**Second Victim** Sidney Dekker, 2013-03-26 How do people cope with having caused a terrible accident How do they cope when they survive and have to live with the consequences ever after We tend to blame and forget professionals who cause incidents and accidents but they are victims too They are second victims whose experiences of an incident or adverse event can be as traumatic as that of the first victims Yet information on second victimhood and its relationship to safety about what is known and what organizations might need to do is difficult to find Thoroughly exploring an emerging topic with great relevance to safety culture **Second Victim Error Guilt Trauma and Resilience** examines the lived experience of second victims It goes through what we know about trauma guilt forgiveness and injustice and how these might be felt by the second victim The author discusses how to conduct investigations of incidents that do not alienate second victims or make them feel even worse It explores the importance support and resilience and where the responsibilities for creating it may lie Drawing on his unique background as psychologist airline pilot and safety specialist and his own experiences with helping second victims from a variety of backgrounds Sidney Dekker has written a powerful moving account of the experience of the second victim It forms compelling reading for practitioners risk managers human resources managers safety experts mental health workers regulators the judiciary and many other professionals Dekker provides a strong theoretical background to promote understanding of the situation of the second victim and solid practical advice about how to deal with trauma that continues after an event leading to preventable harm or even avoidable death of a patient consumer or colleague Listen to Sidney Dekker speak about his book

**Changing Organizations from Within** Robin C. Stevens, 2016-04-08 Organizational change is often insider led and supported by internal consultants and change agents Most of what is written about change comes from the perspective of external consultants or from academics researching the activities of those with insider change roles **Changing Organizations from Within** is unusual in providing a range of authentic insider accounts The editors define insiders as employees who lead and support change efforts within their own organizations and those psychoanalytically

aware external consultants external insiders who work closely with organizations and use the dynamics of transference and projection in their relationships with clients to illuminate organizational issues Each chapter is written by an author with experience of different kinds of insider relationships with their client organizations Some work inside as employees Some are external consultants whose work involves developing insightful insider perspectives The book's editors and several of the authors are graduates or have been faculty members of London's Tavistock Institute Advanced Organizational Consultation programme with experience of running development programmes for consultants and of coaching insiders Changing Organizations from Within examines the pulls on role and identity that can easily undermine competence and practice Understanding the system psychodynamics present in organizations helps consultants and change agents to make use of an insider perspective without becoming enmeshed in the client organization's regressive and inertial dynamics The authors provide practical advice to help insiders navigate organizational space make sense of tricky situations and work more mindfully to help organizations change

**Ethnographic Research in the Construction Industry** Sarah Pink, Dylan Tutt, Andrew Dainty, 2013 The construction industry as a workplace is commonly seen as problematic for a number of reasons including its worrying health and safety record the instability of its workforce and the poorly regulated nature of the sector It is surprising therefore that the sector and its working practices remain so under theorised Now though there is a growing interest in and awareness of the utility of an ethnographic approach to the construction industry Ethnographic Research in the Construction Industry draws together in one volume a set of expert contributions which demonstrate how social science perspectives rooted in ethnographic research on construction sites and with construction workers themselves can generate fresh insights into the social cultural and material ways that the industry and conditions of work in it are experienced and played out Each chapter develops discussion on the basis of an ethnographic case study to examine how theoretically informed ethnographic research can help us understand industry problems and can challenge common perceptions of the construction industry This book will be of interest to students and scholars of anthropology sociology geography and organization studies as well as those from the built environment and related applied fields
