Contributions come from hundreds of authors who represent excellence in their respective fields An affordable volume available in print or online **Integrating Information Technology into the Teacher Education Curriculum** Nancy Wentworth, Rodney Earle, Michael Connell, 2013-01-11 As teaching evolves teacher education must keep up This book examines systemic reforms that incorporate new technology to improve any teacher education program While there are books that address the integration of technology into teaching curricula very few address the process for teacher education faculty and the systemic reform of a teacher education program Integrating Information Technology into the Teacher Education Curriculum Process and Products of Change provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating It describes the creation of Design Teams at Brigham Young University s McKay School of Education funded by a PT3 grant and how these teams worked to successfully reconfigure the school s teacher preparation curricula Integrating Information Technology into the Teacher Education Curriculum examines how to compose and create a curriculum design team including both teacher education and content specific methods instructors training and collaboration opportunities that focus on the infusion of technology how to facilitate alignment among a university cooperating school districts the State Office of Education and other available teacher preparation programs specific case examples of the redevelopment of teacher education courses by the instructors who teach them the process of changing a technology course required by the teacher education program the process of extending grant activities to the university s partner school districts and the State Office of Education From the editors Preparing tomorrow s teachers to use technology in schools is a complex endeavor requiring the infusion of technology into curriculum and instructional practices at all levels of the pre service program In many early teacher education programs prospective teachers took a computer literacy class separate from content methods classes and rarely engaged in real collaboration on

how schoolteachers could integrate technology into authentic learning experiences By focusing merely on how to use computers technology training failed by not addressing how to teach students more effectively using a variety of technological tools What teachers need to know most is how to teach content more effectively Technology integration should cause teachers to develop different perspectives through rethinking teaching and learning Teaching with technology causes teachers to confront their established beliefs about instruction and their traditional roles as classroom teachers **Science Education as a Pathway to Teaching Language Literacy** ,2010-01-01 In this era of mandated high stakes and standardized testing teachers and schools officials find themselves struggling to meet the demands for improved student achievement At the same time they are also expected to teach all subjects as required by national and state curriculum standards Because of these competing demands science is not even taught or taught less often in order to make more room for mathematics and language arts drill and practice and teaching to the test Anyone concerned with providing students with a well rounded education should ask whether these drastic measures even if they were to show improvement in achievement justify denying children access to the unique opportunities for intellectual growth and social awareness that the effective instruction of science provides Will these students have enough exposure to the science curriculum to prepare them to do well later in middle and high school How is this current situation going to help ameliorate the pervasive achievement gap in science and how is it going to motivate students to pursue science related careers The authors of this book believe that instead of sacrificing the science curriculum to make more time for drill and practice in mathematics and language arts what should be done is to connect current research on literacy and science instruction with effective pedagogy Therefore this volume provides fresh theoretical insights and practical applications for better understanding how science can be used as a pathway to teaching literacy and hence as a pathway to improving teachers practice and students learning **Handbook of Adolescent Literacy Research** Leila Christenbury,Randy Bomer,Peter Smagorinsky,2011-06-10 The first comprehensive research handbook of its kind this volume showcases innovative approaches to understanding adolescent literacy learning in a variety of settings Distinguished contributors examine how well adolescents are served by current instructional practices and highlight ways to translate research findings more effectively into sound teaching and policymaking The book explores social and cultural factors in adolescents approach to communication and response to instruction and sections address literacy both in and out of schools including literacy expectations in the contemporary workplace Detailed attention is given to issues of diversity and individual differences among learners Winner Literacy Research Association s Fry Book Award
