Alternative Building Sourcebook:

The Alternative Building Sourcebook Shelter, Steve Chapell, 2001-06-01 **The Alternative Building Sourcebook** Steve Chappell, 1998 Containing more than 900 listings of builders suppliers and manufacturers The Alternative Building Sourcebook is an indispensable reference for the ardent amateur or professional in the construction trades 85 photos

Materials for Sustainable Sites Meg Calkins, 2008-09-22 Dieser umfassende Leitfaden zur Evaluierung Auswahl und zum Einsatz nachhaltiger Materialien im Landschaftsbau bietet einen Überblick über Strategien mit denen sich die Auswirkungen herkömmlicher Baumaterialien auf die Umwelt und die menschliche Gesundheit minimieren lassen und stellt ökologische Alternativen vor Neben detaillierten und aktuellen Informationen zu Baumaterialien für eine grüne Bebauung erhält der Leser eine Einführung in Werkzeuge Techniken Vorstellungen und Quellen für die Evaluierung Beschaffung und Spezifikation nachhaltiger Baustoffe In den jeweiligen Kapiteln werden sowohl herkömmliche als auch neue ökologische Materialien Auswirkungen der einzelnen Baustoffe auf die Umwelt und die menschliche Gesundheit sowie Strategien zur Minimierung derartiger Belastungen beschrieben Fallstudien geben Auskunft über Kosten und Leistungsmerkmale und dokumentieren die gesammelten praktischen Erfahrungen **Sustainable Building** Anna Jones-Crabtree, 1999 **Build Smarter with**

Alternative Materials Leon A. Frechette, 1999 This is the book for construction professionals who want a clear understanding of alternative materials and how using them can enhance their projects both residential and commercial It covers the materials including their strengths and any limitations as well as installation tips and manhour estimates For each product listed you will learn where you can get it including phone numbers and Website addresses of the manufacturers Every builder needs a niche This book is full of new exciting materials that you can offer your customers with confidence The

Good House Book Clarke Snell, 2004 A guide to building an eco friendly energy efficient and sustainable house that is in harmony with the local climate and site Sourcebook of Alternative Technologies for Freshwater Augmentation in West

Asia UNEP International Environmental Technology Centre, Arab Centre for the Studies of Arid Zones and Dry Lands, 2001 The region is characterized for its aridity and vast deserts making water to evaporate very fast while at the same time permeating into the soil rapidly before it could be properly used or contained The sourcebook provides a comprehensive description of the existing technologies available in West Asia so that decision makers government and non governmental organizations can use as a reference to promote the sound planning and management of freshwater resources in this particular region **Sustainable Urban Development Volume 1** Stephen Curwell, Mark Deakin, Martin Symes, 2005-09-09

This book examines the models of sustainable development and sets out a framework for analysing urban development and the sustainability issues which can arise **Sustainable Building - Design Manual**, 2004-01-01 The second volume

targets practitioners and focuses on the process of green architecture by combining concepts and technologies with best practices for each integral design component *Towards Sustainable Building* N. Maiellaro, 2013-03-14 This volume

contains the extended versions of selected papers presented at the first Mediterranean Conference Sharing Knowledge on Sustainable Building held at the Polytechnic of Bari in December 1999 supported by the National Research Council of Italy. The publication of this book was made possible through the efforts of the contributing Authors. Other people have provided invaluable support for the conference and for the preparation of this volume. In particular, I wish to thank Antonella Lerario for providing support in the final editing of the text and images. 1 As reported in Boonstra and Rovers (2000), people spend a great deal of time inside buildings; therefore, decisions about design, construction, use, maintenance, renovation, demolition, reuse, and recycling of buildings have a huge impact on the sustainable development of our society. Technical aspects, however, should be supported by adequate policies developed with appropriate tools and driven by meaningful challenges. For people involved in sustainable buildings, the conceptual frameworks, studies, and experiences collected in this volume, organized into three parts: Policies, Tools, and Challenges, will help to advance knowledge, allowing them to adopt and more efficiently implement such innovations sooner.

