## **Early Socialization Open Learning Units Developmental Psychology:**

**Early Socialization** H. Rudolph Schaffer, 1995-04-13 Open Learning Units offer a very flexible approach to the teaching of psychology. They are designed to be more than sufficient for the purposes of A S and A Level psychology and the applied emphasis will appeal to various vocational courses such as those offered by BTEC and also to mature students on Access courses. Their primary use will be in the classroom with a tutor's guidance but the interactive style makes them equally appropriate for the purposes of self study. More advanced students might want to use the Units to learn at their own pace and in all cases the careful structure of the writing and the extensive use of Examples, Open Questions and Self Assessment Questions make them ideal revision guides.

**Early Socialization** Rudolph Schaffer, 1995 This open learning text on early socialization considers social pre adaptation interaction communication attachment deprivation separation and the long term effects of early experience. Self assessment questions and answers are provided.

**Introduction to Infant Development** Alan Slater, Michael Lewis, 2007 Introduction to Infant Development 2 e offers a fascinating insight into the psychological development of infants presented by some of the world's leading authorities on the subject. With a mix of new and completely revised chapters the new edition makes the subject even more relevant and engaging to students.

**From Birth to Three: An Early Years Educator's Handbook** Julia Manning-Morton, 2024-03-01 This accessible handbook offers an in depth exploration of the distinctive features of the play development and learning of children from birth to three years old. Key theoretical ideas relating to social emotional cognitive and physical development are discussed in relation to everyday practice offering a wealth of information and guidance on working with this unique age group. The book emphasises the connections between all aspects of a child's experience and development addressing key questions of what babies and young children need, enjoy and have a right to experience. It demonstrates how early years educators can develop their practice and organise their provision in a way that is positive for babies and young children and their families. Focusing on the holistic nature of early development chapters explore the following: The importance of interactions and relationships between educators and children. How to develop a holistic pedagogy that gives equal consideration to children's care, play and learning. The value of the connections that children make with the world around them and how educators can create an environment conducive to nurturing these connections. Observation and self evaluation of practice and provision. Each chapter features case studies, links to key aspects of practice and practical tasks to help readers apply the ideas to their own context. The book is accompanied by an extensive companion website [www.routledge.com/cw/Manning-Morton](http://www.routledge.com/cw/Manning-Morton) containing video explainers, reflection points, practice tasks, downloadable resources, quizzes and more. Opening a window on what it is like to be a baby or young child in an early years setting, this is an essential tool for all early years educators and students on a wide range of early years courses. It will also be of interest to parents.
