Mack C. Shelley, Larry D. Yore, Brian B. Hand, 2008-12-30 Statistical models attempt to describe and quantify relationships between variables In the models presented in this chapter there is a response variable sometimes called dependent variable and at least one predictor variable sometimes called independent or explanatory variable When investigating a possible cause and effect type of relationship the response variable is the putative effect and the predictors are the hypothesized causes Typically there is a main predictor variable of interest other predictors in the model are called covariates Unknown covariates or other independent variables not controlled in an experiment or analysis can affect the dependent or outcome variable and mislead the conclusions made from the inquiry Bock Velleman given the model p is the probability that a relationship is seen by mere chance The smaller the p value the more confident we can be that the pattern seen in the data is not random In the type of models examined here the R measures the proportion of the variation in the response variable that is explained by the predictors specified in the model if R is close to 1 then almost all the variation in the response variable has been explained This measure is also known as the multiple correlation coefficient Statistical studies can be grouped into two types experimental and observational **Resources in Education**, 2001-10 **Inquiry-Based Science in the**

on Research-Based Teaching Methods in Science Education de Silva, Eugene, 2014-08-31 While the great scientists of the past recognized a need for a multidisciplinary approach today's schools often treat math and science as subjects separate from the rest. This not only creates a disinterest among students but also a potential learning gap once students reach college and then graduate into the workforce. *Cases on Research Based Teaching Methods in Science Education* addresses the problems currently facing science education in the USA and the UK and suggests a new hands-on approach to learning.
