interviews with spirits and their mediums Hunter delves into a sub urban world of trance states ectoplasm spirit lights and discarnate entities Issues relating to altered states of consciousness personhood performance and the efficacy of ritual are examined in order to make sense of the processes by which spirits become manifest in social reality A large part of *Manifesting Spirits* is given over to a broader discussion of anthropology s evolving attitudes toward the paranormal as a component of the life worlds of many people across the globe and argues for the development of a non reductive anthropological approach to the paranormal and mediumship in particular This emerging framework referred to as ontological flooding does not attempt to explain away the existence of spirits in terms of functional cognitive or pathological theories as most mainstream theorists tend to do but rather embraces a processual perspective that emphasises complexity and multiple interconnected processes underlying spirit possession performances and experiences N equals 1 Gerhard Mayer,2020-03 Single case studies have a long tradition in the field of parapsychology and anomalistics research Naturally thorough case studies do not usually provide hard evidence for the existence of paranormal effects However they demonstrate the dynamics of occurrence of such extraordinary phenomena and experiences in the living world This volume is intended to give an overview of the methodological peculiarities of anomalistic field research On the basis of historical and current case studies certain specific psychosocial dynamics and problems in this interesting and challenging field of research are presented and discussed *Journal of the Society for Psychical Research* Society for Psychical Research (Great Britain),1997 Intercultural Encounters Wim M. J. van Binsbergen,2003 This book brings together fifteen essays investigating aspects of interculturality Like its author it operates at the borderline between social anthropology and intercultural philosophy It seeks to make a contribution to intercultural philosophy by formulating with great precision and painful honesty the lessons deriving from extensive intercultural experiences as an anthropologist Its culminating section presents an intercultural philosophy revolving on the tenet cultures do not exist The kaleidoscopic nature of intercultural experiences is reflected in the diversity of these texts Many belong to a field that could be described as meta anthropology others are more clearly philosophical occasionally they spill over into belles lettres ancient history and comparative cultural and religious studies The ethnographic specifics supporting the arguments are diverse deriving from various African situations in which the author has conducted participatory field research Tunisia Zambia Botswana and South Africa

Beyond Physicalism Edward F. Kelly,Adam Crabtree,Paul Marshall,2015-02-19 The rise of modern science has brought with it increasing acceptance among intellectual elites of a worldview that conflicts sharply both with everyday human experience and with beliefs widely shared among the world s great cultural traditions Most contemporary scientists and philosophers believe that reality is at bottom purely physical and that human beings are nothing more than extremely complicated biological machines On such views our everyday experiences of conscious decision making free will and the self are illusory by products of the grinding of our neural machinery It follows that mind and personality are necessarily

extinguished at death and that there exists no deeper transpersonal or spiritual reality of any sort Beyond Physicalism is the product of an unusual fellowship of scientists and humanities scholars who dispute these views In their previous publication Irreducible Mind they argued that physicalism cannot accommodate various well evidenced empirical phenomena including paranormal or psi phenomena postmortem survival and mystical experiences In this new theory oriented companion volume they go further by attempting to understand how the world must be constituted in order that these rogue phenomena can occur Drawing upon empirical science metaphysical philosophy and the mystical traditions the authors work toward an improved big picture of the general character of reality one which strongly overlaps territory traditionally occupied by the world s institutional religions and which attempts to reconcile science and spirituality by finding a middle path between the polarized fundamentalisms religious and scientific that have dominated recent public discourse Contributions by Harald Atmanspacher Loriliai Biernacki Bernard Carr Wolfgang Fach Michael Grosso Michael Murphy David E Presti Gregory Shaw Henry P Stapp Eric M Weiss and Ian Whicher **Extrasensory Perception** Edwin C. May, Sonali Bhatt

Marwaha, 2015-06-23 Scholars from around the world collaborate to explain the history of parapsychology the study of extrasensory perception ESP and the arguments of skeptics and supporters in this fascinating collection This two volume set introduces ESP also known as anomalous cognition and psychokinesis addressing the history research philosophy and scientific theories surrounding the phenomena With contributions from leading research scientists from within the field of parapsychology and other areas of study this reference addresses the fundamental questions that the evidence of ESP evokes examines parapsychology research from all over the world and explores the controversies skepticism and contemporary criticism disparaging the field Written for a multidisciplinary audience ranging from physicists to psychologists to lay persons the volumes present the scientific validity of the field Volume 1 addresses the historical philosophical skeptical and research viewpoints volume 2 lays out the current theories on ESP Chapters reveal how strict scientific protocols and state of the art technologies enable scientists at sites such as Harvard and Cornell universities to their international counterparts in Amsterdam Austria and Asia to pinpoint and investigate ESP abilities Appendices include a glossary of key terms in parapsychology ESP research protocol ESP research organizations skeptic associations and recommended reading

Irreducible Mind Edward F. Kelly, Emily Williams Kelly, Adam Crabtree, Alan Gauld, Michael Grosso, Bruce Greyson, 2006-12-07 Current mainstream opinion in psychology neuroscience and philosophy of mind holds that all aspects of human mind and consciousness are generated by physical processes occurring in brains Views of this sort have dominated recent scholarly publication The present volume however demonstrates empirically that this reductive materialism is not only incomplete but false The authors systematically marshal evidence for a variety of psychological phenomena that are extremely difficult and in some cases clearly impossible to account for in conventional physicalist terms Topics addressed include phenomena of extreme psychophysical influence memory psychological automatisms and secondary personality near

death experiences and allied phenomena genius level creativity and mystical states of consciousness both spontaneous and drug induced The authors further show that these rogue phenomena are more readily accommodated by an alternative transmission or filter theory of mind brain relations advanced over a century ago by a largely forgotten genius F W H Myers and developed further by his friend and colleague William James This theory moreover ratifies the commonsense conception of human beings as causally effective conscious agents and is fully compatible with leading edge physics and neuroscience The book should command the attention of all open minded persons concerned with the still unsolved mysteries of the mind

Signs of Reincarnation James G. Matlock, 2019-06-15 Signs of Reincarnation provides the first comprehensive look at the belief in reincarnation and the evidence for past lives from historical records anthropological studies and contemporary research Matlock discusses various ways the evidence may be interpreted and shows that although reincarnation entails a rejection of the materialist notion that consciousness is generated by the brain it does not require the acceptance of any radically new concepts or the abandonment of well established findings in mainstream psychology or biology This book offers students scholars and anyone interested in the possibility of reincarnation an essential grounding in beliefs cases and theory while opening doors for future research into the extension of consciousness beyond our present lives **Seriously Strange**

Sudhir Kakar, 2012-07-17 Despite being sullied by frauds and dismissed by sceptics the paranormal has exerted a strange fascination over humankind for centuries In Seriously strange a group of nine intellectuals come together to shed light on some of the most baffling experiences on record psychical experiences Through these illuminating essays they tell us how such extraordinary events can be decoded and interpreted to become the object of rigorous scientific study the range is wide from essays that reveal how Freud and Jung engaged with the notion of the paranormal to a provocative and humorous memoir of a physicist who spent over a decade running a secret psychic spying programme for the US government during the Cold War from heartfelt accounts by practising psychiatrists of the anomalies in their healing practice to a learned call for the renewal of professional parapsychology in the light of Patanjali's Yoga Sutras By telling their own stories and exploring some of the implications of their work these men and women map the mind bending geography of the human psyche and the spectrum of experiences love and death desire and sex hurt and healing myth and magic that influence it **Advances in**
