Constructing Human Rights In The Age Of Globalization:

Constructing Human Rights in the Age of Globalization Mahmood Monshipouri, Neil Englehart, Andrew J. Nathan, Kavita Philip, 2015-06-01 Both human rights and globalization are powerful ideas and processes capable of transforming the world in profound ways. Notwithstanding their universal claims, however, the processes are constructed and they draw their power from the specific cultural and political contexts in which they are constructed. Far from bringing about a harmonious cosmopolitan order, they have stimulated conflict and opposition. In the context of globalization, as the idea of human rights has become universal, its meaning has become one more terrain of struggle among groups with their own interests and goals. Part I of this volume looks at political and cultural struggles to control the human rights regime that is the power to construct the universal claims that will prevail in a territory with respect to property, the state, the environment, and women. Part II examines the dynamics and counterdynamics of transnational networks in their interactions with local actors in Iran, China, and Hong Kong. Part III looks at the prospects for fruitful human rights dialogue between competing universalisms that by definition are intolerant of contradiction and averse to compromise.

Creating Human Rights Lisa S. Alfredson, 2013-03-26 Selected by Choice magazine as an Outstanding Academic Title. *Creating Human Rights* offers the first systematic study of a pioneering women's refugee movement and its challenge as an international trigger case to more conventional paths toward human rights policy development. Lisa S. Alfredson argues that such cases, which unfold in the context of a specific country and have profound impacts on international human rights efforts, have been neglected in research and pose a challenge to recent theorizing on human rights change. In the early 1990s, Canada witnessed the emergence of the world's first comprehensive refugee policy for women who were seeking protection from female-specific forms of violence: rape, domestic abuse, public stoning of adulterers, genital mutilation, while challenging a

gender biased system Close examination of this novel movement Alfredson contends provides crucial insights into why and how states may articulate new human rights that set international precedents Analyzing original empirical data and sociopolitical historical trends the book documents the decisive global impacts of the movement while shedding light on the paradox of noncitizen politics and asylum seekers little recognized political strength Contrary to expectation findings suggest transnational networks and pressures are not required for some forms of change Rather international trigger cases illuminate a range of other key actors and advocacy strategies leading subsequently to a more comprehensive understanding of human rights acceptance In the case of the women s refugee movement the convergence of human rights and noncitizen politics points toward a new dimension for human rights scholarship that in the current age of globalization is becoming critically important

Towards Progress and Peace Otto Newman, Richard De Zoysa, 2005-05 Globalization has brought wealth and progress to most of the world At the same time population levels have mushroomed urban centers greatly expanded inequalities sharpened and with the poor and workless aggrieved at the widening gap resistance has often turned violent Though terrorism is multi causal the urban ghettos provide ready made recruiting ground for insurgents The cause of social justice and human rights has visibly faltered under the impact of intensifying competition political radicalization together with the upsurge of fundamentalist creeds Manifestly time has come to take stock before tensions will worsen Alarming as portends may seem as events such as the Ukrainian Orange Revolution as well as the spontaneous aid initiatives in response to the tsunami disaster demonstrate it is no less apparent that one can look forward towards realistic prospects for progress and peace

Human Rights Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations

member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic **Sovereignty, State Failure and Human Rights** Neil Englehart, 2017-05-08 This book argues that the effectiveness of the state apparatus is one of the crucial variables determining human rights conditions and that state weakness and failure is responsible for much of the human rights abuses we see today Weak states are unable to control their own agents or to police abuses by private actors resulting in less accountability and more abuse By contrast stronger states have greater capacities to protect human rights even strong authoritarian states tend to have better human rights conditions than weak ones The first two chapters of the book develop the theoretical connections between international law sovereignty states and rights and the consequences of state failure for these relationships The empirical chapters Chapters 3 6 test the validity of these theoretical claims employing a multi method approach that combines quantitative and qualitative methods Englehart uses case studies of Afghanistan Burma Myanmar and the Indian state of Bihar to analyze types and patterns of state failure based on analysis of NGO reports archival research primary and secondary texts and interviews and field research Examining what happens to human rights when states fail the book concludes with implications for scholars and activists concerned with human rights This book will be of great use to scholars of international relations comparative politics human rights law and state sovereignty *Human Rights and Social Work* Jim Ife, 2012-05-21 This engaging and enlightening third edition explores how the principles of human rights inform contemporary social work practice *Human Rights in the World Community* Richard Pierre Claude, Burns H. Weston, 2006-10-04 This unique textbook seeks to promote students critical and analytical skills and to provide a teacher friendly resource featuring in depth scholarly introductions to each chapter multiple questions for discussion and reflection and an extensive bibliography and annotated filmography **Constructing Human Rights in the Age of Globalization** Meds Monshipouri, 2004 **Human Rights in the World Community** Burns H. Weston, Anna Grear, 2016-04 Designed for educational use in international relations law political science economics and philosophy classes Human Rights in the World Community treats the full range of human rights issues including implementation problems and processes involving international national and nongovernmental action Now with online appendices **Language, Agency, and Politics in a Constructed World** Francois Debrix, 2015-05-20 Language matters in international relations Constructivists have contributed the insight that global politics is shaped by the way agents narrate history and produce discourses about themselves and about the world This insight has induced a profound reexamination of assumptions in the study of international relations The contributors to this volume examine Part I the critical linguistic discursive techniques of postmodernists and constructivists and apply them Part II to international relations **Language, Agency, and Politics in a Constructed World** François Debrix, 2003-05-29 Language matters in international relations Constructivists have contributed the insight that global politics is shaped by the way agents narrate history and produce discourses about

