Modern

Architecture and Climate Daniel A. Barber, 2023-04-11 How climate influenced the design strategies of modernist architects Modern Architecture and Climate explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control He looks at projects by well known architects such as Richard Neutra Le Corbusier Lcio Costa Mies van der Rohe and Skidmore Owings and Merrill and the work of climate focused architects such as MMM Roberto Olgyay and Olgyay and Cliff May Drawing on the editorial projects of James Marston Fitch Elizabeth Gordon and others he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design Extensively illustrated with archival material Modern Architecture and Climate provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today's zero carbon design

The Modern Garden Pierluigi Serraino, 2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra's Perkins House in its Pasadena hillside setting and Frank Lloyd Wright's Marin County Civic Center where

environment and building come together in an extraordinary modernist vision of the future made real. This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole. Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals. **A Language of**

Contemporary Architecture Rafael Luna, Dongwoo Yim, 2023-05-05 As a way to understand the contemporary project in architecture this book provides an index of ideas, theories, projects and definitions that string into a methodology for evaluating the contemporary language of architecture described as contemporism through a review of topology, form and typology, system and elements. The contemporary project has been trying to answer the postmodern question of how to move beyond modernism through a thread of architectural styles that tried to respond to deficiencies from the modern promise and contextual changes. Yet the question remains: should this ongoing struggle to move beyond modernism be a stylistic battle? Has the present architectural practice ever left the modernist tendencies and is there a structure for a contemporary language in architecture? This book presents a collection of highly illustrated projects that have worked under these parameters to break away from modernism in order to present a holistic integration of topology and typology as a language for contemporism. The index is illustrated with individual spreads which can be read sequentially or independently and encourages the reader to make their own connections. It also includes interviews and contributions from Toyo Ito, Anthony Vidler, Ben van Berkel, Christian Kerez and Greg Lynn. This book is essential reading for undergraduate and graduate students in architecture. **On the Wings of Modernism** Robert Allen Nauman, 2004 Nauman argues that contrary to the

technological and teleological interpretations presented by the polemicists of international style modernism, the academy's actual production was squarely grounded in bureaucratic and political processes. He demonstrates that selection of both the site and the design firm was the result of political maneuverings involving the U.S. military leadership. **BOOK JACKET**

Hartman-Cox Hartman-Cox Architects, 1994 THE MASTER ARCHITECT SERIES is a series of monographs on some of the greatest architects and architectural firms of our time. Each monograph will contain 256 pages displaying several hundred color photographs, drawings, sketches and renderings. Although primarily a pictorial essay, the books will contain selected projects described in concise detail along with a critique or overview of the firm, a resume of the partners and a comprehensive bibliography. **American Architects and Texts** Juan Pablo Bonta, 1996 In this volume the author analyzes

400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects. The text includes a ranked list of the 100 most famous architects. *Summerson and Hitchcock* Frank E. Salmon, 2006 Publisher description *The Urbanism of Frank Lloyd*

Wright Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city.

Stunningly comprehensive *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's

work and offers new and important perspectives on the history of modernism Neil Levine places Wright's projects produced over more than fifty years within their historical cultural and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City Rather Levine reveals Wright's larger more varied interesting and complex urbanism demonstrated across the span of his lengthy career Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial mixed use civic and cultural centers for Chicago Madison Washington Pittsburgh and Baghdad Levine demonstrates Wright's place among the leading contributors to the creation of the modern city Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis Lavishly illustrated with drawings plans maps and photographs this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives The Urbanism of Frank Lloyd Wright will serve as one of the most important books on the architect for years to come
