Handbook of Affinity Chromatography David S. Hage, Jack Cazes, 2005-07-19 This essential handbook guides investigators in the theory applications and practical use of affinity chromatography in a variety of fields including biotechnology biochemistry molecular biology analytical chemistry proteomics pharmaceutical science environmental analysis and clinical chemistry The Handbook of Affinity Chromatograph *Handbook of Affinity Chromatography* Toni Kline, 1993-06-16 Outlining the fundamental principles by which all interactions occur this reference focuses on harnessing the biochemistry of bioorganic compounds in order to separate them presenting new techniques and applications that affect the planning of research strategies The contributors discuss how to c *Diversity Across the Disciplines* Audrey J. Murrell, Jennifer L. Petrie-Wyman, Abdesalam Soudi, 2019-12-01 Diversity research and scholarship has evolved over the past several decades and is now reaching a critical juncture While the scholarship on diversity and inclusion has advanced within various disciplines and subdisciplines there have been limited conversations and collaborations across distinct areas of research Theories paradigms research models and methodologies have evolved but continue to remain locked within specific area disciplines or theoretical canons This collaborative edited volume examines diversity across disciplines in higher education Our book brings together contributions from the arts sciences and professional fields In order to advance diversity and inclusion across campuses multiple disciplinary perspectives need to be acknowledged and considered broadly The current higher education climate necessitates multicultural and interdisciplinary collaboration Global partnerships and technological advances require faculty administrators and graduate students to reach beyond their disciplinary focus to achieve successful programs and research projects We need to become more familiar discussing diversity across disciplines Our book investigates diversity across disciplines with attention to people process policies and paradigms The four thematic categories of people process policies and paradigms describe the multidisciplinary nature of diversity and topics relevant to faculty administrators and students in higher education The framework provides a structure to understand the ways in which people are impacted by diversity and the complicated process of engaging with diversity in a variety of contexts Policies draw attention to the dynamic nature of diversity across disciplines and paradigms presents models of diversity in research and education Advances in Chromatography Nelu Grinberg, Peter W. Carr, 2021-12-19 For six decades scientists and researchers have relied on the Advances in Chromatography series for the most up to date information on a wide range of developments in chromatographic methods and applications The clear presentation of topics and vivid illustrations for which this series has become known makes the material accessible and engaging to analytical biochemical organic polymer and pharmaceutical chemists at all levels of technical skill Key Features Discusses the basic concepts of affinity chromatography and examines recent developments in this method and related supramolecular separation methods Outlines the different types of gradient stationary phases and how they have been used in and benefited the field of separation science Reviews