themselves and about the world This insight has induced a profound reexamination of assumptions in the study of international relations The contributors to this volume examine Part I the critical linguistic discursive techniques of postmodernists and constructivists and apply them Part II to international relations **Human Rights** Judith Blau,Alberto Moncada,2015-12-03 In an era of globalization and greater connectivity human rights have come to the fore Human rights depend on treaties but also increasingly on local and national laws and grassroots activism The authors provide a basic introduction to human rights and they unveil long standing yet intensifying obstacles to attaining them most notably the opposing logics of capitalism and of solidarity and collective struggles They suggest ways to overcome these contradictions and create greater participation by the U S in the international community American Foreign Policy in a Globalized World David P. Forsythe,Patrice C. MacMahon,Andrew Wedeman,2013-05-13 In this volume several leading foreign policy and international relations experts consider the long term prospects and implications of US foreign policy as it has been shaped and practiced during the presidency of George W Bush The essays in this collection based on the research of well respected scholars such as Ole Holsti Loch Johnson John Ruggie Jack Donnelly Robert Leiber Karen Mingst and Edward Luck offer a clear assessment while US resources are substantial Washington s ability to shape outcomes in the world is challenged by its expansive foreign policy goals its exceptionalist approach to international relations serious questions about the limits of its hard power resources as well as fundamental changes in the global system Illustrating one of the central ironies of the contemporary situation in foreign affairs and international relations that at the very time of the unipolar moment the world has become globalized to such an extent that the unilateralism of the Bush Administration leads as much to resistance as it does to coercion compliance and cooperation American Foreign Policy in a Globalized World will be of interest to students and scholars of politics and international relations Mobilizing for Human Rights Beth A. Simmons,2009-08-31 This volume argues that international human rights law has made a positive contribution to the realization of human rights in much of the world Although governments sometimes ratify human rights treaties gambling that they will experience little pressure to comply with them this is not typically the case Focusing on rights stakeholders rather than the United Nations or state pressure Beth Simmons demonstrates through a combination of statistical analyses and case studies that the ratification of treaties leads to better rights practices on average Simmons argues that international human rights law should get more practical and rhetorical support from the international community as a supplement to broader efforts to address conflict development and democratization *The Human Right to a Green Future* Richard P. Hiskes,2009 This book presents an argument for establishing environmental human rights as the legitimate possession of both present and future generations It uses these rights to clean air water and soil to make an argument for justice across generations that is for recognizing the obligation that present generations have to preserve the environment and natural resources for future generations Freedom from Poverty Daniel P.L. Chong,2011-06-06 Human rights advocacy in the West is changing Before

the turn of the century access to goods such as food housing and health care while essential to human survival were deemed outside of the human rights sphere Traditional human rights institutions focused on rights in the political arena that could be defended through legal systems In *Freedom from Poverty* Daniel P L Chong examines how today s nongovernmental organizations are modifying human rights practices and reshaping the political landscape by taking up the cause of subsistence rights This book outlines how three types of NGOs human rights social justice and humanitarian organizations are breaking down barriers by incorporating access to economic and social goods into national laws and advancing subsistence rights through nonjuridical means These NGOs are using rights not only as legal instruments but as moral and rhetorical implements to build social movements shape political culture and guide development work Rights language is now invoked in churches political campaigns rock concerts and organizational mission statements Chong presents a social theory of human rights to provide a framework for understanding these changes and defending the legitimacy of these rights *Freedom from Poverty* analyzes new trends in the evolution of human rights by combining constructivist and postpositivist legal approaches This book provides valuable concepts to human rights practitioners political scientists antipoverty advocates and leaders who are serious about ending widespread privation and disease

Globalization and Local Adaptation in International Trade Law Pitman B. Potter, 2011-01-01 The trade principles of Western liberal democracies are at the core of international trade law regimes and standards Are non Western societies adopting international standards or are they adapting them to local norms and cultural values This volume employs the paradigm of selective adaptation to explain the reception of international trade law

in the Pacific Rim Drawing on examples from China Japan Thailand and North America the contributors show that formal acceptance of international trade standards does not necessarily translate into uniform enforcement and acceptance at the local level They offer compelling evidence that non uniform compliance will be a legitimate outcome of the globalization of international trade law
