Constructions Of Intersubjectivity Discourse Syntax And Cognition:

Constructions of Intersubjectivity Arie Verhagen, 2005-05-26 *Constructions of Intersubjectivity* shows that the meaning of grammatical constructions often has more to do with the human cognitive capacity for taking other people's points of view than with describing the world. Treating pragmatics, semantics, and syntax in parallel and integrating insights from linguistics, psychology, and studies in animal behaviour, Arie Verhagen develops a new understanding of linguistic communication. In doing so, he shows the continuity between language and animal communication and reveals the nature of human linguistic specialization. Professor Verhagen uses Dutch and English data from a wide variety of sources and considers the contributions of grammar to the coherence of discourse. He argues that important problems in semantics and syntax may be resolved if language is understood as an instrument for exerting influence and coordinating different perspectives. The grammatical phenomena he discusses include negative expressions, the let alone construction, complementation constructions, and discourse connectives. This powerfully argued and original explanation of the nature and operation of communication will interest a wide range of scholars and advanced students in linguistics, cognitive science, and human evolution. **Genre in**

Language, Discourse and Cognition Ninke Stukker, Wilbert Spooren, Gerard Steen, 2016-05-10 The study of genre is scattered across research disciplines. This volume offers an integrative perspective starting from the assumption that genres are cognitive constructs recognized, maintained, and employed by members of a given discourse community. Its central questions are: What does genre knowledge consist of? How is it organized in cognition? How is it applied in discourse production and interpretation? How is it reflected in language use? **The Oxford Handbook of Construction Grammar**

Thomas Hoffmann, Graeme Trousdale, 2013-04-18 This Handbook is the first authoritative reference work solely dedicated to the theory, method, and applications of Construction Grammar and will be a resource that students and scholars alike can turn to for a representative overview of its many sub-theories and applications. Continuity of Environment, Body, Mind, and Language Sergio Torres-Martínez, Ten Lectures on Cognitive Evolutionary Linguistics Arie Verhagen, 2021-06-22 In these lectures, Arie Verhagen presents a version of cognitive linguistics that adheres to both the generalization and cognitive commitments that characterized the field from the start and a biological commitment understanding language as adaptive behavior of human organisms in the niches that they inhabit. Drawing on the model of biological explanation, Tinbergen's four whys, Verhagen shows how proximate individual level and ultimate population level explanations apply to several features of language, shedding new light on basic notions like conventionality and entrenchment, norms, rules, and habits, etc., and their causal connections. Topics include the relation between language, culture, and thinking.

A Cognitive Approach to Adverbial Subordination in European Portuguese Rainer

Vesterinen,2011-05-25 The study of adverbial clauses in Portuguese is related to the fact that the Portuguese speaker may chose between three different structures i e the adverbial clause may contain the plain infinitive the inflected infinitive or a finite verb form In the field of Portuguese Linguistics the analysis of these structures has traditionally been conducted from a Generative Grammar perspective postulating abstract rules and transformations in order to explain the variation between these structures As a result focus has been put on purely structural aspects while conceptual differences have been highly neglected The present book challenges this view of linguistic analysis Instead of proposing a general semantic content for finite and infinitive adverbial clauses in Portuguese traditionally based on notions like deep structure and surface structure the hypothesis put forward is that these clauses evoke different meanings and that the use of one adverbial structure or another can be explained by the context in which it occurs and by the conceptual content it designates From a Cognitive Grammar perspective of linguistic analysis it is shown that Portuguese adverbial structures illustrate the iconic nature of language and that their conceptual meaning can be explained by notions such as prominence mental spaces control and subjectification *Vantage Theory* Adam Głaz,Marnie L. Moist,2013-09-11 The book is concerned with Vantage Theory VT a model of categorization proposed by the American linguist anthropologist and cognitive scientist Robert E MacLaury 1944 2004 It consists of three of his previously unpublished studies and five chapters by other authors Vantage Theory views categorization as a process of vantage point of view construction by analogy to the way humans orient themselves in space time Originating in the domain of color the theory was extended to cover other aspects of cognition and language The chapters authored by MacLaury introduce the model discuss the details of the analogy between space time and categorization and present four case studies The remaining chapters present an overview of the existing literature on VT locate the model against the broader background of psychological and cognitive research and propose its application to novel data

Inquiries in Philosophical Pragmatics Fabrizio Macagno,Alessandro Capone,2021-03-19 Together with the first volume *Inquiries in philosophical pragmatics* Theoretical developments this book collects contributions that represent the state of the art on the interconnection between pragmatics and philosophy While the first volume presents the philosophical dimension of pragmatics showing the path from theoretical advances to practical uses and approaches this second volume offers a specular view on this discipline Instead of adopting the top down view of the first volume this collection of eleven chapters starts from the analysis of linguistic data which include texts and discourses in different languages different types of dialogues different types of interactions and different modes for expressing meaning looking for the regularities that govern our production and processing The chapters are ordered according to their relationship with the themes and methods that define the field of pragmatics The more explored and classical linguistic issues such as prototype based generalizations scalar implicatures and temporal ordering lead gradually to the more recent and debated topic of slurs and pejorative language and finally to the interdisciplinary and more pioneering works addressing specific context of language use such as

