East Asia In Transition Economic And Security Challenges:

East Asia in Transition Wendy Dobson, A.E. Safarian, 2002-02-23 The HSBC Bank Canada Papers on Asia series was begun in 1995 to examine Canada's relationship with the East Asian economies and to reduce the information barriers resulting from distance and unfamiliarity in these markets Six years on from the inception of the series much has changed in the international environment The Asian economies suffered a significant crash a rapid rebound only to slow again in 2000 2001 This the sixth and last volume in the series looks to the future This new volume focuses on key issues facing the region that corporations and governments should understand including East Asian regionalization initiatives obstacles to continued rapid growth in China aging and pension reform and the changing security environment In addition the Canadian business performance six years on is re-evaluated With contributions from leading scholars intimately familiar with both Canadian and East Asian business practices these volumes are an indispensable resource for corporations and governments looking to expand their business into East Asia or for anyone who wants to better understand Canada's complex relationship with the Asian countries

Globalisation and Economic Security in East Asia Helen E. Nesadurai, 2012-09-11 What is the relationship between globalization and economic security Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis Viewing traditional neorealist conceptions of economic security as overly narrow this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals This uniquely open-ended approach to conceptualizing economic security is supported by the East Asian experience The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development particularly following the 1997 to 1998 Asian financial crisis other more realist conceptions of economic security have not become irrelevant This is also an exploration of whether and how national regional and multilateral institutions as well as non-state regional mechanisms help policy makers meet the task of governing in the interests of economic security This book will be of great interest to all students and scholars of international relations international political economy of East Asia globalization and security studies

Navigating Prosperity and Security in East Asia Shiro Armstrong, Tom Westland, Adam Triggs, 2023-05-18 The world's two largest economies the United States and China are locked in a trade war complicating policy choices internationally These choices are sharper for the countries of East and Southeast Asia than they are elsewhere because the multilateral rules-based economic order on which East Asian economic integration and cooperation is built is under threat Economic policy has never been separate from security considerations For decades the national security risks inherent in economic exchange have been mitigated under a US-led system that allowed the strengthening of economic ties including between China and the rest of the world But economics and security are increasingly entangled in a way that is damaging to both creating a

dangerous trade off Now as global uncertainties grow the risks of international exchange rather than its benefits are beginning to dominate the calculus for some policymakers Against this backdrop how can Southeast Asian countries and US allies in Asia balance their security interests and their economic interests And how can these countries individually and collectively broaden their policy options and deepen economic integration This volume investigates the domestic and international dimensions of these questions The Future of East Asia Peter Hayes, Chung-In Moon, 2017-12-04 This book collects some of the most influential scholars in international relations who focus on Asia globally in exploring the challenges of diplomacy faced in Asia as US policy drastically changes The president elect has suggested policies which if implemented would radically transform the way that the region functions what will this mean in practice China's government is also retrenching nationalist positions what is the future of China and what does that mean for the region A wide range of distinguished scholars concerned about the future have contributed their thoughts in an attempt to spark a global dialogue

expect The authors come to the conclusion that it is a matrix or combination of leadership options rather than a single leadership type depending on issue domains governance structure and geospatial scales The conclusions by Christopher Dent admirably draw the theoretical and empirical issues together Reinhard Drifte Pacific Affairs This book considers themes evidence and ideas relating to the prospects for regional leadership in East Asia with particular reference to China and Japan assuming regional leader actor roles Key issues discussed by the list of distinguished contributors include the extent to which there is an East Asian region to lead China Japan relations different aspects of Japan and China s positions in the East Asia region how the seemingly inexorable rise of China is being addressed within the region how China and Japan have explored paths of regional leadership through certain regional and multilateral organisations and frameworks the position of certain intermediary powers i e the United States and Korea with regards to regional leadership diplomacy in East Asia Invaluably the concluding chapter brings together the main findings of the book and presents new analytical approaches for studying the nature of and prospects for leadership in East Asia China Japan and Regional Leadership in East Asia will be essential reading for upper level undergraduate and postgraduate students and researchers of international relations regional studies international political economy and economics as well as Asian and development studies **Business Horizons** Kelly School of Business,2003

Matthias Maass, 2025-10-01 The observation of a rising Asia and its rapidly growing economic powerhouses has become a truism These impressive economic development stories provide the backbone for the growing political assertiveness in the region Asia's economic prowess is rapidly being transferred onto the diplomatic stage In the light of these larger developments the authors of this timely volume investigate the regional and international implications of a rising Asia and problematise critical developments The first section focuses on the lack of a proper regional security community in Asia The second part analyses the usefulness of Asia as a catch all for very distinct sub regions While not denying the utility of the concept of Asia as one region the authors support the need to maintain in parallel a clear focus on issues approaches and characteristics that are unique to sub regions within the continent A third group of authors probe the regional foreign

Environmental Politics and Governance in Southeast Asia Syed Mohammed Ad'ha Aljunied, 2025-10-02 In this book Aljunied analyses how ASEAN and its key maritime member states of Singapore Malaysia and Indonesia govern environmental issues through strategic engagements with social forces In the new millennium ASEAN states power is enhanced and solidified through regulatory statehood strategic renewal and moral ideology in order to subdue civil resistance while managing non traditional security threats Through a comparative analysis of Southeast Asia this book highlights how state capitalist society relations are shaped by politics of scale and social conflict in order to reinforce authoritarianism and intensify capitalism development agendas at the expense of environmental preservation With this the book explores how civil society challenge and are suppressed by state power at national and regional platforms A pioneering scholarly work this book represents a major contribution to the intersection between political science environmental governance and Southeast Asian Studies by offering rich theoretical and empirical insights into the dynamics of state capitalist society relations in an era of global environmental crisis The Economy-Security Nexus in Northeast Asia T.J. Pempel, 2013-01-04 The dynamics of Northeast Asia have traditionally been considered primarily in military and hard security terms or alternatively along their economic dimensions This book argues that relations among the states of Northeast Asia are far more comprehensible when the mutually shaping interactions between economics and security are considered simultaneously It examines these interactions and some of the key empirical questions they pose the answers to which have important lessons for international relations beyond Northeast Asia Contributors to this volume analyze how the states of the region define their security and how bilateral relations in hard security issues and economic linkages play out among Japan China and the two Koreas Further the chapters interrogate how different patterns of techno nationalist development affect regional security ties and the extent to which closer economic connections enhance or detract from a nation's self perceived security The book concludes by discussing scenarios for the future and the conditions that will shape relations between economics and security in the region This book will be welcomed by students and scholars of Asian politics Asian economics security studies and political economy
