Heritage Building Information Modelling Yusuf Arayici,John Counsell,Lamine Mahdjoubi,Gehan Nagy,Soheir Hawas,Khaled Dweidar,2017-02-10 Building Information Modelling BIM is being debated tested and implemented wherever you look across the built environment sector This book is about Heritage Building Information Modelling HBIM which necessarily differs from the commonplace applications of BIM to new construction Where BIM is being used the focus is still very much on design and construction However its use as an operational and management tool for existing buildings particularly heritage buildings is lagging behind The first of its kind this book aims to clearly define the scope for HBIM and present cutting edge research findings alongside international case studies before outlining challenges for the future of HBIM research and practice After an extensive introduction to HBIM the core themes of the book are arranged into four

parts Restoration philosophies in practice Data capture and visualisation for maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built environment practitioners researchers academics and students engaged in BIM HBIM building energy modelling building surveying facilities management and heritage conservation more widely

Methodologies for Service Life Prediction of Buildings Ana Silva, Jorge de Brito, Pedro Lima Gaspar, 2016-04-28 Presenting an analysis of different approaches for predicting the service life of buildings this monograph discusses various statistical tools and mathematical models some of which have rarely been applied to the field It explores methods including deterministic factorial stochastic and computational models and applies these to a wide range of claddings The models allow i identification of patterns of degradation ii estimation of service life iii analysis of loss of performance using probability functions and iv estimation of service life using a probability distribution The final chapter discusses the differences between the different methodologies and their advantages and limitations The authors also argue that a better understanding of the service life of buildings results in more efficient building maintenance and reduced environmental costs It not only provides an invaluable resource to students researchers and industry professionals interested in service life prediction and sustainable construction but is also of interest to environmental and materials scientists

Construction Technology Tony Bryan, 2015-09-14 The second edition of Construction Technology Analysis and Choice has been expanded to include commercial buildings This now covers in a single textbook all the basic forms of construction studied on professional courses The book takes as its theme the process of choice what the expert has to know and how he she might think through the decisions to be made about the design production maintenance and disposal of buildings It is written with the conviction that by focusing on the process of choice the range of theory and knowledge that is useful to practice becomes explicit making the link between knowledge and practice and between understanding and experience The new edition has been updated throughout with extensive additions to Chapter 13 Manufacture and Assembly and to Chapter 15 Sustainability An entire new section has been added covering all the main elements of commercial construction Students will find here explanations of how environments structural behaviour production know how cost and social concerns such as sustainability can be taken into account in the choice of construction They will also gain a clear understanding of the construction details and specifications adopted for both housing and commercial buildings in the UK at the beginning of the 21st century Provides a framework to think through proposed solutions Sets the choice of solution in both time and place and in the context of sustainability Focuses on key questions will the proposal fail and can it be built Considers a building's response to loading environmental conditions and time Looks at the production process as manufacture and assembly Book website at www.wiley.com/go/bryanconstructiontech2e Contains nearly 200 fully referenced clear line drawings to download for free as well as suggested learning activities for lecturers to incorporate into their teaching programmes
