Designing Government F. Pearl Eliadis, Margaret M. Hill, Michael Howlett, 2005 This collection of readings examines the tools used by today's government to achieve legitimacy, effectiveness and accountability. The contributors examine the instrument choice perspective on government and public policy over the past two decades, moving beyond the preoccupation with deregulation and efficiency to trace the complex relationships between instrument choices and governance. Readers are encouraged to consider factors in the design of complex mixes such as issues of redundancy, context, the rule of law and accountability. These latter factors are especially central in today's world to the design and implementation of effective instrument choices by governments and ultimately to good governance. The authors conclude that instrument choice itself is integral to government and governance.
