Constancy and Change in Architecture Malcolm Quantrill, Bruce Webb, 1991 **The Baroque in Architectural Culture, 1880-1980** Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture [Subject Guide to Children's Books in Print](#)

Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm an experimental agricultural project designed to benefit farm workers displaced by the industrialization of agriculture in the Rio Grande Valley of Texas Yet despite its promise the very institutions that created Blueprint Farm terminated the project after just four years 1987 1991 In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm

He reconstructs the conflicting interests and goals of the founders including Jim Hightower and the Texas Department of Agriculture Laredo Junior College and the Center for Maximum Potential Building Systems and shows how ironically they unwittingly suppressed the self determination of the very farm workers the project sought to benefit From the instructive failure of Blueprint Farm Moore extracts eight principles for a regenerative architecture which he calls his nonmodern manifesto

Architecture and Anthropology Adam Jasper,2020-05-21 Both architecture and anthropology emerged as autonomous theoretical disciplines in the 18th century enlightenment Throughout the 19th century the fields shared a common icon the primitive hut and a common concern with both routine needs and ceremonial behaviours Both could lay strong claims to a special knowledge of the everyday And yet in the 20th century notwithstanding genre classics such as Bernard Rudofsky s *Architecture without Architects* or Paul Oliver s *Shelter* and various attempts to make architecture anthropocentric such as Corbusier s *Modulor* disciplinary exchanges between architecture and anthropology were often disappointingly slight This book attempts to locate the various points of departure that might be taken in a contemporary discussion between architecture and anthropology The results are radical post colonial theory is here counterpoised to 19th century theories of primitivism archaeology is set against dentistry fieldwork is juxtaposed against indigenous critique and climate science is applied to questions of shelter This publication will be of interest to both architects and anthropologists The chapters in this book were originally published within two special issues of *Architectural Theory Review*
