Constructing The Stable State Goals For Intervention And Peacebuilding:

Constructing the Stable State Kathleen H. Hawk, 2002-08-30 The United States and the international community intervened in a number of internal conflicts throughout the 1990s generally justifying their actions on humanitarian grounds. In most cases the external military intervention largely halted the fighting and allowed humanitarian assistance to be distributed. However, as Hawk makes clear, simply halting the fighting has not allowed these countries to create stable governments and harmonious societies. This study is based on the premise that if external actors (foreign governments, international organizations, and private groups) can not figure out how to lay a foundation for a stable longer term peace, there will be decreasing support for international intervention and peacekeeping/peacebuilding missions in the future. Although external actors have undertaken many activities in the aftermath of a military intervention in an attempt to consolidate peace, sufficient attention has not been paid to reconstructing the state as a capable, effective, and legitimate entity. While reconstructing the state is only a portion of what needs to be done to bring about a stable long term peace, it provides a necessary foundation upon which to structure the other activities. Through her examination of external actions in Somalia, Bosnia, and Kosovo, Hawk draws 23 lessons, nine of which are applicable to interventions in general and the remaining 14 specific to statebuilding efforts. This study will be of particular interest to scholars, students, and policymakers involved with conflict resolution and international relations.

Ex-Combatants and International Statebuilding Nathalie Duclos, 2024-06-07 This book examines the international efforts to regulate violence in Kosovo since 1999 through the United Nations Mission in Kosovo (UNMIK) and covers 15 years of international presence. The book analyses the process of implementing international policies from a sociological perspective and looks at the adaptations and arrangements of public policies achieved through the transactions of international actors with local actors who are at the heart of policy implementation. In particular, it analyses the disarmament, demobilisation, and reintegration (DDR) programme and shows the extent to which it was co-produced with Kosovo Liberation Army (KLA) leaders co-opted by international administrators. These analyses take the opposite view to the work that considers ex-combatants as spoilers. In Kosovo, the combatant leaders acted as peace brokers, facilitating demobilisation and exercising disciplinary control over rank and file combatants. Their position as brokers helped them to take control of the new state being built under international administration. This book shows the importance of the relationship between ex-combatants and the state and illustrates the multiplicity of their possible trajectories, including political ones. To elucidate the dynamics of co-production in shaping DDR policies and hybridising international policies as well as in state formation, the book relies on around a hundred interviews with ex-combatants of the KLA and with international personnel, as well as on the archives of international organisations and observations in the field. This book will be of much interest to students of international statebuilding, peace, and conflict studies. Balkan politics and international relations.