Sustainable Practice for the Facilities Manager Sunil Shah, 2008-04-15

sectors including offices, retail, and manufacturing. It explains the facilities manager's role in incorporating sustainability into the whole life cycle of a building, from initial briefing to final disposal. The book takes a structured approach: masterplanning and real estate acquisitions and disposals; design, construction, and commissioning; refurbishment, fit out, and project management; maintenance, operation, and occupant satisfaction. *Sustainable Practice for the Facilities Manager* fills the gap between the policy-level sustainability books and the detailed technical documents by focusing on the what and how of planning and implementing sound environmental management practices in the context of FM operations. It covers policy and trends on global, European, and UK levels affecting businesses; compliance requirements for organisations, including some sector-specific areas; and best practice with good and bad case studies showing the business benefits of incorporating sustainable practice into day-to-day activities. The book is for facilities management professionals in public and private organisations, including property companies, institutional investors, building services, or supplier organisations, and will help you deliver an improved, operationally performing facility.

Sunil Shah, Technical Director and Head of Sustainability, Jacobs. Sunil has over eight years' consultancy experience within the built environment, reviewing lifecycle, environmental, and social impacts from facilities. He has experience in a number of sectors, providing strategic consultancy support for clients including GlaxoSmithKline, BP, BAA, HM Prison Service, Pfizer, and London Fire Brigade. Sunil has most recently been involved in supporting the inclusion of facilities management within the DTI's Sustainable Construction Strategy.

High Performance Building Guidelines Andrea Woodner, 2000. High performance buildings maximize operational energy savings, improve comfort, health, design process, site design, building energy use, indoor environment, material, water, mgmt, construction, admin, commissioning, operations, maintenance.

BIM in Small-Scale Sustainable Design François Lévy, 2011-11-16. Any architect doing small or medium scaled projects who is also vested in sustainable design but is not yet

doing BIM will enjoy this book's overall focus. Architectosh.com This work is the leading guide to architectural design within a building information modeling BIM workflow giving the practitioner a clear procedure when designing climate load dominated buildings. The book incorporates new information related to BIM integrated practice and sustainable design as well information on how designers can incorporate the latest technological tools. Each chapter addresses specific topics such as natural ventilation for cooling passive solar heating rainwater harvesting and building hydrology optimizing material use and reducing construction waste and collaborating with consultants or other building professionals such as engineers and energy modelers.

Green Development Rocky Mountain Institute, 1998 Green Development is good for business. Tenants, owners, purchasers and brokers are all becoming more sophisticated and are realizing the financial and social benefits of green product. Gerald Hines, Chairman of Hines Environmentally responsible real estate development makes dollars and sense. Green Development describes an exciting new field in which environmental considerations are viewed as opportunities to create fundamentally better buildings and communities more comfortable more efficient more appealing and ultimately more profitable. If you're a developer, architect, planner, contractor, lender or city official, this book speaks your language. Every stage of the development process is examined in detail: market research, site planning, design, approvals, financing, construction, marketing and occupancy. Also included are lists of project statistics and contacts, books and other information sources and development strategies. Based on 80 case studies drawn from Rocky Mountain Institute's extensive worldwide research and consulting work, Green Development distills proven procedures and practical lessons that work in the real world.

Choosing Green Jerry Yudelson, 2008-05-01 Energy efficient, non-toxic, healthy homes are the hottest trend in the building industry. Homebuilders are constructing green homes in astonishing numbers: nearly 200,000 in the US alone in 2006. How does a home buyer who wants a green home know what to look for? What questions to ask a builder? Which green home rating systems to trust and what homes are on the market? Nationally recognized green building expert Jerry Yudelson provides answers to some common areas of concern including: Energy efficient home features, Water conservation fixtures, Non-toxic finishes, Green products, Healthy indoor air. Drawing from the expertise of dozens of homebuilders, government officials and green home experts, Choosing Green deftly takes the reader through these considerations with easy-to-use tables, charts, maps, score sheets and checklists. The book includes a glossary of green building terms, an extensive resource section and a list of homebuilders green rating programs and financial incentives. This comprehensive book provides homebuyers with everything they will need to make a successful search for their own green home.

