Bridgman,2014-05-20 George Brant Bridgman 1865 1943 was a Canadian American painter writer and teacher in the fields of anatomy and figure drawing Bridgman taught anatomy for artists at the Art Students League of New York for some 45 years Constructive Anatomy Illustrated by George B Bridgman Excellent book of anatomical drawing instruction Ideal for beginning to intermediate artists begins with instruction on drawing hands and works its way through the human body giving detailed instruction on how to draw realistic human figures The drawings that are presented here show the conceptions that have

proved simplest and most effective in constructing the human figure The eye in drawing must follow a line or a plane or a mass In the process of drawing this may become a moving line or a moving plane or a moving mass The line in actual construction must come first but as mental construction must precede physical so the concept of mass must come first that of plane second that of line last Masses of about the same size or proportion are conceived not as masses but as one mass those of different proportions in respect to their movement are conceived as wedging into each other or as morticed or interlocking
