resource for undergraduate and graduate students in archaeology and related disciplines **Archaeological Heritage Management in the Modern World** Henry Cleere, 2012-11-12 Representing the latest thinking in this fast moving and often emotive field this book offers a remarkably comprehensive international coverage of the public aspects of archaeology The process of survey and inventory rescue and archaeology conservation and protection have until now been studied largely on the basis of individual countries and their administrative and legislative structures Now by virtue of its broad geographical coverage this volume provides many rights and guidelines not hitherto brought into focus the history and philosophy of archaeological heritage management case studies regional national and specialised and the training and qualification of archaeologists for heritage management This book is essential reading for all students researchers and practitioners concerned with archaeological heritage management public administration and the legal community whose work involves archaeological issues **Can There be a Philosophy of Archaeology?** William Harvey Krieger, 2006-01-01 Can There Be a Philosophy of Archaeology provides a historical and philosophical analysis of the rise and fall of the philosophical movement known as logical positivism focusing on the effect of that movement on the budding science of archaeology Significant problems resulted from the grafting of logical positivism onto what became known as processual or new archaeology and as a result of this failure archaeologists distanced themselves from philosophers of science believing that archaeology would be best served by a return to the dirt By means of a thorough analysis of the real reasons for failures of logical empiricism and the new archaeology as well as a series of archaeological case studies Krieger shows the need for the resumption of dialogue and collaboration between the two groups In an age where philosophers of science are just beginning to look beyond the standard examples of scientific practice this book demonstrates that archaeological science can hold its own with other sciences and will be of interest to archaeologists and philosophers of science alike The Oxford Handbook of Material Culture Studies Dan Hicks, Mary C. Baugh, 2013-11-11 Regional approaches to the study of prehistoric exchange have generated much new knowledge about intergroup and regional interaction The American South west and Mesoamerica Systems of Prehistoric Exchange is the first of two volumes that seek to provide current information regarding regional exchange on a continental basis From a theoretical perspective these volumes provide important data for the comparative analysis of regional systems relative to sociopolitical organization from simple hunter gatherers to those of complex sociopolitical entities like the state Although individual regional exchange systems are unique for each region and time period general patterns emerge relative to sociopolitical organization Of significant interest to us are the dynamic processes of change stability rate of growth and

collapse of regional exchange systems relative to sociopolitical complexity These volumes provide basic data to further our understanding of prehistoric exchange systems The volume presents our current state of knowledge about regional exchange systems in the American Southwest and Mesoamerica Each chapter synthesizes the research findings of a number of other researchers in order to provide a synchronic view of regional interaction for a specific chronological period A diachronic view is also provided for regional interaction in the context of the developments in regional sociopolitical organization Most authors go beyond description by proposing alternative models within which to understand regional interaction The book is organized by geographical and chronological divisions to provide units of the broader mosaic of prehistoric exchange systems

The Identity of Man Grahame Clark, 2023-07-07 First published in 1982 in the Identity of Man Professor Clark considers a problem which has puzzled men from the authors of the books of the Old Testament to Charles Darwin and his successors how to reconcile the animal appetites of men with their awareness of gods and their intimations of immortality What is it that differentiates us most decisively from the other Primates He argues that the distinction is to be found primarily in the fact that whereas the behaviour of other animals is largely dictated by their genes we follow or reject cultural patterns inherited through belonging to societies shaped by history Whereas other animals behave in a broadly homogenous way within breeding populations men

adhere to the diversity of cultural traditions observed by ethnographers among peoples surviving on their fringes of the modern world and reconstructed by archaeologists from the cultural fossils of antiquity Grahame Clark has written an original and fascinating study drawing both on his lifetime s experience of archaeological material and on a wide range of other sources to throw new light on the question of man s identity This is a must read for archaeologists and anthropologists
