Levy, Andrew M. Civitello, 2014-01-29 The latest tools and techniques for successfully managing construction operations CONSTRUCTION Fully revised throughout the new edition of this practical guide offers a wealth of proven strategies for effectively running a construction business delivering high quality projects on time and within budget and maximizing profits all gleaned from the authors decadeslong experience in the construction industry Construction Operations Manual of Policies and Procedures Fifth Edition contains new chapters on Building Information Modeling BIM and claims disputes arbitration and mediation More than 150 new and updated contract formats checklists forms and sample letters are included The book also provides current OSHA safety regulations and standards and the latest LEED Certification requirements Run a profitable and efficient construction firm with help from this time saving resource COVERAGE INCLUDES Company organization and quality assurance program Company and project administration General contracts Project engineering Site superintendence Safety and loss control Design build project administration The preparation and processing of change orders Claims disputes arbitration and mediation Progress schedules and funds analysis Building Information Modeling Green buildings and sustainability *Construction Project Management* Alison Dykstra, 2018 Construction Project Management provides the reader with crucial background information often overlooked in other texts The roles of the major players owners and designers general and specialty contractors Why contractors should avoid some jobs and how to get the right ones What bidding is and why the low bid is not always the best bid Why different types of construction contracts carry different levels of risk Why cost estimates and schedules are keys to project success How a contractor brings in a job on time and on budget And much more Alternative project delivery and BIM Change orders and getting paid MasterFormat ConsensusDocs and AIA Documents An expanded and updated introduction to Green Construction *Construction Business Management* Nick Ganaway, 2007-06-01 Only 43 per cent of U S construction firms remain in business after four years Why Inadequate management according to the U S Small Business Administration This is surprising because most construction firms are formed by ambitious construction project managers executives and tradesmen who have excelled at what they have been doing But as experienced as these entrepreneurs may be they are not likely prepared to take on the full range of responsibilities forced on them in managing the business of construction in its entirety While this business failure rate and its causes are based on U S experience available data from a number of other industrialized countries shows they are similar This book describes in detail what the business side of the construction equation requires of the construction firm owner The

contractor who quickly learns these requirements can identify and avoid or manage around the pitfalls that cause the high failure rate in our industry and put his or her construction firm on a level playing field with the best run companies in the business The detailed duties of the owner whether in the U S U K Australia or Canada are a common theme throughout the book The author Nick Ganaway speaks peer to peer and the book is sprinkled with supporting examples from his own experience He is immersed in the industry and this book is based on the things I ve learned used and refined as a light commercial general contractor in the course of starting and operating my own construction firm for 25 years The contractor doing 5 million or 50 million or more in annual sales or the equivalent amount in other countries or the entrepreneur who is just starting up can use the tried and proven material in this book to build a business that is profitable enjoyable and enduring Additionally the book devotes a chapter to specializing in chain store construction

Construction Management Eugenio Pellicer,Víctor Yepes,José C. Teixeira,Helder P. Moura,Joaquín Catalá,2013-10-09 The management of construction projects is a wide ranging and challenging discipline in an increasingly international industry facing continual challenges and demands for improvements in safety in quality and cost control and in the avoidance of contractual disputes Construction Management grew out of a Leonardo da Vinci project to develop a series of Common Learning Outcomes for European Managers in Construction Financed by the European Union the project aimed to develop a library of basic materials for developing construction management skills for use in a pan European context Focused exclusively on the management of the construction phase of a building project from the contractor s point of view Construction Management covers the complete range of topics of which mastery is required by the construction management professional for the effective delivery of new construction projects With the continued internationalisation of the construction industry Construction Management will be required reading for undergraduate and postgraduate students across Europe
