The Cambridge Handbook of Parenting Amanda Sheffield Morris, Julia Mendez Smith, 2022-12-15 Parenting is a critical influence on the development of children across the globe This handbook brings together scholars with expertise on parenting science and interventions for a comprehensive review of current research It begins with foundational theories and research topics followed by sections on parenting children at different ages factors that affect parenting such as parental mental health or socioeconomic status and parenting children with different characteristics such as depressed and anxious children or youth who identify as LGBTQ It concludes with a section on policy implications as well as prevention and intervention programs that target parenting as a mechanism of change Global perspectives and the cultural diversity of families are highlighted throughout Offering in depth analysis of key topics such as risky adolescent behavior immigration policy father engagement family involvement in education and balancing childcare and work this is a vital resource for understanding the most effective policies to support parents in raising healthy children

Readings in Family Theory Thomas R. Chibucos, Randall W. Leite, David L. Weis, 2005 Readings in Family Theory is an anthology of classic and contemporary articles that provides a context for student learning by

demonstrating how theory fits into the overall process of scientific research on families The book provokes student interest in theory by providing examples of the scholarly application of family theory to compare how people use similar processes in everyday life Using this contextual orientation the selected readings examine nine prevalent theoretical perspectives from both family and human development sciences

Communication and Parenting Skills Judith Frankel D'Augelli, Joan M. Weener, 1979

Developmental Psychopathology, Risk, Resilience, and Intervention Dante Cicchetti, 2016-02-29

Examine the latest research merging nature and nurture in pathological development Developmental Psychopathology is a four volume compendium of the most complete and current research on every aspect of the field Volume Four Genes and Environment focuses on the interplay between nature and nurture throughout the life stages and the ways in which a child's environment can influence his or her physical and mental health as an adult The discussion explores relationships with family friends and the community environmental factors like poverty violence and social support the development of coping mechanisms and more including the impact of these factors on physical brain development This new third edition has been fully updated to incorporate the latest advances and to better reflect the increasingly multilevel and interdisciplinary nature of the field and the growing importance of translational research The relevance of classification in a developmental context is also addressed including DSM 5 criteria and definitions Advances in developmental psychopathology are occurring increasingly quickly as expanding theoretical and empirical work brings about dramatic gains in the multiple domains of child and adult development This book brings you up to date on the latest developments surrounding genetics and environmental influence including their intersection in experience dependent brain development Understand the impact of childhood adversity on adulthood health Gauge the effects of violence poverty interparental conflict and more Learn how peer family and community relationships drive development Examine developments in prevention science and future research priorities Developmental psychopathology is necessarily interdisciplinary as development arises from a dynamic interplay between psychological genetic social cognitive emotional and cultural factors Developmental Psychopathology Volume Four Genes and Environment brings this diverse research together to give you a cohesive picture of the state of knowledge in the field

Psycho-Legal Concepts for Parenting in Child Custody and Child Protection Vol. 3 Don Tustin, 2024-12-02

This book identifies a number of topics that arise in child protection where assessments of individual families are required The author opines that it is essential to use structured instruments when making assessments on complex topics about risk to reduce bias and to maximise objectivity The author summarises criteria that are required for an assessment instrument to be viewed by scientists as being objective The book proposes that introducing more objective assessment instruments into the field of child protection will improve the focus and brevity of assessment reports and enable setting of thresholds that distinguish between families who provide good enough parenting from families who should be referred for parenting education and from parents who are unfit parents The author identifies a number of topics that

commonly arise in cases where maltreatment of children is alleged reviews literature and proposes checklists that can be used to gather data and to form a basis for developing validated assessment instruments for use in child protection The topics identified are relevant both to therapists as parenting practices can be changed using focused therapy and for legal assessment purposes as topics have been shown to be related to legal concerns about the safety and welfare of children The overall aim of this book is to encourage greater use of scientific assessment approaches in the field of child protection

Affect Regulation and the Development of Psychopathology Susan J. Bradley, 2003-07-16 This pioneering work sets forth an integrative model for understanding the development of psychopathology What makes a person vulnerable to mental illness in general To specific clinical syndromes Why are some individuals highly prone to emotional distress Seeking a deeper understanding of these compelling questions the volume highlights the central role of affect regulation or the failure to develop functional strategies for regulating affect in a wide range of disorders An extensive body of psychological and neurobiological knowledge is synthesized to illuminate the processes by which this key capacity may be undermined in the developing child Bridging the gap between biological and psychodynamic perspectives on psychopathology the book has important implications for research prevention and treatment

Lost and Found Paul Florsheim, David Moore (Professor of psychology), 2020 *Lost and Found* shares the stories of several young men becoming parents in an era where family is being re defined while our understanding of what it means to be a father in particular is in flux It offers a model of the good enough father to counter the all or nothing stereotypes of the deadbeat or absentee dad versus the ideal father figure popularized in old sitcoms The authors also offer detailed descriptions of what can be done to help young fathers and mothers create stable home environments for their children whether the parents are together or not

Family Ties and Aging Ingrid Arnet Connidis, 2010 This advanced textbook covers issues of family ties and aging broadly the goal being to provide an integrated and thorough representation of what we know from the current research Whereas books on families and aging have traditionally focused on ties to a spouse and to children and grandchildren *Family Ties Aging* is more extensive and more reflective of contemporary society The text includes groups and relationships that typically receive short shrift exploring such neglected populations as single divorced and childless older people and their

family relationships as well as sibling relationships among the elderly live in partnerships not formalized by marriage and the kinds of family ties forged by gay and lesbian persons over the life course The book weaves the vast range of information we now have about the many facets of family relationships and aging into a critical comprehensive and integrated whole