Inherently-sustainable Technology Development Arjun B. Chhetri, Rafiqul Islam, 2008 Presents the research findings in modern technological developments based on synthetic chemicals that are highly toxic to the human environment This book includes various types of appropriate energy

technologies suitable for cooking heating lighting transportation and industrial usage

The Solar House Daniel D. Chiras, 2002-10-01 Passive solar heating and passive cooling approaches known as natural conditioning provide comfort throughout the year by reducing or eliminating the need for fossil fuel Yet while heat from sunlight and ventilation from breezes is free for the taking few modern architects or builders really understand the principles involved Now Dan Chiras author of the popular book *The Natural House* brings those principles up to date for a new generation of solar enthusiasts The techniques required to heat and cool a building passively have been used for thousands of years Early societies such as the Native American Anasazis and the ancient Greeks perfected designs that effectively exploited these natural processes The Greeks considered anyone who didn't use passive solar to heat a home to be a barbarian In the United States passive solar architecture experienced a major resurgence of interest in the 1970s in response to crippling oil embargoes With grand enthusiasm but with scant knowledge and sometimes little common sense architects and builders created a wide variety of solar homes Some worked pretty well but looked more like laboratories than houses Others performed poorly overheating in the summer because of excessive or misplaced windows and skylights and growing chilly in the colder months because of insufficient thermal mass and insulation and poor siting In *The Solar House* Dan Chiras sets the record straight on the vast potential for passive heating and cooling Acknowledging the good intentions of misguided solar designers in the past he highlights certain egregious and entirely avoidable errors More importantly Chiras explains in methodical detail how today's home builders can succeed with solar designs Now that energy efficiency measures including higher levels of insulation and multi layered glazing have become standard it is easier than ever before to create a comfortable and affordable passive solar house that will provide year round comfort in any climate Moreover since modern building materials and airtight construction methods sometimes result in air quality and even toxicity problems Chiras explains state of the art ventilation and filtering techniques that complement the ancient solar strategies of thermal mass and daylighting Chiras also explains the new diagnostic aids available in printed worksheet or software formats allowing readers to generate their own design schemes

Energy in America Ingrid Kelley, 2008 Scientists tell us we need to cut carbon emissions immediately to forestall effects of global warming Reducing fossil fuel use is the key and energy experts are hard at work devising solutions Engineers create remarkable clean energy technologies Energy policy analysts invent carbon credits and renewable portfolio standards Fossil energy industrialists promise new clean technology Renewable energy industrialists compete to develop the magic bullet for transportation fuel or power generation Every idea is designed to change the nation's energy sector to one that is clean and sustainable for the future But what is this energy sector we have and how did it come about Design professionals planners elected officials and community leaders are under tremendous pressure to find solutions to climate change They need a broader view of America's relationship with energy to gain perspective on how new ideas might work *Energy in America* tells this story emphasizing that energy use has always been based on cultural factors as well as

technology Energy in America relates how coal oil and natural gas built the nation from its beginning and created today's consumer culture It continues with the rise of the electric utility industry and its influence on American society Finally it explores the 1970s when America woke to conservation and efficiency and the renewable energy industries were born It concludes with a look at the future possibilities for community energy planning and current trends in sustainable energy policy The book features a comprehensive energy timeline from 1775 to the present Each chapter provides primary web sources and the book contains a complete index

Eventually, you will enormously discover a supplementary experience and realization by spending more cash. nevertheless when? attain you agree to that you require to acquire those every needs like having significantly cash? Why dont you try to get something basic in the beginning? Thats something that will lead you to understand even more approaching the globe, experience, some places, past history, amusement, and a lot more?

It is your agreed own epoch to undertaking reviewing habit. in the middle of guides you could enjoy now is **Alternative Building Sourcebook** below.
