

A photograph of a sunset over a rocky beach. The sky is a gradient of orange and yellow, transitioning into a darker blue at the horizon. The ocean is visible on the left, with white foam from breaking waves. The foreground is filled with dark, jagged rocks. A semi-transparent dark box with white text is centered over the image.

You know, most wake up constructing their world from what they experienced the day before. When we look out expecting what we've always gotten, then that's exactly what we get. But if we want something new, then we have to regard life with fresh eyes, ears and a mind open to possibilities.

Multicultural Education in Glocal Perspectives

Yun-Kyung Cha,Jagdish Gundara,Seung-Hwan Ham,Moosung Lee,2016-11-15 This conceptually rich and empirically grounded book draws upon expertise from a panel of emerging and established international scholars to explore the institutionalization and effect of multicultural education on a global scale Previous studies of multicultural education have largely ignored the significance of understanding the combination of multiple sociopolitical influences on multicultural education in both policy and practice Filling this void this book sheds light on the two main reasons for taking a glocal perspective on multicultural education First children should be provided with meaningful learning opportunities to acquire the knowledge skills and attitudes necessary to live in a culturally and ethno linguistically diverse society where the distinction between the local and the global is becoming blurred Second understanding both the global grammar and the local semantics of multicultural education helps researchers and policy makers grasp the whole picture of multicultural education as an evolving social construct and phenomenon This new book provokes a new round of discussion and research to expand and enrich our inquiry into cultural diversity and educational inclusion China's Urban Agglomerations

Chuanglin Fang,Danlin Yu,2020-01-03 The book combs through extensively 32 231 urban agglomeration related works during the past 120 years to explore a theoretically supported and practically based definition of urban agglomeration Based on the definition the authors explore intensively the fundamental characteristics spatiotemporal differentiation properties and existing issues for China s sustainable urban agglomeration development for the past 35 years The study proposes that China shall focus on the construction and sustainable development of five primary national level urban agglomerations In the meantime China shall also steadily and gradually construct 9 regional urban agglomerations and guide the development and

growth of 6 local urban agglomerations In the long run China will have a hierarchical 5 9 6 closely integrated hierarchical urban agglomeration spatial structure The study also proposes to coordinate the construction and development of urban agglomerations on the two belts and one road to form a national new urbanization development strategic pattern that enables the axis to connect the agglomerations while the agglomerations support the axis Furthermore the study investigates a variety of strategic thinking and suggestions for creating innovative green and ecologically friendly intelligent low carbon open culture oriented market oriented and shared urban agglomerations in China This book will be a comprehensive reference both for scholars and decision makers engaged in urban development and planning and environmental protection departments It can also serve as textbook for graduate students of relevant fields Routledge Handbook of International Education and Development Simon McGrath, Qing Gu, 2015-07-24 This timely Handbook takes stock of the range of debates that characterise the field of international education and development and suggests key aspects of a research agenda for the next period It is deliberately divergent in its approach recognising the major ideological and epistemological divides that characterise a field that draws on many traditions Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts The Handbook is divided in four parts and book ended by an introduction and a conclusion the latter oriented towards the implications that the volume has for future research agendas The first part explores major strands of debates about education's place in development theory The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development Part three looks beyond schools to consider early years adult and vocational education but focuses particularly on the return to thinking about higher education's role in development The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries Featuring over thirty chapters written by leading international and interdisciplinary scholars the Routledge Handbook of International Education and Development offers the first comprehensive and forward looking resource for students and scholars **The Culture of Building** Howard Davis, 2006-05-12 The Culture of Building describes how the built world including the vast number of buildings that are the settings for peoples everyday lives is the product of building cultures complex systems of people relationships building types techniques and habits in which design and building are anchored These cultures include builders bankers architects developers clients contractors craftspeople building inspectors planners and many others The product of these cultures which operate building after building is the built world of cities and settlements In this book Howard Davis uses historical contemporary and cross cultural examples to describe the nature and influence of these cultures He shows how building cultures reflect the general cultures in which they exist how they have changed over history how they affect the form of buildings and cities and how present building cultures which are responsible for the contemporary everyday environments may be improved Following the development of the idea of building

cultures using several historical examples the book lays out a framework that puts such topics as craft and professionalism the vernacular and nonvernacular and design and construction in common frameworks Although the book ranges widely over different cultures and historical periods it emphasizes the transformations that took place in architecture and building practice from the late eighteenth century to the present Finally the book uses a series of contemporary examples that demonstrate the building culture as a living concept These examples which include built work as well as innovative processes that go beyond the work of architects alone are described as the seeds that can help the emergence of a better build world This beautiful book features over 260 color and black and white illustrations most from the authors extensive collection of slides and includes photographs prints and drawings from historical archives and contemporary architectural offices
