory and for effectively accessing information in those representations later Studying the time course of real time linguistic dependency formation provides a valuable tool for uncovering the cognitive and neural basis of these mechanisms This volume draws together multiple perspectives on encoding and navigating structured linguistic representations to highlight important empirical insights and to identify key priorities for new research in this area **Reflexives** Zygmunt Frajzyngier, Traci S. research on this grammatical phenomenon It has emerged as one of the most productive topics of multi and interdisciplinary research such as cognitive science artificial intelligence and human language technology theoretical cognitive corpus and computational linguistics philosophy of language psycholinguistics and cognitive psychology Anaphora plays a major role in understanding a language and also accounts for the cohesion of a text Correct interpretation of anaphora is necessary in all high level natural language processing applications Given the growing importance of the study of anaphora in the last few decades it has emerged as the frontier area of research This is evident from the high quality submissions received for the 7 DAARC from where the 10 excellent reports on search findings are selected for this volume These are the regular papers that were presented at DAARC

Expressing the Self Minyao Huang, Katarzyna Jaszczolt, 2018 This book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume's focus on expressing the self however is not directly motivated by an interest in the grammar or lexicon but instead stems from philosophical discussions on the special status of thoughts about oneself known as de se thoughts It is this interdisciplinary understanding of expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other This unprecedented juxtaposition results in a novel method of approaching de se and de se expressions in which research methods from linguistics and philosophy inform each other The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science

Prominence and Locality in Grammar Jianhua Hu,2019-06-06 This book challenges the current consensus on the analysis of wh questions and reflexives from the perspective of the syntax semantics interface An integrated approach incorporating analyses of the interaction between different levels of linguistic knowledge is proposed It argues that the derivation and interpretation of wh questions and reflexives are not purely syntactic in nature but are regulated by principles operating at the syntax semantics interface Two general principles underlying our knowledge of language and cognition are proposed in this work One is the Principle of Locality and the other is the Principle of Prominence It shows that although wh quantification and reflexivization belong to two different domains of study in generative grammar their derivation and interpretation are basically constrained by the complex interaction between prominence and locality in grammar The first part of the book discusses how wh questions are formed and interpreted in Chinese and English and shows that the formation and interpretation of wh questions are constrained by the interaction between prominence and locality It is shown that in wh interpretation prominence is used to define the set generators so as to licence other wh words in the pair list reading in multiple wh questions It also discusses wh island effects in English and Chinese and unlike previous claims made in the literature cf Huang 1982a 1982b it argues that the so called wh island effects in English are also observed in Chinese The second part of the book investigates the role that prominence and locality play in reflexive binding It is shown that in reflexive binding the binding domain of the reflexive is defined by prominence It proposes a unified account for both the noncontrastive compound reflexive and the bare reflexive in Chinese and shows that they are constrained by the same reflexive binding condition proposed in this work though they employ different definitions of the most prominent NPs to

determine their binding domains Prominence and Locality in Grammar The Syntax and Semantics of Wh Questions and Reflexives is an important theoretical contribution to the syntax semantics interface studies and can serve as a valuable text for graduate students and scholars in the field of Chinese linguistics and cognitive science *Architecture of the Periphery in Chinese* Victor Pan, 2019-01-15 *Architecture of the Periphery in Chinese* offers a comprehensive survey on the fine structure of the sentence peripheral domain in Mandarin Chinese from a cartographic perspective Different functional projections hosting sentence final particles implicit operators and other informational components are hierarchically ordered according to the Subjectivity Scale Constraint functioning at syntax discourse interface Three questions will be essentially addressed What is the order How to determine such an order Why such an order This research not only gives a thorough examination of the peripheral elements in Chinese but also improves the general understanding of the ordering issue in the left periphery crosslinguistically This book is aimed at scholars interested in Chinese syntax or generative syntax