Analogy and Contrast in Language Karolina Krawczak, Barbara Lewandowska-Tomaszczyk, Marcin Grygiel, 2022-10-15 Within cognitive and functional approaches to language structure and grammaticality, analogy and contrast represent two fundamental human cognitive capacities which up to now have mostly been examined separately. This volume seeks to bridge that gap and in doing so it brings together cutting edge theoretical and empirical research in the field. The chapters in this book examine analogy and contrast across a variety of languages: English, Finnish, Hungarian, Polish, Russian, for different language phenomena: constructions, lexical semantics, morphology, sentence structure, text organization and with the use of various methods: corpus linguistics, discourse analysis, experimental methods, qualitative analysis, quantitative analysis. This state of the art research presented in the book should be of interest to specialists within Cognitive Linguistics, corpus linguistics, construction grammar, discourse analysis, translation studies, metaphor research and cross cultural research.

Second Person Plural Forms in World Englishes Liviana Galiano, 2021-11-29 Previously English used to distinguish between singular and plural second person pronouns However this distinction was lost during its transition into Modern English which saw the establishment of the single form you for both singular and plural reference Despite this many dialects of English have always continued to explicitly mark number on second person pronouns by resorting to different linguistic strategies both morphological and analytic Among such morphological variants is yous together with a host of different spelling variants such as youse yiz and yez among others This work is a synchronic corpus based investigation of second person plural forms in 20 varieties of English The corpus under study here GloWbe contains 1.9 billion words collected on the web in 2013 and was analysed in order to uncover the usage trends of second person plural forms in present day English The picture that emerges displays the diatopic distribution of the forms in addition to markers of politeness and empathy singular reference emphatic markers attention getting devices and possessive determiner and their frequencies of occurrence The book pays particular attention to the fundamental function of second person plural forms in the creation and management of the speaker hearer relationship

Argumentation and Language — Linguistic, Cognitive and Discursive

Explorations Steve Oswald, Thierry Herman, Jérôme Jacquin, 2018-03-08 This volume focuses on the role language plays at all levels of the argumentation process It explores the effects that specific linguistic choices may have in the production and the reception of arguments and in doing so it moves beyond the first necessary descriptive stance provided by current literature on the topic Each chapter provides an original take illuminating one or more of the following three issues the range of linguistic resources language users draw on as they argue how cognitive processes of meaning construction may influence argumentative practices and which discursive devices can be used to fulfil a number of argumentative goals The volume includes theoretical and empirical or applied stances providing the reader both with state of the art reflections on the relationship between argumentation and language and with concrete examples of how this relationship plays out in naturally occurring argumentative practices such as classroom interaction and political parliamentary or journalistic discourse This is a very original timely and welcome contribution to the study of argumentation conducted with the tools of the language sciences The collection of papers relevantly tackles key linguistic discursive and cognitive aspects of argumentative practices whose treatment is underrepresented in mainstream argumentation studies by offering new and exciting linguistically grounded theoretical accounts As such the volume testifies both to the vigour of the linguistic current within the discipline and to the high standards of scholarly commitment and quality that the younger generation is pushing forward Without question this book marks an important milestone in the relationships between linguistics and argumentation theory Christian Plantin Professor Emeritus

Subjectification, Intersubjectification and Grammaticalization Kristin Davidse, Lieven

Vandelanotte, Hubert Cuyckens, 2010-04-23 This volume aims to arrive at a fine grained and grammar based understanding of the notions of inter subjectivity and inter subjectification in their application to grammaticalization research In terms of linguistic theory position is taken vis vis existing approaches to inter subjectification which are either too narrow or too general by addressing two questions i what is the relation between inter subjectivity and pragmatics and ii on what grounds can subjective and intersubjective meanings be distinguished In the descriptive sections of the volume these theoretical considerations are confronted with extensive analytical and often also quantitative study of empirical data mainly from English but also from Romance languages The focus in these case studies is on the analytical and diachronic relations between subjectivity and intersubjectivity with particular emphasis on the question how linguistic syntagms may shift towards the expression of meanings of which the hearer is an essential part The domains covered include adverbials and modals but also the noun phrase to date a relatively under researched area in grammaticalization studies Together these three areas ensure broad verification of existing hypotheses about the relative order in which subjectification and intersubjectification take place This volume is mainly of interest to researchers and graduate students with a special interest in subjectification intersubjectification and grammaticalization and with a general interest in language change The volume will also be welcomed by functional linguists in a broad sense since it is the first to bring eclectic functionalists reflections to bear so explicitly on grammaticalization *The Construal of Spatial Meaning* Carita Paradis, Jean Hudson, Ulf Magnusson, 2013-04-25 This book deals with how language users express and understand literal and metaphorical spatial meaning in language and through gesture and pointing The research draws on data from textual investigation using corpora as well as from experiments of various kinds such as psycholinguistic experiments and eye tracking
