Boer,2011-01-01 The Loss of Java explains in detail the air sea and land battles between the Allied and Japanese armed forces during the battle for Java that followed the evacuation of southern Sumatra in February 1942 Little has been written about the allied air campaign or about why Dutch forces fought just one major land battle with the Japanese the Battle of the Tjiater Pass in the later stages of the struggle P C Boer considers whether the assessment of Major General Van Oyen that deploying

the Allied air forces might prevent Japanese invasion of Java was realistic and whether reliance on air power limited the capacity of land and naval forces to repel Japan's advances. The generally accepted idea is that the Allies were ineffective in their fight against the Japanese invaders but in fact the Japanese suffered serious losses. Boer's study shows that Dutch strategy grew out of a carefully devised plan of defense and that the battle for Java comprised not one the Battle of the Java Sea but four major engagements. However, Japanese commanders at various levels consciously took steps that exposed their forces to great risk but succeeded in putting the Allies under great pressure. In the end, the Royal Netherlands East Indies Army (KNIL) and the allied forces capitulated on 8 March 1942. A fascinating history of how the automotive industry and consumers battled to define what women wanted in a car. Since the commercial introduction of the automobile, US automakers have always sought women as customers and advertised accordingly. How then did car culture become so masculine? In *Pink Cars and Pocketbooks* Jessica Brockmole shares the untold history of women's relationship with automobiles, a journey marked by struggle, empowerment and the relentless pursuit of independence. This groundbreaking work explores the evolution of women's automotive participation and the cultural shifts that have redefined their roles as drivers, mechanics and consumers. Brockmole traces the rise of gendered marketing of automobiles over the course of the twentieth century. Auto companies created ads that conformed to commonly held ideas about women's relationships with automobiles. As the century progressed, marketing to women became less informative and even more gendered; the automotive industry portrayed women as passengers, props or reluctant drivers interested primarily in aesthetics. And yet by the 1970s, female drivers were communicating directly with each other, forming clubs and teaching each other through women-focused repair manuals. By examining market research, studies, advertising archives, trade journals, women's magazines, newspapers, driving handbooks and repair manuals, this book shows how women bought their way into the automobile and masculine car culture. Brockmole uncovers the stories of pioneering women who defied conventions, such as trailblazer Alice Ramsey, the first woman to drive across the United States in 1909, and Barb Wyatt, whose contributions to automotive manuals broke new ground. Women have always been users of technology and this book illustrates how the auto

industry evolved as well as how it chose not to evolve in response
